The referendum on separation for Scotland Great Britain: Parliament: House of Commons: Scottish Affairs Committee, 2012-05-08 This report considers whether the wording of the referendum question proposed by the Scottish Government is biased and what should be done to ensure that a fair and clear question is put to the Scottish electorate Based on the evidence it is concluded that the question Do you agree that Scotland should be an independent country is biased This is important because wording can affect the result of a referendum This referendum must be and be seen to be fair and acceptable to those on both sides of the argument It is essential that the result commands wide acceptance It is now widely agreed that the Electoral Commission is the appropriate body to regulate a referendum and ensure that the wording of the question is clear and fair This means an exhaustive process of testing of proposed words and how the options are put to the voters This will take some time and therefore it must be started soon It need not wait until a referendum Bill is drafted but debate needs to move on to the policies and issues of separation The best course is for the parties to agree jointly what question wordings should be put to the Commission If a consensus cannot be reached those parties who can agree should approach the Commission together Our objective is that all can accept the advice of the Commission on a clear and neutral question which can be incorporated into the legislative process from the very beginning Smarter Crime Control Irvin Waller, 2013-12-05 The U S is the world s biggest jailor and one of the most affluent murderous countries and yet its citizens pay more taxes to sustain law and order than their European counterparts Yet the U S has the most data in the world on the use of incarceration and its failure Its researchers have identified more projects able to prevent violence than the rest of the world put together Its legislators have access to pioneering data banks on cost effective ways to use taxes to reduce crime We are left wondering why we cannot implement measures that we know will work reduce crime and cost less for law and order Smarter Crime Control shows how to use recent knowledge and best practices to reduce the extraordinarily high rates of murder traffic fatalities drug overdoses and incarceration while avoiding the high taxes paid by families for policing and prisons Providing detailed examples Irvin Waller offers specific actions our leaders at all levels can take to reduce violence and lower costs to taxpayers He focuses on how to retool policing and improve corrections to reduce reoffending and crime while limiting criminal courts He also shows how programs and investments in various strategies can help those youth on the path to chronic offending avoid the path all together Waller shows how to get smart on crime to shift the criminal justice paradigm from the failing outdated racially biased and exorbitant complex today to an effective modern fair and lean system for safer communities that spares so many victims from the loss and pain of preventable violence He makes a compelling case for reinvesting what is currently misspent on reacting to crime into smart ways to prevent crime Ultimately he demonstrates to readers the importance of reevaluating our current system and putting into place proven strategies for crime and violence prevention that will keep people out of jail and make our streets and communities safer for everyone

Handbook Of Financial Econometrics, Mathematics, Statistics, And Machine Learning (In 4 Volumes) Cheng Few Lee, John C Lee, 2020-07-30 This four volume handbook covers important concepts and tools used in the fields of financial econometrics mathematics statistics and machine learning Econometric methods have been applied in asset pricing corporate finance international finance options and futures risk management and in stress testing for financial institutions This handbook discusses a variety of econometric methods including single equation multiple regression simultaneous equation regression and panel data analysis among others It also covers statistical distributions such as the binomial and log normal distributions in light of their applications to portfolio theory and asset management in addition to their use in research regarding options and futures contracts In both theory and methodology we need to rely upon mathematics which includes linear algebra geometry differential equations Stochastic differential equation Ito calculus optimization constrained optimization and others These forms of mathematics have been used to derive capital market line security market line capital asset pricing model option pricing model portfolio analysis and others In recent times an increased importance has been given to computer technology in financial research Different computer languages and programming techniques are important tools for empirical research in finance Hence simulation machine learning big data and financial payments are explored in this handbook Led by Distinguished Professor Cheng Few Lee from Rutgers University this multi volume work integrates theoretical methodological and practical issues based on his years of academic and industry experience

Contemporary Developments in Statistical Theory Soumendra Lahiri, Anton Schick, Ashis SenGupta, T.N. Sriram, 2013-12-02 This volume highlights Prof Hira Koul's achievements in many areas of Statistics including Asymptotic theory of statistical inference Robustness Weighted empirical processes and their applications Survival Analysis Nonlinear time series and Econometrics among others Chapters are all original papers that explore the frontiers of these areas and will assist researchers and graduate students working in Statistics Econometrics and related areas Prof Hira Koul was the first Ph D student of Prof Peter Bickel His distinguished career in Statistics includes the receipt of many prestigious awards including the Senior Humboldt award 1995 and dedicated service to the profession through editorial work for journals and through leadership roles in professional societies notably as the past president of the International Indian Statistical Association Prof Hira Koul has graduated close to 30 Ph D students and made several seminal contributions in about 125 innovative research papers The long list of his distinguished collaborators is represented by the contributors to this volume

Assessment in Mathematics Education Contexts Jonathan D. Bostic, Erin E. Krupa, Jeffrey C. Shih, 2019-05-13 This book aims to provide theoretical discussions of assessment development and implementation in mathematics education contexts as well as to offer readers discussions of assessment related to instruction and affective areas such as attitudes and beliefs By providing readers with theoretical implications of assessment creation and implementation this volume demonstrates how validation studies have the potential to advance the field of mathematics education Including chapters addressing a variety of
