Creating Systems of Innovation in Africa Mammo Muchie, Angathevar Baskaran, 2013-01-29 The most popularised concept in the economics of innovation literature has been the national system of innovation NSI It was in the late 1980s that the concept that Frederik List coined as the National Political Economy of Production took off again with different thinkers writing about the peculiarities and distinctions of the Japanese American British German East Asian Tigers and other varieties of system construction Freeman defines National System of Innovation as the network of institutions in the public and private sectors whose activities and interactions initiate import modify and diffuse new technologies Richard Nelson defines it as a set of institutions whose interactions determine the innovative performance of national firms Lundvall defines the system of innovation as the elements and relationships which interact in the production diffusion and use of new and economically useful knowledge and are either located within or rooted inside the borders of a nation state The normative assumption is that those nations that succeeded in building economic strength relied on the science engineering technology and innovation capability that made them to achieve an innovation advantage to put them ahead in the world acquiring national or regional economic leadership as the case may be depending on what level of analyses is selected to look at particular failure success or progress they made In this volume we have a glimpse of how in different African economies from Ghana Uganda Kenya South Africa and Nigeria specific cases have been taken to explore how systems of innovation is evolving

**Innovation For Sustainability** Mammo Muchie, Angathevar Baskaran, 2013-12-29 The innovation system theory has to deal with climate change as it generates the intellectual tools to promote development A unified innovation system theory that integrates the

eradication of threats to nature with the promotion of development is critically important to advance an original pedigree and trajectory of epistemology Africa must learn and appreciate the costs to itself from the way Europe industrialised It can neither follow nor imitate the European pattern of industrialisation It has to include in its own development agenda both the meeting of social needs and choosing a path of development that would not bring ecological harm in the process The African innovation system has to evolve in a nature protecting rather than hurting system in addition social needs must be met rather than exacerbating the social inequalities path of development *Challenges of African Transformation* Mammo

Muchie, Angathevar Baskaran, 2013-01-29 A brief overview of the African economic picture reveals a paradox where the continent that has rich mineral resources nearly a billion people and a land mass which includes the sizes of China USA India Western Europe Argentina together larger than the sum of these regions is in an unacceptable state of being an object of aid debt and loans despite the vast resources both known and yet to be explored Africa should have been a productive and innovation centre and not a charity and aid centre of the world where donorship has replaced African national ownership of not just Africas resources but even worse Africas own agency autonomy and independence to shape policy and direction to undertake African integrated national development by establishing a science engineering and technology based knowledge innovative learning and competent economy The chapters in this volume address the application of the innovation approach to a variety of problems in Africa Together they highlight the critical importance of the innovation systems approach in each of the issues the authors preferred to select and analyse In the African context the application of innovation goes beyond firms to the informal activities at grassroots level The boundaries and the range of actors and activities for innovation application are varied and not limited This variation is represented in this volume by the diverse issues that the authors dealt with in their research by applying as common the use and application of innovation Mobile Computing and Wireless

Networks: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-09-30 We live in a wireless society one where convenience and accessibility determine the efficacy of the latest electronic gadgets and mobile devices Making the most of these technologies and ensuring their security against potential attackers requires increased diligence in mobile technology research and development Mobile Computing and Wireless Networks Concepts Methodologies Tools and Applications brings together a comprehensive range of voices and research in the area of mobile and wireless technologies exploring the successes and failures advantages and drawbacks and benefits and limitations of the technology With applications in a plethora of different research and topic areas this multi volume reference work benefits researchers service providers end users and information technology professionals This four volume reference work includes a diverse array of chapters and authors covering topics such as m commerce network ethics mobile agent systems mobile learning communications infrastructure and applications in fields such as business healthcare government tourism and more

Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies

for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment

**Journal of Scientific and Industrial Research** ,2014      Foods of Plant Origin Michael E. Netzel,Yasmina Sultanbawa,2020-04-02 It is now well accepted that the consumption of plant based foods is beneficial to human health Fruits vegetables grains and derived products can be excellent sources of minerals vitamins and fiber and usually have a favorable nutrient to energy ratio Furthermore plant foods are also a rich source of phytochemicals such as polyphenols carotenoids and betalains with potential health benefits for humans Many epidemiological studies have made a direct link between the consumption of plant foods and health Human intervention studies have also shown that higher intake consumption of plant foods can reduce the incidence of metabolic syndrome and other chronic diseases especially in at risk populations such as obese people In addition to its health benefits plant foods are also used as functional ingredients in food applications such as antioxidants antimicrobials and natural colorants The Special Issue Foods of Plant Origin covers biodiscovery functionality the effect of different cooking preparation methods on bioactive plant food ingredients and strategies to improve the nutritional quality of plant foods by adding other food components using novel alternative food sources or applying non conventional preparation techniques
