Constructed Responses for Learning Warren Combs, 2016-02-05 Teaching students to write constructed responses does not have to become a test prep chore. An intentional routine of constructed responses provides powerful opportunities to teach strategic thinking through writing that also deepens students' knowledge about core subjects. In this clear guide from education consultant Warren Combs, you will learn how and why to teach students to write these short essays no matter what subject or grade level you teach. Special features: Writing prompts that are based on Webb's Depth of Knowledge (DOK) and provide practice for students at all skill levels; Practical strategies to build critical thinking and improve students' writing, including sentence stems, acrostics, framed stories, analogies, and quad clusters; Student self-assessment guidelines and rigorous peer response strategies; An interactive log to help you manage best practices and keep students engaged; Reading/Writing Modules to help you review and implement the instructional practices and strategies; Sample student work at different levels with analysis. Throughout the book, you will find handy tools such as rubrics, logs, and checklists. These tools are also available as free eResources on our website www.routledge.com/9781138931046 so you can download and print them for immediate use.

The Big6 Curriculum Michael B. Eisenberg, Janet Murray, Colet Bartow, 2016-05-26 This practical hands-on book explains how to ensure that your students are information and communication technology literate—that is, competent with a range of tools, technologies, and techniques for seeking out and applying information. The importance of teaching information and communication technology (ICT) literacy is clear: without it, students will be ill-equipped to find and use information in all its forms, as well as produce and present information in all forms. Unfortunately, most ICT literacy educational programs are irregular, incomplete, or arbitrary. Classroom teachers, teacher librarians, and technology teachers need a complete ICT program—one with clearly defined goals and objectives, planned and coordinated instruction, regular and objective assessment of learning, and formal reporting of results. This book explains how to integrate the objectives of ICT literacy into your school's established curricular structure. The book explains the rationale for having a comprehensive ICT program, describes how to develop a Big6 by the Month program, and defines the challenges in the areas of information seeking, strategies, location, and access; use of information; synthesis and evaluation. It also includes templates for grade-level objectives, a scenario plan, program plan, lesson plan, and unit plan summary; evidence and criteria; performance descriptors; a presentation readiness checklist; and Big6 by the Month checklists for instructional leaders, teachers, and teacher librarians.
