

WHERE IS IT? DESCRIBING POSITIONS IN SPACE

Imagine you see something cool in the night sky and want to call up your friend to tell them to go see it. How would you describe to them where to look? Two questions must be answered here:

1. WHAT DIRECTION IS IT IN?

Can be answered using _____ (the compass directions). North is _____ and you go clockwise from there (making east _____, south _____, and west _____).

Pay attention to which "side" is labeled as which direction. They won't always be oriented the same way!

WHAT IS THE
AZIMUTH OF THIS
STAR?

2. HOW HIGH IN THE SKY IS IT?

Can be answered using _____, which ranges from _____ at the horizon to _____ straight overhead (also called the _____).

RELATES TO ALTITUDE!

HOWEVER, WE HAVE A LIMITATION HERE!!

WHAT IS THE
ALTITUDE OF THIS
STAR?

WARNING: what if the star isn't along the plane of our "dome", like in our first (azimuth) example? We have a limitation here because we are trying to depict a 3D scenario on 2D paper. If you moved the star in that example up to the zenith, you can imagine how the angle would appear to be larger than 90° which we know cannot be true.

You cannot measure a "3D angle" on a "2D diagram", so in these scenarios, you will only be asked to **ESTIMATE** the angle. You will only be asked to **MEASURE** the angle (with a protractor) in scenarios where the star falls along our dome.

!!

EXAMPLES: Azimuth can always be an estimate. Altitude will be an estimate as well **UNLESS** it's on the dome, then it should be a measurement with a protractor.

DIAGRAM	ALTITUDE	AZIMUTH	DIAGRAM	ALTITUDE	AZIMUTH

AZIMUTH & ALTITUDE PRACTICE ☆

Find the azimuth and altitude for each of the following eight diagrams. Only use measurements (a protractor) where necessary.

AZIMUTH: _____	AZIMUTH: _____	AZIMUTH: _____
ALTITUDE: _____	ALTITUDE: _____	ALTITUDE: _____
AZIMUTH: _____	AZIMUTH: _____	AZIMUTH: _____
ALTITUDE: _____	ALTITUDE: _____	ALTITUDE: _____

is wrong with this diagram is wrong.

If a star is at the zenith, explain why no azimuth is needed.

NOT KNOWN

Why can we only estimate the altitude for most of our diagrams?

A student comes up with the following answer given this diagram. What did they do wrong? Don't just state the correct answer, explain their mistake(s).

AZIMUTH: 20°
ALTITUDE: 30°

Ste High Altitude Worksheet
