Chemistry of Wine Flavor Andrew Leo Waterhouse, Susan E. Ebeler, 1998 Wine flavour chemistry is a complex and diverse field that ranges from the potently aromatic pyrazines to the complex polymeric tannins Modern chemistry is now opening some doors to the mysteries of wine flavour and this unique monograph is dedicated to current research developments The book starts with the Riesling terpenes which are responsible for floral aroma when new and the kerosene like aroma that appears in old age and with the chemically related norisprenoids found in Cabernet Sauvignon and Merlot It includes three reports on flavours of microbial origin particularly the effects of different yeast strains and it looks at important factors in ageing including acetalhyde the contribution of oak and problems with cork taint It also explores in detail the relationship between winemaking techniques and the chemistry and taste attributes of phenolic compounds

Wine Chemistry and Biochemistry M. Victoria Moreno-Arribas, Carmen Polo, 2008-11-06 The aim of this book is to describe chemical and biochemical aspects of winemaking that are currently being researched The authors have selected the very best experts for each of the areas The first part of the book summarizes the most important aspects of winemaking technology and microbiology The second most extensive part deals with the different groups of compounds how these are modified during the various steps of the production process and how they affect the wine quality sensorial aspects and physiological activity etc The third section describes undesirable alterations of wines including those affecting quality and food safety Finally the treatment of data will be considered an aspect which has not yet been tackled in any other book on enology In this chapter the authors not only explain the tools available for analytical data processing but also indicate the most appropriate treatment to apply depending on the information required illustrating with examples throughout the chapter from enological literature

Understanding Wine Chemistry Andrew L. Waterhouse, Gavin L. Sacks, David W. Jeffery, 2024-06-17 Understanding Wine Chemistry Understand the reactions behind the world s most alluring beverages The immense variety of wines on the market is the product of

multiple chemical processes whether acting on components arising in the vineyard during fermentation or throughout storage. Winemaking decisions alter the chemistry of finished wines affecting the flavor, color, stability and other aspects of the final product. Knowledge of these chemical and biochemical processes is integral to the art and science of winemaking. Understanding Wine Chemistry has served as the definitive introduction to the chemical components of wine, their properties and their reaction mechanisms. It equips the knowledgeable reader to interpret and predict the outcomes of physicochemical reactions involved with winemaking processes. Now updated to reflect recent research findings, most notably in relation to wine redox chemistry along with new Special Topics chapters on emerging areas, it continues to set the standard in the subject. Readers of the second edition of Understanding Wine Chemistry will also find Case studies throughout showing chemistry at work in creating different wine styles and avoiding common adverse chemical and sensory outcomes. Detailed treatment of novel subjects like non alcoholic wines, non glass alternatives to wine packaging, synthetic wines and more. An authorial team with decades of combined experience in wine chemistry research and education. Understanding Wine Chemistry is ideal for college and university students, winemakers at any stage in their practice, professionals in related fields such as suppliers or sommeliers and chemists with an interest in wine.

Book chapters include the latest progress in the chemistry and biochemistry of winemaking, stabilisation and ageing, covering the impact of phenolic compounds and their transformation products on wine sensory characteristics, emerging non thermal technologies, fermentation with non *Saccharomyces* yeasts, pathways involved in aroma compound synthesis, the effect of wood chips use on wine quality, the chemical changes occurring during Port wine ageing, sensory mechanisms of astringency, physicochemical wine instabilities and defects, and the role of cork stoppers in wine bottle ageing. It is highly recommended to academic researchers, practitioners in wine industries as well as graduate and PhD students in oenology and food science.

Wine Ronald J. Clarke, Jokie Bakker, 2008-04-15. The commercial importance of wine continues to increase across the globe with the availability of many new wines encompassing a remarkable and exciting range of flavours. Wine Flavour Chemistry focuses on aspects of wine making procedures that are important in the development of flavour, describing some of the grapes used and their resulting wines. In depth descriptions of flavour reaction pathways are given together with cutting edge scientific information concerning flavour release, its associated chemistry and physics, and the sensory perception of volatile flavours. Wine Flavour Chemistry contains a vast wealth of information describing components of wine, their underlying chemistry and their possible role in the taste and smell characteristics of wines, fortified wines, sherry and port. Many extremely useful tables are included linking information on grapes, wines, composition and resulting perceived flavours. Wine Flavour Chemistry is essential reading for all those involved in commercial wine making, be it in production, trade or research.

The book will be of great use and interest to all enologists and to food and beverage scientists and technologists in commercial companies and within the academic sector. Upper level students and teachers on enology courses will need to read this book. All libraries in universities and research establishments where food and beverage science and technology and chemistry are studied and taught should have multiple copies of this important book.
