

**Abstract:** The authors examined the effects of a 12-week, 100% body weight (BW) resistance training program on the body composition and muscle strength of 10 sedentary, middle-aged women. The women were randomly assigned to either a control group (CON) or a resistance training group (RT). The RT group performed a 100% BW resistance training program three times per week for 12 weeks. The CON group did not exercise. The RT group showed significant increases in muscle strength and body composition compared to the CON group. The RT group showed significant increases in muscle strength and body composition compared to the CON group.

However, busy clinicians are constantly bombarded with new knowledge for an infinite number of medical conditions. It becomes a challenge for them to tease out the important information that will help guide them through the care of the patient they have right before them. This handbook was thus conceptualized with both the busy clinician and the stroke patient needing urgent treatment in mind. By providing only essential information in a standard and user-friendly layout, it assists clinicians in making real-time decisions quickly and effectively with actual step-by-step guides on specific issues relevant to the care of stroke patients. The use of this practical handbook is instinctive with the topics arranged in chronological order, simulating the actual clinical scenario from a prehospital setting, consultation in the emergency room, admission to the hospital, to secondary prevention in the clinic. With contributions from over 30 stroke experts in Southeast Asia, this handbook is widely applicable in different medical settings and will certainly appeal to stroke specialists, general practitioners, nurses, paramedics, and medical students alike.     **Intel Xeon Phi Coprocessor Architecture and Tools** Rezaur Rahman, 2013-09-26 Intel Xeon Phi™ Coprocessor Architecture and Tools: The Guide for Application Developers provides developers a comprehensive introduction and in-depth look at the Intel Xeon Phi coprocessor architecture and the corresponding parallel data structure tools and algorithms used in the various technical computing applications for which it is suitable. It also examines the source code level optimizations that can be performed to exploit the powerful features of the processor. Xeon Phi is at the heart of the world's fastest commercial supercomputer, which thanks to the massively parallel computing capabilities of Intel Xeon Phi processors coupled with Xeon Phi coprocessors, attained 33.86 teraflops of benchmark performance in 2013. Extracting such stellar performance in real-world applications requires a sophisticated understanding of the complex interaction among hardware components, Xeon Phi cores, and the applications running on them. In this book, Rezaur Rahman, an Intel leader in the development of the Xeon Phi coprocessor and the optimization of its applications, presents and details all the features of Xeon Phi core design that are relevant to the practice of application developers, such as its vector units, hardware multithreading, cache hierarchy, and host-to-coprocessor communication channels. Building on this foundation, he shows developers how to solve real-world technical computing problems by selecting, deploying, and optimizing the available algorithms and data structure alternatives, matching Xeon Phi's hardware characteristics. From Rahman's practical descriptions and extensive code examples, the reader will gain a working knowledge of the Xeon Phi vector instruction set and the Xeon Phi microarchitecture, whereby cores execute 512-bit instruction streams in parallel.     *Nurses' Guide to Children's Eyes* Andrea Kovalesky, 1985     **Working with Families: A Guide for Health and Human Services Professionals, Second Edition** Patricia Spindel, 2020-04-28 In its second edition, this accessible health and human services manual offers a critical overview of the issues and challenges that families face and provides practical strategies for promoting resilience and positive family functioning.
