Gleach, 2025 Recovering Ancestors in Anthropological Traditions focuses on individual scholars and national developments to build an understanding of a vital and diverse global discipline **A Culture of Improvement** Robert Friedel, 2010-02-26 How technological change in the West has been driven by the pursuit of improvement a history of technology from plows and printing presses to penicillin the atomic bomb and the computer Why does technology change over time how does it change and what difference does it make In this sweeping ambitious look at a thousand years of Western experience Robert Friedel argues that technological change comes largely through the pursuit of improvement the deep rooted belief that things could be done in a better way What Friedel calls the culture of improvement is manifested every day in the ways people carry out their tasks in life from tilling fields and raising children to waging war Improvements can be ephemeral or lasting and one person's improvement may not always be viewed as such by others Friedel stresses the social processes by which we define what improvements are and decide which improvements will last and which will not These processes he emphasizes have created both winners and losers in history Friedel presents a series of narratives of Western technology that begin in the eleventh century and stretch into the twenty first Familiar figures from the history of invention are joined by others the Italian preacher who described the first eyeglasses the dairywomen displaced from their control over cheesemaking and the

little known engineer who first suggested a grand tower to Gustav Eiffel Friedel traces technology from the plow and the printing press to the internal combustion engine the transistor and the space shuttle Friedel also reminds us that faith in improvement can sometimes have horrific consequences as improved weaponry makes warfare ever more deadly and the drive for improving human beings can lead to eugenics and even genocide The most comprehensive attempt to tell the story of Western technology in many years engagingly written and lavishly illustrated A Culture of Improvement documents the ways in which the drive for improvement has shaped our modern world

counterpart filling a gap left in the first edition And a concluding chapter by Richard Friend on a theory of successful gay aging summarizes much of the current thinking about this topic The true situation of the older homosexual male presented in Gay and Gray challenges preconceptions about what it means to be old and gay It asserts that in most ways older gay men are indistinguishable from other older people Because the book portrays older gay men in a realistic and sympathetic light it is therapeutic for the many gay men who have been burdened with society's negative and distorted views about them These men may compare their own lives to those of the respondents described in the book Gay and Gray offers younger gay men a rare glimpse into their futures and enlightens and comforts those who count older gay men among their family and friends The conclusions drawn in the book will change people's perspectives and offer new ways of thinking for and about older gay men Gay and Gray is filled with rich case histories and treats its subject with dignity and compassion Topics of focus include love relationships social and psychological adjustment gay community self acceptance being in the closet and coming out as a gay person intergenerational attitudes popular stereotypes As the first intensive interview and questionnaire study of gay men aged 40 and older in America Gay and Gray examines the lives of these men in light of cultural stereotypes Author Berger asks about the social lives of these men their involvement in both the heterosexual and homosexual communities their coming out experiences their attitudes about younger gays their experiences in growing older and their strategies for adapting to life's challenges In the study Berger reveals that contrary to stereotypic views most older gay men are well integrated into social networks and lead active and generally satisfying lives He found that few live alone most scored as well as younger gays on measures of psychological adjustment such as self acceptance many are open about their homosexuality with family friends and colleagues and the most well adjusted older gay men were integrated into a homosexual community associated with younger gay men and were unwilling to change their sexual orientation
