The History of Geophysics in Southern Africa Johan de Beer, 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century. However its phenomena like earthquakes, tsunamis, volcanic eruptions and lightning had been objects of fear, curiosity and speculation since ancient times. In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488. This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history. The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa.

The Struggle for Teacher Education Tom Are Trippestad, Anja Swennen, Tobias Werler, 2017-04-20 Reform of teacher education is en vogue worldwide today due to the widespread belief that teacher education has the power to change traditional modes of schooling, educating new teachers who will be capable of improving the knowledge standard of children and boost the economic power of nations. The Struggle for Teacher Education brings together conceptual, comparative and empirical studies from Australia, England, Finland, The Netherlands, Norway, South Africa and South America to explore the ways in which professional education has been positioned in a reactive mode. The contributors discuss how teacher education is a contested division in higher education and look at how current reform efforts may limit the potential and work of teacher education, highlighting why this point needs more attention. Moreover, the collection reveals how teacher education's authorship on teacher professionalism may be weakened or strengthened by current reform drives and offers alternative models on how to rethink reforming teacher education.

Education as the Driving Force of Equity for the Marginalized Boivin, Jacquelynne Anne, Pacheco-Guffrey, Heather, 2022-01-14 In the USA, racism is the most widespread root of oppression. Black people in America specifically have suffered from centuries of discrimination and still struggle to receive the same privileges as their white peers. In other countries, however, there are other groups that face similar struggles. Discrimination and oppression based on religion, ethnicity, socio-economic status, political affiliation and caste are just a few categories. However, education is a root for widespread societal change, making it essential that educators and systems of education enact the changes that need to occur to achieve equity for the groups being oppressed. Education as the Driving Force of Equity for the Marginalized highlights international research from the past decade about the role education is playing in the disruption and dismantling of perpetuated systems of oppression. This research presents the context, ideas and mechanics behind impactful efforts to dismantle systems of oppression. Covering topics such as teacher preparation, gender inequality and social justice, this work is essential for teachers, policymakers, college students, education faculty, researchers, administrators, professors and academicians.

Democracy Disconnected Fiona Anciano, Laurence Piper, 2018-10-03 Why is dissatisfaction with local democracy endemic despite the spread of new

participatory institutions This book argues that a key reason is the limited power of elected local officials especially to produce the City City Hall lacks control over key aspects of city decision making especially under conditions of economic globalisation and rapid urbanisation in the urban South Demonstrated through case studies of daily politics in Hout Bay Democracy Disconnected shows how Cape Town residents engage local rule In the absence of democratic control urban rule in the Global South becomes a complex and contingent framework of multiple and multilevel forms of urban governance FUG that involve City Hall but are not directed by it Bureaucratic governance coexists alongside market developmental and informal forms of governance This disconnect of democracy from urban governance segregates people spatially socially but also politically Thus while the residents of Hout Bay may live next to each other they do not live with each other This book will be a valuable resource for students on programmes such as urban studies political science sociology development studies and political geography

Context, Plurality, and Truth Mika Vähäkangas, 2020-02-10 The world has shrunk in the processes of globalization and the old ways of actively ignoring plurality in theology are no longer viable Contextual differences between different Christian traditions and theologies are highly visible due to improved communications and migration These differences also witness that this plurality has existed since the very beginning of Christianity Religious studies demonstrate that no religion is pure and hermetically sealed from others but they all are syncretistic in the sense of giving and taking In the world of religions where boundaries

are porous and the internal plurality of Christianity is vast there is a temptation either to reject the plurality in a fideistic manner or succumb to relativism The first solution is intellectually hard to defend and relativism is often seen as detrimental to Christian identity This book proposes a way of recognizing the contextual and syncretistic dimensions of pluralism while not surrendering to relativism Christian identity and tradition can be affirmed while staying open to the challenges of pluralism
