## **Tupolev Tu 128 Fiddler:**

**Tupolev Tu-128 'Fiddler'** Alan Dawes, Nikolai Popov, Sergey Burdin, 2014 The first comprehensive account in English of the development and operation of Russia's least known postwar jet fighter. Only ever operated over the former Soviet Union's vast northern territory by an elite group of Soviet Air Force aircrew, it was little known even to most Russian military personnel and the majority of Soviet citizens. Although never flown in anger, the Tu 128 played a hugely important part in protecting the nation's Arctic approaches against foreign incursions for almost a quarter of a century. The reader will discover the rationale behind its selection and training of aircrew, operation of quick reaction alerts, manual and automated ground controlled intercepts and cooperation with the Soviet Union's first AWACS, its stable mate the Tu 126 Moss. With numerous previously unpublished photographs, diagrams and expert text, the Tu 128 Fiddler will prove indispensable to enthusiasts and historians alike. From jacket cover

**Tupolev TU-22** Sergey Burdin, 2005-11-17 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961. It remained in service until replaced by the much modified Tu 22M Backfire, which was introduced in the early 1970s and still remains in service. It was the first Soviet supersonic bomber and was used for reconnaissance and bombing in the latter role, carrying either conventional or nuclear bombs. The early aircraft had a range of 1,800 miles, but later models had a much increased radius of action through the introduction of in-flight refuelling. This book looks at the design and development of the aircraft up to the introduction of the type M Backfire. Details of construction, weapon systems, photo reconnaissance and jamming equipment are included to cover the several variant models. Operational use is explained, and the text includes many first-hand accounts from Russian aircrew of the period. The book will be superbly illustrated by unique official photographs and manuals.

**Super Snoopers** Bob Archer, 2020-07-21 The US Air Force has performed peripheral reconnaissance adjacent to the traditional foe of Russia: China, North Korea, and others for seven decades. Evolving from rudimentary aircraft to an unprecedented level of sophistication, the current elderly airframes boast unmatched performance. The book details the aircraft, equipment, sensors, air bases involved, and limited operational details as much remains highly classified. Additionally, stories by the personnel involved who have flown these missions and often faced their quarry at very close range. The majority of aircraft involved are the Boeing C-135 series, including more than 100 different airframes of 48 different versions. Missions include strategic intelligence, airborne command and control, treaty compliance, Open Skies, weather reconnaissance, aerial refuelling, and transportation. Details of the different aircraft missions, bewildering programme names, operating locations, and flying units involved. Background support organisations are presented. A potted history of every aircraft involved is included, together with units operated and designations applied. Sixty years of operations, which continue to this day, are mostly shrouded in secrecy. A cat-and-mouse adventure throughout the Cold War into the new peace dividend, and now in the face of renewed Russian aggression. The veil of secrecy is lifted ever so slightly.
