Erickson,Anthony Joseph Wynshaw-Boris,2016 Epstein's Inborn Errors of Development provides essays on pathways of development and thoughtful reviews of dysmorphic syndromes for which the causative gene has been identified It is a top to bottom revision of the landmark text that both revolutionized and accelerated the field of human genetics

[Links between Fibrogenesis and Cancer](#) Esteban C. Gabazza,2019-11-18 Tissue fibrosis may occur for unknown causes or be the consequence of many pathological conditions including chronic inflammatory or infectious diseases autoimmune disorders graft rejection or malignancy On the other hand malignant tumors have been identified in fibrotic tissues decades ago and now accumulating

evidence suggests that fibrotic lesions enhance the risk of cancer in several organs such as liver lungs and breast Disruption of an organ parenchymal cells and of its normal structural scaffold during tissue fibrogenesis appears to induce loss of cell polarity promoting uncontrolled cell proliferation that may eventually lead to cancer development Many cellular and molecular abnormalities including aberrant expression of microRNAs genetic and epigenetic alterations evasion or delayed apoptosis unregulated intracellular signal pathways and dysregulation or defective intercellular communications have been proposed to explain this link between fibrogenesis and carcinogenesis However the precise mechanisms of this fibrosis to cancer transition remain unclear This book presents a collection of reviews and original articles summarizing recent advances in understanding the molecular mechanisms of cancer development in fibrotic organs Autism Spectrum Disorders: Developmental Trajectories, Neurobiological Basis, Treatment Update Roberto Canitano,Yuri Bozzi,2017-08-30 This Research Topic has the aim to fill the gap of the many unresolved scientific issues on Autism Spectrum Disorders ASD that are still in need of investigation Targeted treatments based on the understanding of the underlying pathogenic mechanisms of disease are still lacking Further research is awaited and should be obtained through a significant effort on experimental treatment trials and neuroscience research This Topic is divided in two main sections one covering clinical issues and another on basic neurosciences of Autism Spectrum Disorders A more detailed description of the contents of the articles is provided in the editorial at the beginning of the issue **Journal of the National Cancer Institute** ,2013
