The Second Civil War Ronald Brownstein, 2008-09-30 In recent years American politics has seemingly become much more partisan more zero sum more vicious and less able to confront the real problems our nation faces What has happened In *The Second Civil War* respected political commentator Ronald Brownstein diagnoses the electoral demographic and institutional forces that have wreaked such change over the American political landscape pulling politics into the margins and leaving precious little common ground for compromise *The Second Civil War* is not a book for Democrats or Republicans but for all Americans who are disturbed by our current political dysfunction and hungry for ways to understand it and move beyond it

Greater Good John A. Quelch, Katherine E. Jocz, 2007-12-28 Marketing has a greater purpose and marketers a higher calling than simply selling more widgets according to John Quelch and Katherine Jocz In Greater Good the authors contend that marketing performs an essential societal function and does so democratically They maintain that people would benefit if the realms of politics and marketing were informed by one another's best principles and practices Quelch and Jocz lay out the six fundamental characteristics that marketing and democracy share 1 exchange of value such as goods services and promises 2 consumption of goods and services 3 choice in all decisions 4 free flow of information 5 active engagement of a majority of individuals and 6 inclusion of as many people as possible Without these six traits both marketing and democracy would fail and with them society Drawing on current and historical examples from economies around the world this landmark work illuminates marketing's critical role in the development growth and governance of societies It reveals how good marketing practices improve the political process and in turn the practice of democracy itself

Rhetorical Democracy Robert Danisch, 2024-10-08 Rhetorical Democracy How Communication Shapes Political Culture offers an explanation and diagnosis of the current state of American democracy rooted in the American pragmatist tradition Robert Danisch analyzes the characteristics of communication systems and communication practices that inhibit or enhance democratic life In doing so this book provides a detailed explanation of the ways in which the communication systems and practices that constitute democratic life are currently fostering polarization and how they might be made to foster cooperation Scholars of communication rhetorical studies political science and media studies will find this book of particular interest

Government Is Good Douglas J. Amy, 2011 Why a book defending government Because for decades right wing forces in this country have engaged in a relentless and irresponsible campaign of vicious government bashing Conservatives and libertarians have demonized government attacked basic safety net programs like Medicare and undermined vital regulations that protect consumers investors workers and the environment This book takes on this anti government movement and shows that most of its criticisms of this institution are highly exaggerated misleading or just plain wrong In reality American government despite its flaws plays a valuable and indispensable role in promoting the public good Most government programs are working well and are actually improving the lives of Americans in innumerable ways Democratic government is a vital tool for making our world a better place and if we want an America that is prosperous healthy secure well educated just compassionate and unpolluted we need a strong active and well funded public sector Part I Why Government is Good The section of the book describes how government acts as a force for good in society One chapter chronicles a day in the life of an average middle class American and identifies the myriad ways that government programs improve our lives Other chapters describe the forgotten achievements of government how government is the only way to effectively promote public values like justice and equality and how a free market economy would be impossible without the elaborate legal and regulatory infrastructure provided by government Part II The War on Government This section of the

book chronicles the unrelenting assault on government being waged by conservative forces in this country Chapters describe how cuts in social programs and rollbacks of regulations have harmed the health safety and welfare of millions of Americans and how these assaults have taken place on many fronts in Congress the administrative branch and the federal courts as well as on the state and local level Also addressed how the right s radical anti government agenda is out of touch with the views and priorities of most Americans and what the real truth is about government deficits Part III How to Revitalize Democracy and Government There are in fact some problems with American government and we need to address these if we are to restore Americans faith in this institution One of the main problems with our government is that it is not accountable and responsive enough to the public Moneyed special interests too often win out over the public interest Chapters in this section describe this problem and how we can fix it There are several reforms including public financing of elections that could help our government live up to its democratic ideals The final chapter discusses strategies for building a pro government coalition in this country

Change for America Mark J. Green, Michele Jolin, 2009-01-01 Contributors representing two of the nation s most widely respected think tanks provide an agency by agency blueprint for building a new administration and rebuilding America

Raw Deal Steven Hill, 2015-10-20 What s going to happen to my job That s what an increasing number of anxious Americans are asking themselves The US workforce which has been one of the most productive and wealthiest in the world is undergoing an alarming transformation Increasing numbers of workers find themselves on shaky ground turned into freelancers temps and contractors Even many full time and professional jobs are experiencing this precarious shift Within a decade a near majority of the 145 million employed Americans will be impacted Add to that the steamroller of automation robots and artificial intelligence already replacing millions of workers and projected to obsolesce millions more and the jobs picture starts looking grim Now a weird yet historic mash up of Silicon Valley technology and Wall Street greed is thrusting upon us the latest economic fraud the so called sharing economy with companies like Uber Airbnb and TaskRabbit allegedly liberating workers to become independent and their own CEOs hiring themselves out for ever smaller jobs and wages while the companies profit But this share the crumbs economy is just the tip of a looming iceberg that the middle class is drifting toward Raw Deal How the Uber Economy and Runaway Capitalism Are Screwing American Workers by veteran journalist Steven Hill is an expos that challenges conventional thinking and the hype celebrating this new economy by showing why the vision of the techno sapien leaders and their Ayn Rand libertarianism is a dead end In Raw Deal Steven Hill proposes pragmatic policy solutions to transform the US economy and its safety net and social contract launching a new kind of deal to restore power back into the hands of American workers

Expand Social Security Now! Steven Hill, 2016-05-10 Why Social Security is not only sustainable but should be substantially expanded Social Security is bankrupting us It s outdated It s a Ponzi scheme It s stealing from young people These are some of the biggest myths and lies about one of the most successful programs in our nation s history Three quarters of Americans depend heavily on Social Security in their elderly

years and nearly half would be living in poverty without it But as important and popular as it is Social Security has become a political football A well financed campaign supported by conservatives special interest groups and even leading Democrats has lobbied for cuts and significant entitlement reform falsely proclaiming that Social Security is going broke Policy expert Steven Hill argues that Social Security should not only be defended it should be substantially expanded Here he proposes how we can double the monthly benefit and how to pay for it by closing many of the tax loopholes and deductions that disproportionately favor the wealthy few

Measure of a Nation Howard Steven Friedman,2012-06-26 Compares the United States with other affluent democracies in such areas as health crime and violence education democracy and equality and suggests ways the country might improve its standing in these areas

Presidential Elections and Majority Rule Edward B. Foley,2019-12-02 The Electoral College that governs America has been with us since 1804 when Thomas Jefferson's supporters redesigned it for his re election The Jeffersonians were motivated by the principle of majority rule Gone were the days when a president would be elected by acclamation as George Washington had been Instead given the emergence of intense two party competition the Jeffersonians wanted to make sure that the Electoral College awarded the presidency to the candidate of the majority rather than minority party They also envisioned that a candidate would win by amassing a majority of Electoral College votes secured from states where the candidate's party was in the majority For most of American history this system has worked as intended producing presidents who won Electoral College victories derived from state based majorities In the last quarter century however there have been three significant aberrations from the Jeffersonian design 1992 2000 and 2016 In each of these years the Electoral College victory depended on states where the winner received only a minority of votes In this authoritative history of the American Electoral College system Edward Foley analyzes the consequences of the unparalleled departure from the Jeffersonians original intent and delineates what we can do about it He explains how states by simply changing their Electoral College procedures could restore the original Jeffersonian commitment to majority rule There are various ways to do this all of which comply with the Constitution If only a few states had done so before 2016 the outcome might have been different Doing so before future elections can prevent another victory that contrary to the original Jeffersonian intent a majority of voters did not want

Dangerous Years David W. Orr,2016-01-01 Considers future of civilization in the light of what we know about climate change and related threats David Orr an award winning internationally recognized leader in the field of sustainability and environmental education pulls no punches even with the Paris Agreement of 2015 Earth systems will not reach a new equilibrium for centuries Earth is becoming a different planet more threadbare and less biologically diverse with more acidic oceans and a hotter more capricious climate Furthermore technology will not solve complex problems of sustainability

California Crackup Joe Mathews,Mark Paul,2010 California Crackup is brilliant It cuts through the familiar tangle of diagnoses and quick fix solutions to provide a comprehensive and persuasive analysis of California's dysfunctional governmental system Paul and

Mathews have coolly laid out a complicated story made it readable sometimes even comedic It is the best discussion of the issue I ve seen in over three decades Peter Schrag author of California America s High Stakes Experiment I know of no other work that combines so succinctly and enjoyably a historical summary of California s existing problems with such a sweeping and provocative program of reform Ethan Rarick University of California Berkeley Mark Paul and Joe Mathews have produced an indispensable guide to California s crisis of governance and they have done so with humor scholarship fairness and storytelling verve Every Californian should read this book Steve Coll Pulitzer Prize winning author of Ghost Wars Mark Paul has a talent for presenting California Big Think stuff in an easily accessible and always readable way offering clear and creative insights on the subject of California s collapse CalBuzz Joe Mathews has done an artful fascinating and convincing job of connecting the California of today s Schwarzenegger era to the long history that made his rise possible James Fallows The Atlantic Monthly on Mathews book The People s Machine

Democracy in the States Bruce E. Cain, Todd Donovan, Caroline J. Tolbert, 2011-06-01 Democracy in the States offers a 21st century agenda for election reform in America based on lessons learned in the fifty states Combining accessibility and rigor leading scholars of U S politics and elections examine the impact of reforms intended to increase the integrity fairness and responsiveness of the electoral system While some of these reforms focus on election administration which has been the subject of much controversy since the 2000 presidential election others seek more broadly to increase political participation and improve representation For example Paul Gronke Reed College and his colleagues study the relationship between early voting and turnout Barry Burden University of Wisconsin Madison examines the hurdles that third party candidates must clear to get on the ballot in different states Michael McDonald George Mason University analyzes the leading strategies for redistricting reform And Todd Donovan Western Washington University focuses on how the spread of safe legislative seats affects both representation and participation Supreme Court Justice Louis Brandeis famously observed

that a single courageous state may if its citizens choose serve as a laboratory and try novel social and economic experiments without risk to the rest of the country Nowhere is this function more essential than in the sphere of election reform as this important book shows The Future of Political Science Gary King,Kay L. Schlozman,Norman Nie,2009-03-15 This book contains some of the newest most exciting ideas now percolating within political science One hundred authors each contribute a brief essay about a single novel or insufficiently appreciated idea on some aspect of political science

Re-Framers John R. Vile,2014-07-15 This book is the most comprehensive review of all the major proposals to rewrite revise or even replace the U S Constitution covering more than 170 proposals from the nation s beginnings to the present day The U S Constitution was carefully written by a remarkable group of men but subsequent generations of Americans have devoted enormous time and energy to improving it From colonial times to the present day Americans of all political persuasions have campaigned to reform remake or replace this key document The growth of the Internet and self publishing has spawned a virtual explosion of such proposals This book documents the numerous ideas for change some practical some idealistic and some bordering on fanatical that reflect America s Constitutional heritage and could shape the nation s future Re Framers 170 Eccentric Visionary and Patriotic Proposals to Rewrite the U S Constitution sets the stage for this review by describing various prequels to the U S Constitution and explaining how the final document emerged at the Constitutional Convention The subsequent chapters examine many proposed alternatives and revisions to the Constitution from its establishment until the present illuminating perceived strengths and weaknesses of the current document as well as the pros and cons of possible amendments Readers ranging from lay citizens who are interested in constitutional issues to historians political scientists law professors and reference librarians will all benefit from this unparalleled examination of proposed constitutional amendment **The Bridge at the Edge of the World** James Gustave Speth,2008-01-01 Presents an analysis of modern capitalism and its impact on the global environmental crises and discusses how the transformation of current economic and political systems can lead to environmental sustainability
