Giving Teaching Back to Teachers Robin Barrow,2015-06-03 This book first published in 1984 aims to bring together the interests of the theory and practice of the education system and within the former relate the approaches and claims of the constituent disciplines to each other Throughout the book while arguing for the importance of facing up to the logical links between theory and practice the author seeks to point out the extent to which more educational theory has had little to say of importance for practice either because it has been a poor theory or because it has concerned itself with matters of little significance to educators This book will be of interest to students of education as well as educators themselves

Essentials of Teaching Reading Eugene Buren Sherman,Albert A. Reed,1906 *Models of Teaching* M.h.siddiqui,2009 , **Understanding and Teaching Reading** Emerald Dechant,2013-09-13 In the words of Aldous

Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher s understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching *Teaching Styles and Strategies* Harvey F. Silver, Farvey F. Silver, 1996
