► Summary

Teamcenter® Visualization Mockup software is the industry's most powerful real-time digital prototyping solution. By enabling your design teams to leverage advanced multi-CAD 3D visualization, large-scale product assembly analysis and universal collaboration capabilities in a single solution, Visualization Mockup dramatically reduces – and in some cases entirely eliminates – expensive physical prototypes. The solution also plays a crucial role in improving your total quality program and facilitating your time-to-market initiatives by enabling you to identify and resolve issues before they ever become issues in the first place.

Benefits

Reduces or eliminates physical prototypes using production-proven digital mockup capabilities to visualize and analyze lightweight and precise virtual prototypes.

Enables you to find and resolve form/function design issues early in the design process with sophisticated spatial analysis tools such as clearance and interference analysis.

Provides superior performance and rich-data support by leveraging open by design technology and standard JT™ format.

Features

- All Teamcenter Visualization Base, Standard, and Professional capabilities (presented in their entirety in their respective fact sheets)
- Motion playback that enables you to detect interferences dynamically
- Ability to visualize and navigate multi-CAD assemblies in JT format from major 3D CAD systems, including NX® software, NX I-deas® software, Solid Edge® software, AutoCAD, Catia, CAXIS, Inventor, Pro/Engineer and SolidWorks
- Neutral-file support, including ability to accept VRML and STL. STEP, IGES, and DXF are supported with associated optional JT translators

Taking advantage of the industry's leading digital prototyping solution

Teamcenter Visualization Mockup enables design teams to create high-level digital prototypes comprised of thousands of parts and components. Digital prototyping is an extremely cost effective alternative to physical prototyping that lets product makers realize enormous cost savings, productivity improvements and reductions in cycle times.

By leveraging Teamcenter Visualization Mockup, design teams can quickly build a high-level digital prototype, distribute the universally viewable prototype to widely dispersed team members, analyze its interrelated components, simulate the product's operations, enable team members to annotate their concerns and rapidly incorporate alternative design concepts.

Visualization Mockup's analysis and simulation capabilities make physical prototyping a remnant of the past. The solution's analysis capabilities enable you to check interferences, evaluate separation requirements, perform human factor studies, conduct parts in motion studies and determine whether sufficient accessibility is provided to facilitate maintenance procedures. Taken together, these capabilities allow you to detect and fix design errors long before you manufacture any parts.

The solution's digital prototyping capabilities are part of Teamcenter Visualization, the world's market-leading suite of product visualization solutions. With more market share than the next three competitive solutions combined, Teamcenter Visualization's core technology JT has become the industry standard for visualization, collaboration and interoperability.

Extended enterprise collaboration

Teamcenter Visualization is the world's most widely used visualization solution with more than 900,000 users on active maintenance. Based on this leading market presence, the vendors and allied partners who participate in your supply chain are more likely to be using Teamcenter Visualization
