The Benedictines In The Middle Ages Monastic Orders:

The Benedictines in the Middle Ages James G. Clark, 2014-11-20 The men and women that followed the 6th century customs of Benedict of Nursia c 480 c 547 formed the most enduring influential numerous and widespread religious order of the Latin Middle Ages This text follows the Benedictine Order over 11 centuries from their early diaspora to the challenge of continental reformation

Medieval Monasticism Clifford Hugh Lawrence, 1989 For a thousand years the monasteries and religious orders played a major role in the society economy and culture of the west This book traces the Western monastic tradition in its social context from its fourth century origins in the deserts of Egypt and Syria through to the many and various forms of religious life it assumed during the Middle Ages This new edition contains new work on monastic studies and the relationship between the cloister and the schools on the controversy between the Benedictines and the spokesmen of the reformed monasticism of the twelfth century and on the social composition of the nunneries and the particular problems that confronted women in the religious life

Medieval Monasticism C.H. Lawrence, Janet Burton, 2023-09-28 Medieval Monasticism traces the Western Monastic tradition from its fourth century origins in the deserts of Egypt and Syria through the many and varied forms of religious life it assumed during the Middle Ages It explores the relationship between monasteries and the secular world around them For a thousand years the great monastic houses and religious orders were a prominent feature of the social landscape of the West and their leaders figured as much in the political as on the spiritual map of the medieval world In this book many of them together with their supporters and critics are presented to us and speak their minds to us We are shown for instance the controversy between the Benedictines and the reformed monasticism of the twelfth century and the problems that confronted women in religious life A detailed glossary offers readers a helpful vocabulary of the subject This fifth edition has been revised by Janet Burton to include an updated bibliography and an introduction which discusses recent trends in monastic studies including reinterpretations of issues of reform and renewal new scholarship on religious women and interdisciplinary and multidisciplinary approaches This book is essential reading for both students and scholars of the medieval world

The Benedictines David Knowles, 2009-05-12 What then are the particular aspects moral and intellectual of the full Christian life that are emphasized by Benedictines in the form of the life they lead It is an objective form of life sane strong unchanging from year to year a life of work and liturgical prayer which can be seen and heard lived in conditions which aim at representing all that is best in the basic family life of Christianity aided by all human courtesies reverences and affections It is nothing secret or esoteric nor an impossibility but an ordered form of ordinary life It is a religious life which is free from all that is doctrinaire or experimental It is the Christian life writ large for all to see with all the non Christian elements removed that are normally interwoven with the devout life as lived in the world The message of Saint Benedict is simple and direct Work obey keep silent praise God in common and if you wish to pray to Him alone enter the church and pray

Handbook of Medieval Culture. Volume 2 Albrecht Classen, 2015-08-31

A follow up publication to the Handbook of Medieval Studies this new reference work turns to a different focus medieval culture. Medieval research has grown tremendously in depth and breadth over the last decades. Particularly our understanding of medieval culture of the basic living conditions and the specific value system prevalent at that time has considerably expanded to a point where we are in danger of no longer seeing the proverbial forest for the trees. The present innovative handbook offers compact articles on essential topics: ideals, specific knowledge and concepts defining the medieval world as comprehensively as possible. The topics covered in this new handbook pertain to issues such as love and marriage, belief in God, hell and the devil, education, lordship and servitude, Christianity versus Judaism and Islam, health, medicine, the rural world, the rise of the urban class, travel, roads and bridges, entertainment, games and sport activities, numbers, measuring the education system, the papacy, saints, the senses, death and money.

Ecclesiastical Lordship, Seigneurial Power and the Commercialization of Milling in Medieval England Adam Lucas, 2016-04-29

This is the first detailed study of the role of the Church in the commercialization of milling in medieval England. Focusing on the period from the late eleventh to the mid sixteenth centuries, it examines the estate management practices of more than thirty English religious houses founded by the Benedictines, Cistercians, Augustinians and other minor orders, with an emphasis on the role played by mills and milling in the establishment and development of a range of different sized episcopal and conventual foundations. Contrary to the views espoused by a number of prominent historians of technology since the 1930s, the book demonstrates that patterns of mill acquisition, innovation and exploitation were shaped not only by the size, wealth and distribution of a house's estates but also by environmental and demographic factors, changing cultural attitudes and legal conventions prevailing and emergent technical traditions, the personal relations of a house with its patrons, tenants, servants and neighbours, and the entrepreneurial and administrative flair of bishops, abbots, priors and other ecclesiastical officials.

Religious Men and Masculine Identity in the Middle Ages P. H. Cullum, Katherine J. Lewis, 2013

Essays offering new approaches to the changing forms of medieval religious masculinity. The complex relationship between masculinity and religion as experienced in both the secular and ecclesiastical worlds forms the focus for this volume, whose range encompasses the rabbis of the Babylonian and Palestinian Talmud and moves via Carolingian and Norman France, Siena, Antioch and high and late medieval England to the eve of the Reformation. Chapters investigate the creation and reconstitution of different expressions of masculine identity.

from the clerical enthusiasts for marriage to the lay practitioners of chastity from crusading bishops to holy kings They also consider the extent to which lay and clerical understandings of masculinity existed in an unstable dialectical relationship at times sharing similar features at others pointedly different co-opting and rejecting features of the other the articles show this interplay to be more far more complicated than a simple linear narrative of either increasing divergence or of clerical colonization of lay masculinity They also challenge conventional historiographies of the adoption of clerical celibacy of the decline of monasticism and the gendered nature of piety Patricia Cullum is Head of History at the University of Huddersfield Katherine J Lewis is Senior Lecturer in History at the University of Huddersfield Contributors James G Clark P H Cullum Kirsten A Fenton Joanna Huntington Katherine J Lewis Matthew Mesley Catherine Sanok Michael L Satlow Rachel Stone Jennifer D Thibodeaux Marita von Weissenberg
