**Teacher Education in Transition** John Furlong, 2000 The 1990s were a period of quite dramatic change for initial teacher education in England and Wales with wave after wave of Government sponsored reforms The changes introduced were highly controversial as those in higher education who were traditionally responsible for teacher education felt marginalized many believed that what was at stake in these reforms was the nature of teacher professionalism itself It was against this background of policy change and political ferment that the Economic and Social Research Council funded two successive research projects to evaluate the consequences of the reforms The projects known as MOTE Modes of Teacher Education included two national surveys as well as more detailed case studies of particular courses In this volume the authors draw upon these two major studies as well as more recent policy analysis to give a fascinating overview of the impact of policy

change throughout the 1990s In doing so they also consider whether a new form of professionalism was indeed created

[The Death of Progressive Education](#) Roy Lowe,2007-08-07 The first authoritative survey of the changing politics of the classroom since the Second World War It charts the process by which society moved away from being one in which teachers decided both the content of the school curriculum and how it would be taught towards the present situation in which a host of external influences dictate the nature of the educational experience The book identifies the key social and political developments which made this transformation inevitable and at the same time raises the question of how far the loss of control by teachers has also meant a shift away from progressive child centred education Key issues covered include The post war debate on the school curriculum as well as the extent to which it was fiercely contested The Black Paper Movement of the early 1970s The ways in which radical right rhetoric has come to dominate the politics of education and the educational press How the term progressive education has been subtly reworked so that those claiming to reform education now focus on measurable outcomes and the answerability of schools to parental and government pressure An historical analysis of the ways in which the Thatcher revolution in schools has been taken forward and developed under both John Major and Tony Blair This ground breaking analysis of how we have arrived at the present situation in our schools will be of interest to all students of education and to all those who wish to learn more about the changes that have taken place in our education system over the past sixty years It helps us understand why they happened and in so doing raises profound questions about the aspirations of modern society and the role of the schools in shaping it

**Pedagogies of the Enfleshed** Lore/tta LeMaster,2024-12-15 In Pedagogies of the Enfleshed Critical Communication Pedagogy Otherwise Lore LeMaster proffers a historic account of the rise of education and in turn communication studies as a distinct field of study In doing so the author reconsiders communication s disciplinary origins with less of an emphasis on the mythos of the Ancient Greeks and more accurately relocates them within the historic context of U S settler colonial development and ever expanding empire LeMaster argues that the point of critical communication pedagogy otherwise isn t to instill critical sensibilities into our teaching but to instead draw on lived experiences as grounds

for more effective uses of communication to intervene in oppressive relations across in formal pedagogical contexts and in service of liberatory change Where critical communication pedagogy calls for reform critical communication pedagogy otherwise labors in service of liberation within the long arc of revolutionary change beginning from y our vantage as educators as learners This is especially crucial LeMaster posits in the face of critical ongoing issues including economic recessions growing climate collapse escalating fascisms amassing white nationalisms and U S funded genocides all amid an active pandemic Ultimately this book makes a compelling case for the need of new critical communication pedagogy tools or at minimum approaches to communication pedagogy that support critical worldmaking efforts beyond recognition and with resource support at the local level
