Access to Justice in Rural Communities Daniel Newman, Faith Gordon, 2023-05-04 This book offers insight on access to justice from rural areas in internationally comparable contexts to highlight the diversity of experiences within and across rural areas globally. It looks at the fundamental questions for people's lives raised by the issue of access to justice as well as the rule of law. It highlights a range of social, geographic and cultural issues which impact the way rural communities experience the justice system throughout the world with chapters on Australia, Canada, England, Ireland, Kenya, Northern Ireland, South Africa, Syria, Turkey, the USA and Wales. Each chapter explores three questions: 1. How do people experience the institutions of justice in rural areas and how does this rural experience differ to an urban experience? 2. What impact have changes in policy had on the justice system in rural areas and have rural and urban areas been affected in different ways? 3. What impact does the law have on people's lives in rural areas and what would rural communities like to be better understood about their experience of the justice system? By bringing in the voices and experiences of those who are often ignored or sidelined by justice systems, this book will set out an agenda for ensuring social justice in legal systems with a focus on protecting marginalised groups. Manyane Makua, Mariam Akinlolu, Mashango Sithole, Phiwayinkosi Gumede, Cebo Nyondo, 2023-02-08 This is an open access book. It is a common cause globally that the abrupt emergence of Covid-19 wreaked havoc in all sectors including the higher education system. The sudden closure of campuses as a social distancing measure to prevent community transmission has shifted face-to-face classes to online teaching and learning, a transformative experiment for academics and students in most institutions. This has thrown the focus on utilising Learning Management Systems (LMS), eLearning tools and platforms for effective student engagement, which may have limitations of accessibility and affordability for many students. The pandemic has exposed the shortcomings of the current higher education system and the need for more training of academics and practitioners in digital technology to adapt to the rapidly changing educational climate. In the post-pandemic situation, eLearning and virtual education may become an integral part of the higher education system; hence the question of re-inventing higher education. The higher education institutions and universities need to plan the post-pandemic education and research strategies to ensure student learning outcomes and standards of educational quality. With the move to online teaching and learning, subsequently traditional assessments followed and were adapted and adopted for online assessment. Assessments lie at the heart of the teaching process. It shapes students' understanding of the curriculum and determines their ability to progress. Reflections on assessments during Covid-19 abounded with the challenges that both academics and students faced regarding online assessments, including cheating and quality assurance issues. The focus on quality extended to the quality of teaching and learning in general. Moreover, the pandemic brought about the question of staff and student health and psychosocial support, also becoming important. For academics, the abrupt shift to adapt to working from home and implementing online

learning has led to over work low work life balance and compromised mental health With a view on constructive and futuristic discourse the sub themes of the 2022 Focus conference encapsulate the current realities in the higher education sector and beyond It further provides opportunities for an in depth analysis based on the benefit of hindsight and foresight The Organising Committee specifically coined the theme Re inventing higher education Insights trends and lessons learnt from specifically for the conference to reflect on and address the matters mentioned earlier Academics scholars and practitioners in the higher education sector are called upon to share their research and express their perspectives on the reinvention of higher education
