Challenging Dominant Forms of Supervision,*
by John Smyth. Philadelphia, PA:
Open University Press, 1991, 137 pp.**

Reviewed by: DAVID D. WILLIAMS

The seventh in a series edited by Christopher Day titled "Developing Teachers and Teaching", this book is an invitation to teachers to take greater control of their own teaching and professional development by collaborating with other educators to describe, interpret, and revise their work—an alternative view of teacher evaluation. Smyth critiques various practiced versions of a common notion of teacher evaluation—clinical supervision, claiming this approach is often used by administrators as a technical and psychological means of controlling teachers. In contrast, he "argues the need to move from close surveillance of teachers to teacher-initiated critical inquiry" (p. 1).

In Chapter One, Smyth documents the foundation of clinical supervision on principles of scientific management and argues that the assumptions associated with that outmoded view of teachers has been de-humanizing.

In Chapter Two, he notes that supervision as many experience it "is suffering from a legacy of being affiliated with an outmoded interpretation of science and technology" (p. 20). He argues that this form of evaluation has been "social engineering in the guise of neutral science [which] no longer suffices."

In Chapter Three, Smyth critiques the widespread adoption of the Madeline Hunter "teaching/supervision model" of clinical supervision and claims that schools' uses of this approach have ignored and silenced teachers in attempts to reform education.

In Chapter Four, he suggests that teacher supervision was originally meant to be a very different activity than it has become. Smyth invites the reader to consider "shift[ing] supervision from its current oppressive managerial preoccupation with accountability, quality control, efficiency, effectiveness, and sanction-ridden forms of surveillance" and to "embrace more robust possibilities that question the presumed supremacy of the

Teachers As Collaborative Learners Challenging Dominant Forms Of Supervision:

Teachers as Collaborative Learners John Smyth,1991 A critique of prescriptive educational reforms which have produced alienation demoralization and fragmentation among teachers and schools in Western industrial societies The author argues that teachers should be given control over their own teaching and their own development as professionals

Rethinking Instructional Supervision Duncan Waite,2004-06-02 Published in the year 19595 Rethinking Instructional Supervision is a valuable contribution to the field of Education

Standards for Instructional Supervision Steven Gordon,2020-03-25 The standards in this book will enhance teaching and learning The list of the book s contributors reads like a Who s Who in the field of instructional supervision These standards are practical specific and flexible so that schools and districts can adapt them to their own contexts and goals Each set also includes activities for professional development

Critical Pedagogy for Social Justice John Smyth,2011-10-20 We live in a time when those who wield unrestrained power believe they have the inalienable right to determine the destiny nature and shape of social institutions like schools Critical Pedagogy for Social Justice challenges this arrogance by showing how teachers students parents communities and researchers can develop narratives that amount to working with and for those who are increasingly being silenced marginalized and excluded John Smyth sets out to revisit critical pedagogy from a number of key leverage points The overarching aim of this book is to unmask the deforming and distorting way power operates while at the same time revealing how a commitment to a more socially just world can exist in the everyday lives and narratives of people who have a passion for transformative possibilities His clear concise and persuasive book is ideal for those who are dissatisfied with the current turn in education and who are seeking an alternative set of views that emerge from the grounded experiences and practices ion schools struggling with the most disadvantaged circumstances

Paradigm Debates in Curriculum and Supervision Linda Behar-Horenstein,Jeffrey Glanz,2000-01-30 Paradigm debates in the educational research community are a frequent if not common occurrence How do paradigm debates in other educational fields such as curriculum and supervision shape educators understanding and practice In this volume it is suggested that educators adherence to particular views of curriculum and supervision is influential in guiding their beliefs and subsequent actions For example a widely accepted belief is that if an individual adopts a mechanistic view of the curriculum then s he is likely to deliver a curriculum grounded in pre established objectives and evaluate student achievement in relationship to formulated objectives Postmodernists contend that such educators are bound by rigid bifurcation and a constrictive linear logic In supervision educational leaders who favor leadership styles comprised by autocratic behaviors tend to create school climates that favor a top down approach to human relationships Autocratic leaders rely on hierarchical organizational structures and styles that seek to instill compliance and subordination Yet prospective administrators who want concrete proposals put in practice find

modern perspectives of supervision helpful In contrast postmodern supervisors allege that such leaders disallow the emergence of relevant and authentic relationships that might occur when conventional hierarchical structures are diminished and open lines of communication between teachers students administrators become normative The chapters in this book present an in depth analysis of how an individual s predisposition towards modern and postmodern views of curriculum and supervision are likely to influence 1 curriculum development 2 teaching styles 3 leadership styles 4 teacher and student evaluation and 5 the missions intrinsic to the creation of professional preparation programs that serve to promulgate existing practice or create a new order of teachers and administrator

The Practice and Theory of School Improvement David Hopkins,2008-05-13 ANDY HARGREAVES Department of Teacher Education Curriculum and Instruction Lynch School of Education Boston College MA U S A ANN LIEBERMAN Carnegie Foundation for the Advancement of Teaching Stanford CA U S A MICHAEL FULLAN Ontario Institute for Studies in Education University of Toronto Canada DAVID HOPKINS Department for Education and Skills London U K This set of four volumes on Educational Change brings together evidence and insights on educational change issues from leading writers and researchers in the field from across the world Many of these writers whose chapters have been specially written for these books have been investigating helping initiate and implementing educational change for most or all of their lengthy careers Others are working on the cutting edge of theory and practice in educational change taking the field in new or even more challenging directions And some are more skeptical about the literature of educational change and the assumptions on which it rests They help us to approach projects of understanding or initiating educational change more deeply reflectively and realistically Educational change and reform have rarely had so much prominence within public policy in so many different places Educational change is ubiquitous It figures large in Presidential and Prime Ministerial speeches It is at or near the top of many National policy agendas Everywhere educational change is not only a policy priority but also major public news Yet action to bring about educational change usually exceeds people s understanding of how to do so effectively
