Culture and Rural-Urban Revitalisation in South Africa Mziwoxolo Sirayi, Modimowabarwa Kanyane, Giulio Verdini, 2021-06-14. This book captures ground-breaking attempts to utilise culture in territorial development and regeneration processes in the context of South Africa and our new normal brought by COVID-19, the fourth industrial revolution, and climate change. The world over, the importance of culture in rural urban revitalisation has been underestimated in South Africa and the African continent at large. Despite some cultural initiatives that are still at developmental stages in big cities such as Johannesburg, eThekweni, and Cape Town, there is concern about the absence of sustainable policies and plans to support culture, creativity, and indigenous knowledge at national and municipal levels. Showcasing alternative strategies for making culture central to development, this book discusses opportunities to shift culture and indigenous knowledge from the peripheries and place them at the epicentre of sustainable development and the mainstream of cultural planning, which can then be applied in the contexts of Africa and the Global South. Governmental institutions, research councils, civil society organisations, private sector, and higher education institutions come together in a joint effort to explain the nexus between culture, economic development, rural urban linkages, grassroots, and technological innovations. *Culture and Rural Urban Revitalization in South Africa* is an ideal read for those interested in rural and urban planning, cultural policy, indigenous knowledge, and smart rural village model.

New Models for Technical and Vocational Education and Training Makgato, Moses, Afeti, George, 2020-12-18. Technical and vocational education and training at technical schools are major contributing factors in combating poverty, unemployment, and inequality. The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace. As the Fourth Industrial Revolution continues to create more radical changes in the labor market, experts are calling for a reform of education, including vocational education and training, and adult and professional education. *New Models for Technical and Vocational Education and Training* is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students' chances of employability and entrepreneurship in Industry 4.0. The book explores knowledge in respect to workforce preparation, digital skills development, teaching and learning of TVET, flexibility, and articulation of TVET to respond to work, integrated learning, and reskilling and upskilling to avoid skill mismatches. It is ideal for TVET schools, academicians, curriculum designers, managers, training officers, administrators, vocational professionals, researchers, and students.
