Temples of Modernity Robert M. Geraci, 2018-08-15 *Temples of Modernity* uses ethnographic data to investigate the presence of religious ideas and practices in Indian science and engineering Geraci shows 1 how the integration of religion science and technology undergirds pre and post independence Indian nationalism 2 that traditional icons and rituals remain relevant in elite scientific communities and 3 that transhumanist ideas now percolate within Indian visions of science and technology This work identifies the intersection of religion science and technology as a

worldwide phenomenon and suggests that the study of such interactions should be enriched through attention to the real experiences of people across the globe *Rainbows End* Vernor Vinge, 2007-04-03 Four time Hugo Award winner Vernor Vinge has taken readers to the depths of space and into the far future in his bestselling novels *A Fire Upon the Deep* and *A Deepness in the Sky* Now he has written a science fiction thriller set in a place and time as exciting and strange as any far future world San Diego California 2025 Robert Gu is a recovering Alzheimer's patient The world that he remembers was much as we know it today Now as he regains his faculties through a cure developed during the years of his near fatal decline he discovers that the world has changed and so has his place in it He was a world renowned poet Now he is seventy five years old though by a medical miracle he looks much younger and he's starting over for the first time unsure of his poetic gifts Living with his son's family he has no choice but to learn how to cope with a new information age in which the virtual and the real are a seamless continuum layers of reality built on digital views seen by a single person or millions depending on your choice But the consensus reality of the digital world is available only if like his thirteen year old granddaughter Miri you know how to wear your wireless access through nodes designed into smart clothes and to see the digital context through smart contact lenses With knowledge comes risk When Robert begins to re train at Fairmont High learning with other older people what is second nature to Miri and other teens at school he unwittingly becomes part of a wide ranging conspiracy to use technology as a tool for world domination In a world where every computer chip has Homeland Security built in this conspiracy is something that baffles even the most sophisticated security analysts including Robert's son and daughter in law two top people in the U S military And even Miri in her attempts to protect her grandfather may be entangled in the plot As Robert becomes more deeply involved in conspiracy he is shocked to learn of a radical change planned for the UCSD Geisel Library all the books there and worldwide would cease to physically exist He and his fellow re trainees feel compelled to join protests against the change With forces around the world converging on San Diego both the conspiracy and the protest climax in a spectacular moment as unique and satisfying as it is unexpected This is science fiction at its very best by a master storyteller at his peak At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied

Apocalyptic AI: Visions of Heaven in Robotics, Artificial Intelligence, and Virtual Reality Robert M. Geraci, 2010-02-05 Apocalyptic AI the hope that we might one day upload our minds into machines or cyberspace and live forever is a surprisingly wide spread and influential idea affecting everything from the world view of online gamers to government research funding and philosophical thought In *Apocalyptic AI* Robert Geraci offers the first serious account of this cyber theology and the people who promote it Drawing on interviews with roboticists and AI researchers and with devotees of the online game *Second Life* among others Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity In both systems the believer is trapped in a dualistic universe and expects a resolution

in which he or she will be translated to a transcendent new world and live forever in a glorified new body Equally important Geraci shows how this worldview shapes our culture Apocalyptic AI has become a powerful force in modern culture In this superb volume he shines a light on this belief system revealing what it is and how it is changing society **Postmodern**

Metanarratives Décio Torres Cruz,2014-07-29 Postmodern Metanarratives investigates the relationship between cinema and literature by analyzing the film Blade Runner as a postmodern work that constitutes a landmark of cyberpunk narrative and establishes a link between tradition and the post modern **The Peace War** Vernor Vinge,2007-04-01 First in a

quintessential hard science fiction adventure Hugo Award winning author Vernor Vinge s The Peace War follows a scientist determined to put an end to the militarization of his greatest invention and of the government behind it The Peace Authority conquered the world with a weapon that never should have been a weapon the bobble a spherical force field impenetrable by any force known to mankind Encasing governmental installations and military bases in bobbles the Authority becomes virtually omnipotent But they ve never caught Paul Hoehler the maverick who invented the technology and who has been working quietly for decades to develop a way to defeat the Authority With the help of an underground network of determined independent scientists and a teenager who may be the apprentice genius he s needed for so long he will shake the world At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied **Futures of**

Artificial Intelligence Robert M Geraci,2022-01-12 Twenty first century life is increasingly governed by artificial intelligence AI technologies such as machine learning big data analysis facial recognition and robotics For decades an ideology of apocalyptic progress and cosmic transformation has accompanied the advancement of AI in the United States that vision is intimately connected to transhumanism the idea that humanity can transcend its limits even mortality using technology Based on contributions from science and science fiction advocates of such apocalyptic AI suggest that the world will soon see godlike machine intelligence and that human beings will upload their minds into immortal machine bodies The arrival of this ideology in India raises questions about how global cultures can contribute to AI technology and our beliefs about AI These beliefs have gained a foothold in Indian visions of AI but they have not been accepted uncritically rather Indian scientists and futurists revise the transhumanist vision and illustrate how traditional Hindu values can add to the global perspective By describing the arrival and reconfiguration of transhumanist ideas in India this book reveals how the nexus of religion and technology contributes to public life and our modern self understanding while suggesting that the apocalyptic approach to AI should be tempered by other visions By tracing the movement of apocalyptic AI into India and exploring Indian efforts to redefine those transhumanist aspirations Futures of Artificial Intelligence opens the door for rethinking our global approach to AI and advocates for technologies and visions of technology that advance human flourishing
