Horror Comics in Black and White Richard J. Arndt, 2013-01-21 In 1954 the comic book industry instituted the Comics Code a set of self regulatory guidelines imposed to placate public concern over gory and horrific comic book content effectively banning genuine horror comics Because the Code applied only to color comics many artists and writers turned to black and white to circumvent the Code s narrow confines With the 1964 Creepy 1 from Warren Publishing black and white horror comics experienced a revival continuing into the early 21st century an important step in the maturation of the horror genre within the comics field as a whole This generously illustrated work offers a comprehensive history and retrospective of the black and white horror comics that flourished on the newsstands from 1964 to 2004 With a catalog of original magazines complete credits and insightful analysis it highlights an important but overlooked period in the history of comics *Living With the Other* Avi Sagi, 2019-01-13 The book grapples with one of the most difficult questions confronting the contemporary world the problem of the other which includes ethical political and metaphysical aspects A widespread approach in the history of the discourse on the other systematically formulated by Emmanuel Levinas and his followers has invested this term with an almost mythical quality the other is everybody else but never a specific person an abstraction of historical human existence This book offers an alternative view turning the other into a real being through a carefully described process involving two dimensions referred to as the ethic of loyalty to the visible and the ethic of inner retreat Tracing the course of this process in life and in literature the book presents a broad and lucid picture intriguing to philosophers and also accessible to readers concerned with questions touching on the meaning of life ethics and politics and particularly relevant to the burning issues surrounding attitudes to immigrants as others and to the relationship with God the ultimate other A *General History and Collection of Voyages and Travels (Vol. 1-18)* Robert Kerr, 2020-07-01 Prepare yourslef for discoveries

Design of Heuristic Algorithms for Hard Optimization Éric D. Taillard, 2022-10-29 This open access book demonstrates all the steps required to design heuristic algorithms for difficult optimization The classic problem of the travelling salesman is used as a common thread to illustrate all the techniques discussed This problem is ideal for introducing readers to the subject because it is very intuitive and its solutions can be graphically represented The book features a wealth of illustrations that allow the concepts to be understood at a glance The book approaches the main metaheuristics from a new angle deconstructing them into a few key concepts presented in separate chapters construction improvement decomposition randomization and learning methods Each metaheuristic can then be presented in simplified form as a combination of these concepts This approach avoids giving the impression that metaheuristics is a non formal discipline a kind of cloud sculpture Moreover it provides concrete applications of the travelling salesman problem which illustrate in just a few lines of code how to design a new heuristic and remove all ambiguities left by a general framework

Two chapters reviewing the basics of combinatorial optimization and complexity theory make the book self contained As such even readers with a very limited background in the field will be able to follow all the content

Reconsidering Dementia Narratives Rebecca Bitenc, 2019-07-05 Reconsidering Dementia Narratives explores the role of narrative in developing new ways of understanding interacting with and caring for people with dementia It asks how the stories we tell about dementia in fiction life writing and film both reflect and shape the way we think about this important condition Highlighting the need to attend to embodied and relational aspects of identity in dementia the study further outlines ways in which narratives may contribute to dementia care while disputing the idea that the modes of empathy

fostered by narrative necessarily bring about more humane care practices This cross medial analysis represents an interdisciplinary approach to dementia narratives which range across auto biography graphic narrative novel film documentary and collaborative storytelling practices The book aims to clarify the limits and affordances of narrative and narrative studies in relation to an ethically driven medical humanities agenda through the use of case studies Answering the key question of whether dementia narratives align with or run counter to the dominant discourse of dementia as loss of self this innovative book will be of interest to anyone interested in dementia studies ageing studies narrative studies in health care and critical medical humanities

The Women Who Knew Too Much Tania Modleski, 2012-11-12 First published in 1988 The Women Who Knew Too Much remains a classic work in film theory and criticism The book consists of a theoretical introduction and analyses of seven important films by Alfred Hitchcock each of which provides a basis for an analysis of the female spectator as well as of the male spectator Modleski considers the emotional and psychic investments of men and women in female characters whose stories often undermine the mastery of the cinematic Master of Suspense This new edition features a new chapter which considers the last 15 years of Hitchcock criticism as it relates to the ideas in this landmark book

Language and Politics John E. Joseph, 2006-06-21 Language this book argues is political from top to bottom whether considered at the level of an individual speaker's choice of language or style of discourse with others where interpersonal politics are performed or at the level of political rhetoric or indeed all the way up to the formation of national languages By bringing together this set of topics and highlighting how they are interrelated the book will function well as a textbook on any applied or sociolinguistic course in which some or all of these various aspects of the politics of language are covered
