kinematics of Cretaceous arc continent collision and Eocene and Miocene continent-continent collision in Anatolia with westward extrusion of Anatolia as a result. Eight papers provide an overview and new data from stratigraphy, structure, metamorphism, and magmatism covering the geological consequences of the largely Neogene collapse that characterizes the segments of interest in response to late stage reorganization of the subduction zone and the roll back and break off of segments of the subducting slab.

**Porphyry in Syriac** Yury Arzhanov, 2024-07-01. In 2021 a previously unknown treatise by Porphyry of Tyre which has been preserved in a Syriac translation was made available to historians of philosophy. Porphyry On Principles and Matter. De Gruyter, 2021. This text not only enlarges our knowledge of the legacy of the most prominent disciple of Plotinus but also serves as an important witness to Platonist discussions of first principles and of Plato's concept of prime matter in the *Timaeus*. The aim of the present volume of collected studies is two fold. On the one hand it brings up an update to the state of the art of our knowledge of Porphyry's philosophy and of his role in the transmission of the earlier philosophical materials, especially those of the Middle Platonic works. On the other hand it focuses on the questions of the reception of Porphyry's legacy both by Greek and Latin Platonists with special interest in Calcidius and by Christian Oriental authors with particular focus on the Syriac tradition. The primary audience of the book will be scholars and graduate students in ancient and late ancient Greek philosophy, Orientalists, and scholars interested in the Christian reception of Greek philosophy in the studies of the Christian Orient as well as in Greek, Latin, and Syriac philology.
