*When Teaching Writing Gets Tough* Annamary Consalvo, Ann D. David, 2024. Writing instruction is a particular challenge because there is no singular linear solution to teaching students to write well. This book approaches writing as a wicked problem that takes place in complicated contexts. Through both scholarly research and teacher reflection, it examines ELA classrooms and the experiences of writing teachers to identify approaches that have proven effective with adolescents. The book uses wickedness to frame the problems of teaching writing and offers context-specific solutions enacted by teachers. While it addresses the realities of standardized ways of teaching and assessing writing, the book also highlights the deep professional knowledge and practical strategies teachers bring to writing instruction in middle and high school classrooms. Chapters grapple with tensions between testing and authenticity, assessing writing in nuanced ways, and finding enjoyment in the work of teaching writing amid and alongside persistent complexities. Specific topics include students' writing process, revision, students as decision makers, multimodal writing, assessment, and writer's notebooks. Data-driven instruction, the high school to college transition, and teacher professional development. **Book Features:** Includes examples of how teachers approach specific challenges associated with teaching writing to adolescents; analyzing how and why their solutions proved effective. Focuses on students engaged in writing in classrooms; teachers implementing writing strategies and professional learning. Offers a range of relevant voices on the topic of writing instruction with authors that include classroom teachers and scholars. The Testing Trap George Hillocks, 2002-04-12. Do statewide assessments really do what they are supposed to do? Through interviews with over three hundred teachers and administrators, Hillocks examines whether state writing tests in Illinois, Kentucky, Oregon, New York, and Texas actually improve students' ability to express their thinking in writing. Ultimately, Hillocks argues that the majority of existing tests actually have a harmful effect on the way students are taught to write. In addition to providing analyses of assessments that do not encourage good writing, *The Testing Trap* contrasts them to those that do. Concluding with practical procedures for examining and evaluating writing assessments, this book is a provocative

and essential read for administrators teachers policymakers parents and all who care about the education of our children

**Fostering Children's Mathematical Power** Arthur Baroody, Arthur J. Baroody, Jesse L.M. Wilkins, Ronald T. Coslick, 1998-09-01 Teachers have the responsibility of helping all of their students construct the disposition and knowledge needed to live successfully in a complex and rapidly changing world To meet the challenges of the 21st century students will especially need mathematical power a positive disposition toward mathematics curiosity and self confidence facility with the processes of mathematical inquiry problem solving reasoning and communicating and well connected mathematical knowledge an understanding of mathematical concepts procedures and formulas This guide seeks to help teachers achieve the capability to foster children s mathematical power the ability to excite them about mathematics help them see that it makes sense and enable them to harness its might for solving everyday and extraordinary problems The investigative approach attempts to foster mathematical power by making mathematics instruction process based understandable or relevant to the everyday life of students Past efforts to reform mathematics instruction have focused on only one or two of these aims whereas the investigative approach accomplishes all three By teaching content in a purposeful context an inquiry based fashion and a meaningful manner this approach promotes children s mathematical learning in an interesting thought provoking and comprehensible way This teaching guide is designed to help teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach happen in the classroom It not only dispenses information but also serves as a catalyst for exploring conjecturing about discussing and contemplating the teaching and learning of mathematics

**The Mathematics Program Improvement Review** Ron Pelfrey, 2006 How good is your school s mathematics program Test scores can provide some general trend information but what you and your students parents really need are specifics about the quality of the curriculum the effectiveness of the instruction and the school s overall capacity to support mathematics learning The Mathematics Program Improvement Review MPIR is a proven evaluation process focused on standards for high quality mathematics programs in grades K 12 Based on research into effective program evaluation methods the MPIR approach uses multiple data sources to clarify exactly what is working within an individual school s math program and what is not Author and MPIR developer Ron Pelfrey has used this process to evaluate mathematics programs in more than 300 rural urban and suburban schools and has trained hundreds of educators to conduct reviews Now this handbook makes the MPIR process and its benefits available to everyone Inside you ll find guidelines for training review team members and all the materials needed to conduct a review including Lists of standards and indicators for the 10 essential components of an effective mathematics program Templates for questionnaires interviews and classroom observations Detailed evaluation rubrics Forms for compiling ratings and generating a final report Whether used as a basis for informal faculty or departmental discussion to promote best practices in a particular area such as curriculum or instruction or to guide a formal program evaluation this book will help any school or district apply MPIR tools and procedures
