

FIRST ON FOUR WHEELS

Suzuki has been an innovator in engineering since Michio Suzuki created the company in 1909. But it was the early 1980s that saw Suzuki launch into the ATV market, with the creation of the first ever four-wheel ATV in 1983, sparking a movement away from controversial three-wheelers and leading the way for the industry. Always committed to innovation, and attentive to the needs and desires of riders, Suzuki has had a series of important firsts in the ATV market.

1983 QUADRUNNER

Suzuki brought the first four-wheeled ATV to the sport with the release of the 1983 QuadRunner 125, 4 x 6. This original quad, with the designation LT125, positively surprised riders and dealers not only with its well-planted four-wheel chassis, but it featured an automatic clutch with five forward speeds plus reverse. The "4" in the sub-name stood for the four wheels, while the "16" represented the six speed transmission.

1983 QuadRunner 125

1987 QUADRUNNER

1987 QuadRunner 4WD

With the announcement of the 1987 QuadRunner 4WD (LT4WD) Suzuki innovation now provided riders with terrain conquering capability never before available from an ATV. This four-wheeler, as its designation implied, had four-wheel drive. And that drive system allowed the rider to select 2WD or 4WD modes, plus it offered a front differential lock so the QuadRunner 4WD could crawl out of just about any situation. The rider could also route the power from the 246cc/3 four-stroke engine through a sub-transmission that had both high and low ratios so the ATV was great on tight trails but could also get you quickly out to work on the far side of the ranch. Additionally, the QuadRunner 4WD was designed with an engine configuration and fuel tank location that resulted in a comfortable and low seat height. The path forward to the KINGQUAD legacy was becoming clear.
