Turban Electronic 201:

Digital Business and Electronic Commerce Bernd W. Wirtz, 2021-03-28 This textbook introduces readers to digital business from a management standpoint. It provides an overview of the foundations of digital business with basics activities and success factors and an analytical view on user behavior. Dedicated chapters on mobile and social media present fundamental aspects, discuss applications and address key success factors. The Internet of Things (IoT) is subsequently introduced in the context of big data, cloud computing and connecting technologies with a focus on industry 4.0, smart business services, smart homes and digital consumer applications as well as artificial intelligence. The book then turns to digital business models in the B2C business to consumer and B2B business to business sectors. Building on the business model concepts, the book addresses digital business strategy, discussing the strategic digital business environment and digital business value activity systems (dVAs) as well as strategy development in the context of digital business. Special chapters explore the implications of strategy for digital marketing and digital procurement. Lastly, the book discusses the fundamentals of digital business technologies and security and provides an outline of digital business implementation. A comprehensive case study on Google Alphabet explains Google's organizational history, its integrated business model and its market environment. rounds out the book.

Introduction to Electronic Commerce and Social Commerce Efraim Turban, Judy Whiteside, David King, Jon Outland, 2017-04-23 This is a complete update of the best selling undergraduate textbook on Electronic Commerce (EC). New to this 4th Edition is the addition of material on Social Commerce, two chapters, a new tutorial on the major EC support technologies including cloud computing, RFID and EDI, ten new learning outcomes and video exercises added to most chapters. Wherever appropriate, material on Social Commerce has been added to existing chapters. Supplementary material includes an Instructor's Manual, Test Bank questions for each chapter, Powerpoint Lecture Notes and a Companion Website that includes EC support technologies as well as online files. The book is organized into 12 chapters grouped into 6 parts. Part 1 is an Introduction to E-Commerce and E-Marketplaces. Part 2 focuses on EC Applications while Part 3 looks at Emerging EC Platforms with two new chapters on Social Commerce and Enterprise Social Networks. Part 4 examines EC Support Services and Part 5 looks at E-Commerce Strategy and Implementation. Part 6 is a collection of online tutorials on Launching Online Businesses and EC Projects with tutorials focusing on e-CRM, EC Technology, Business Intelligence including Data Text and Web Mining, E-Collaboration and Competition in Cyberspace. The following tutorials are not related to any specific chapter; they cover the essentials of EC technologies and provide a guide to relevant resources.

The China Information Technology Handbook Patricia Ordóñez de Pablos, Miltiadis D. Lytras, 2010-03-23 Miltiadis D. Lytras and Patricia Ordóñez de Pablos, Department of Computer Engineering and Informatics, University of Patras, Greece. Dept. of Business Administration and Accountability, University of Oviedo, Spain. China is a fast growing emerging economy and current impressive economic growth rate of almost 9 percent annually. Its contribution to global GDP growth since 2000 has been

almost twice as large as that of the next three biggest emerging economies India Brazil and Russia combined Some even refer to China as the mother of emerging markets and transition economies Directly or indirectly the Chinese economy has influenced interest rates prices for raw materials and wages in the western established economies Currently China is the most R D intense of emerging market countries and is seventh of all countries in the world Its economic power is exemplified by the fact that it is expected to be the fifth largest source of outward foreign direct investment during 2004 2007 Working with Chinese firms has become a reality for the vast majority of managers in Western countries With its high growth rate the presence and impact of the Chinese economy will only become larger With China's importance on the global scale set to grow faster than ever shows a unique window to observe the changes that will chart the course of the future in this region of the world One of the keys to dealing with China is understanding the complex dynamic between rapid change and tradition

Mobile Opportunities and Applications for E-Service Innovations Scupola, Ada, 2012-12-31 Mobile technology continues to shape our society delivering information and knowledge right to our finger tips It is only fitting that these advancements and opportunities are applied to the area of electronic services Mobile Opportunities and Applications for E Service Innovations brings together different perspectives on the understanding of e service and mobile communication as well as their effects on the fields of marketing management and information systems The growth of e services as it relates to business to business business to consumer consumer to consumer are essential to the interests of professionals academics and researchers as well as industry consultants

Information Technology for Management Efraim Turban, Ephraim McLean, James Wetherbe, 2004 A practical managerial oriented approach that shows how IT is used in organizations to improve quality and productivity Case studies highlight new technology and applications including fuzzy logic neural computing and hypermedia Contains a variety of cases that emphasize problems many corporations encounter Features international cases illustrating how IT can be adapted to other cultures

Towards the E-Society Beat Schmid, Katarina Stanoevska, Volker Tschammer, 2008-11-16 I3E 2001 is the first in a series of conferences on e commerce e business and government organised by the three IFIP committees TC6 TC8 and TC11 It provides a forum where users engineers and scientists from academia industry and government can present their latest findings in e commerce e business and government applications and the underlying technology to support those applications The conference comprises a main track and mini tracks dedicated to special topics The papers presented in the main track were rigorously refereed and selected by the International Programme Committee of the conference Thematically they were grouped in the following sessions Sessions on security and trust comprising nine papers referring to both trust and security in general as well as presenting specific concepts for enhancing trust in the digital society Session on inter organisational transactions covering papers related to auditing of inter organizational trade procedures cross organizational workflow and transactions in Business to Business platforms Session on virtual enterprises encompassing papers describing innovative approaches for creating virtual

enterprises as well as describing examples of virtual enterprises in specific industries Session on online communities containing three papers which provide case studies of specific online communities and various concepts on how companies can build and harness the potential of online communities Sessions on strategies and business models with papers describing specific business models as well as general overviews of specific approaches for E Strategy formulation

Digital Business Models Bernd W. Wirtz, 2019-04-02 The spread of the Internet into all areas of business activities has put a particular focus on business models The digitalization of business processes is the driver of changes in company strategies and management practices alike This textbook provides a structured and conceptual approach allowing students and other readers to understand the commonalities and specifics of the respective business models The book begins with an overview of the business model concept in general by presenting the development of business models analyzing definitions of business models and discussing the significance of the success of business model management In turn Chapter 2 offers insights into and explanations of the business model concept and provides the underlying approaches and ideas behind business models Building on these foundations Chapter 3 outlines the fundamental aspects of the digital economy In the following chapters the book examines various core models in the business to consumer B2C context The chapters follow a 4 C approach that divides the digital B2C businesses into models focusing on content commerce context and connection Each chapter describes one of the four models and provides information on the respective business model types the value chain core assets and competencies as well as a case study Based on the example of Google Chapter 8 merges these approaches and describes the development of a hybrid digital business model Chapter 9 is dedicated to business to business B2B digital business models It shows how companies focus on business solutions such as online provision of sourcing sales supportive collaboration and broker services Chapter 10 shares insight into the innovation aspect of digital business models presenting structures and processes of digital business model innovation The book is rounded out by a comprehensive case study on Google Alphabet that combines all aspects of digital business models Conceived as a textbook for students in advanced undergraduate courses the book will also be useful for professionals and practitioners involved in business model innovation and applied researchers
