*How to Say I Love You Out Loud* Karole Cozzo, 2015-08-04 When Jordyn Michaelson s autistic brother joins her at her elite school she s determined not to let anyone know they re related Even if that means closing herself off to all her closest friends including charming football stud Alex Colby But despite her best intentions she just can t shake the memory of kissing Alex last summer and the desire to do it again Can Jordyn find the courage to tell Alex how she really feels and the truth

about her family before he slips away forever      Go Be a Writer! Candace R. Kuby, Tara Gutshall Rucker, 2016-04-15 This book provides an introduction to poststructural and posthumanist theories in order to imagine new possibilities for expanding literacy education. The authors put to work these theories in the context of an elementary school classroom examining literacy based activities that occur as students participate with materials in a multimedia writers studio. Focusing on literacy processes, the book emphasizes the fluid and sometimes unintentional ways multimodal artifacts come into being through intra actions with human and nonhuman materials. Because these theories emphasize the unplanned nonlinear aspects of literacy, the authors demonstrate an approach to literacy that works against the grain of standardization and rigid curricular models. Go Be a Writer reveals that when educators appreciate the value of unscripted intra actions, they allow for more authentic learning.

**Virtual Training** Jeb Blount, 2021-06-09 Remote learning has been around since the 18th century. Caleb Phillips began advertising correspondence courses in the Boston Gazette in 1728, allowing people for the first time to learn new skills no matter where they lived. For the past 300 years, virtual training in its various formats has been meandering into shore on an inevitable yet slow building tide. And then just like that, everything changed. A global pandemic. Social distancing. Working from home. In an instant, the tide became a tsunami. The global pandemic accelerated the broad adoption of virtual instructor led training along with awareness that classroom based training is often expensive, inefficient, and fails to deliver a fair return on investment. While it is certainly more challenging to re-create the collaborative environment of the physical classroom in a virtual setting, virtual training combines the structure, accountability, and social learning benefits of classroom training with speed, agility, and significant cost savings. Simply put, virtual training enables organizations to rapidly upskill more people while generating a far higher return on the training investment. Virtual training is also green. Studies indicate that virtual training consumes nearly 90% less energy and produces 85% fewer CO2 emissions than classroom training. Still, the biggest challenge with virtual training, and the reason there has been so much resistance to it, is historically the experience has been excruciating. Not the quality of the curriculum or content. Not the talent of the trainer. The learning experience. There are few people who haven't had the pleasure of sitting through agonizing virtual training sessions. Death by voice over PowerPoint delivered by a disengaged instructor has an especially bitter flavor. It is the way virtual training is delivered that matters most. When the virtual learning experience is emotionally positive, participants are more engaged, embrace new competencies, and knowledge sticks. Participants are more likely to show up to class and be open to future virtual training. Trainers enjoy their work and gain fulfillment from making an impact. Leaders book more virtual training. Organizations more readily blend and integrate virtual training into learning development initiatives. This is exactly what this book is about. Virtual Training is the definitive guide to delivering virtual training that engages learners and makes new skills and behavioral changes stick. Jeb Blount, one of the most celebrated trainers and authors of our generation, walks you step by step through the seven elements of effective engaging virtual learning experiences: Trainer Mindset

Emotional Discipline Production Technology Media Visuals Virtual Curriculum Instructional Design Planning Preparation Virtual Communication Skills Dynamic Interactive Training Delivery As you dive into these powerful insights and with each new chapter you ll gain greater and greater confidence in your ability to effectively deliver training in a virtual classroom Once you master virtual training delivery and experience the power of remote learning you may never want to go back to the physical classroom again **Handbook of Research on Mobile Technology, Constructivism, and Meaningful Learning**
