

Tuck Everlasting Answers : Prologue - Chapter 11

Study Guide Answers

Prologue

1. The author describes this time of summer by using the analogy of being at the top of a Ferris wheel. After reading her description, create some of your own analogies to describe this time of summer.

Answers will vary but students could mention such things as: a roller coaster, the pendulum on a grandfather clock, a child on a swing or a diver in mid-dive.

2. Who sets out at dawn?

Mae Tuck sets out on her horse at dawn headed for the wood near Treegap.

3. Who was Winnie Foster?

Winnie Foster was a young girl who lived next to Treegap wood which was owned by her parents. She was growing impatient and thinking about running away.

4. Who appeared at Foster's gate at sunset? A stranger who was looking for someone, appeared at Foster's Gate at sunset

5. Explain in your own words what the author meant when she described the woods as the center of the wheel--the hub?

She meant that this was the focal point of the story, the common connection between the three characters introduced in the prologue and the place where they would all be drawn together.

6. List some synonyms and antonyms for the word everlasting.

Synonyms could include forever, infinity, and eternity while some antonyms might be short-lived, ephemeral, temporary and transitory.

Ready-to-use worksheets are ideal for summer review. **Connecting Science and Engineering Education Practices in Meaningful Ways** Leonard A. Annetta, James Minogue, 2016-03-02. The need for a scientifically literate citizenry, one that is able to think critically and engage productively in the engineering design process, has never been greater. By raising engineering design to the same level as scientific inquiry, the Next Generation Science Standards (NGSS) have signaled their commitment to the integration of engineering design into the fabric of science education. This call has raised many critical questions: How well do these new standards represent what actually engineers do? Where do the deep connections among science and engineering practices lie? To what extent can or even should science and engineering practices co-exist in formal and informal educational spaces? Which of the core science concepts are best to leverage in the pursuit of coherent and compelling integration of engineering practices? What science important content may be pushed aside? This book tackles many of these tough questions head-on. All of the contributing authors consider the same core question: Given the rapidly changing landscape of science education, including the elevated status of engineering design,

what are the best approaches to the effective integration of the science and engineering practices They answered with rich descriptions of pioneering approaches critical insights and useful practical examples of how embodying a culture of interdisciplinarity and innovation can fuel the development of a scientifically literate citizenry This collection of work builds traversable bridges across diverse research communities and begins to break down long standing disciplinary silos that have historically often hamstrung well meaning efforts to bring research and practice from science and engineering together in meaningful and lasting ways
