but due to the lack of undiscovered processes involved in contributing to circadian rhythmicity We know for example that the general circadian mechanism is not regulated equally in all tissues of mammals Hence a lot still needs to be discovered to get a full understanding of circadian rhythms at the systems level In this respect technology has advanced at high speed in the last years and provided us with data illustrating the sheer complexity of regulation of physiological processes in organisms To handle this information computer aided integration of the results is of utmost importance in order to discover novel concepts that ultimately need to be tested experimentally Physics Express ,1968 Technologies in Plant Biotechnology and Breeding of Field Crops Kamaluddin,Usha Kiran,M.
