The ... Annual Report of the Bentley Historical Library Bentley Historical Library, 2004 **Annual Report** Bentley Historical Library, 2005 *Selling Fear* Brigitte L. Nacos, Yaeli Bloch-Elkon, Robert Y. Shapiro, 2011-06-01 While we've long known that the strategies of terrorism rely heavily on media coverage of attacks *Selling Fear* is the first detailed look at the role played by media in counterterrorism and the ways that in the wake of 9/11 the Bush administration manipulated coverage to maintain a climate of fear Drawing on in-depth analysis of counterterrorism in the years after 9/11 including the issuance of terror alerts and the decision to invade Iraq the authors present a compelling case that the Bush administration hyped fear while obscuring civil liberties abuses and concrete issues of preparedness The media meanwhile largely abdicated its watchdog role choosing to amplify the administration's message while downplaying issues that might have called the administration's statements and strategies into question The book extends through Hurricane Katrina and the more skeptical coverage that followed then the first year of the Obama administration when an increasingly partisan political environment presented the media and the public with new problems of reporting and interpretation *Selling Fear* is a hard hitting analysis of the intertwined failures of government and media and their costs to our nation *Artists in Ohio, 1787-1900* Mary Sayre Haverstock, Jeannette Mahoney Vance, Brian L. Meggitt, 2000 A three volume guide to the early art and artists of Ohio It includes coverage of fine art photography ornamental penmanship tombstone carving china painting illustrating cartooning and the execution of panoramas and theatrical scenery *Day of the Assassins* Michael Burleigh, 2021-05-27 Written with Burleigh's characteristic brio with pithy summaries of historical moments he is brilliant on the Americans in Vietnam for example and full of surprising vignettes The Times Book of the Week In *Day of the Assassins* acclaimed historian Michael Burleigh examines assassination as a special category of political violence and asks whether like a contagious disease it can be catching Focusing chiefly on the last century and a half Burleigh takes readers from Europe Russia Israel and the United States to the Congo India Iran Laos Rwanda South Africa and Vietnam And as we travel we revisit notable assassinations among them Leon Trotsky Hendrik Verwoerd Juv na! Habyarimana Indira Gandhi Yitzhak Rabin and Jamal Khashoggi Combining human drama questions of political morality and the sheer randomness of events *Day of the Assassins* is a riveting insight into the politics of violence Brilliant and timely Our world today is as dangerous and mixed up as it has ever been Luckily we have Michael Burleigh to help us make sense of it Mail on Sunday *Grandmothering* Kathleen Stassen Berger, 2019-11-04 Contemporary grandmothers are often marginalized from extended family life because social institutions and grandmothers themselves do not understand that they could be vital for working parents for overactive children for suicidal youth indeed for many of the problems of modern grandchildren The genetics and hormones of older women have designed them to be vital family members with patience and perspective that come with age and experience In addition biology helps directly via menopause The grandmother hypothesis explains that human women unlike almost any other living

creature experience decades of life after menopause in order to make grandmothers available to their descendants Here Kathleen Berger explores the role of grandmothers in the lives of their grandchildren She uses real life examples to illustrate how grandmothers can best integrate themselves into the lives of their children's families without overstepping She explores the particular needs of each stage of childhood as they relate to grandmother involvement and input Before a child is born grandmothers need to attend to building a strong relationship with the future parents In infancy attachment and feeding are crucial In early childhood grandmothers need to follow the parent's lead remembering that a parental alliance is essential In childhood children need to be safe but not isolated and both bullies and victims benefit from a grandmother's support and assistance In adolescence and emerging adulthood grandmothers need to build direct connections and not avoid the difficult topics of sex drugs death disease and money Throughout elders need to learn technology insuring that it fosters not impedes relationships Problems in relationships are explained honestly and with insight Among these are issues when three generations share a home when parents get divorced and when grandchildren rebel against parental authority Throughout the work both the joy and the complications of effective grandmothering are described Whether you're a biological grandmother a trusted step grandmother or just a warm and trusted older woman with young ones in your life you can be a vital force in the lives of future generations

Predators Brian Glyn Williams, 2013 *Predators* is a riveting introduction to the murky world of Predator and Reaper drones the CIA's and U.S. military's most effective and controversial killing tools Brian Glyn Williams combines policy analysis with the human drama of the spies terrorists insurgents and innocent tribal peoples who have been killed in the covert operation the CIA's largest assassination campaign since the Vietnam War era being waged in Pakistan's tribal regions via remote control aircraft known as drones or unmanned aerial vehicles Having traveled extensively in the Pashtun tribal areas while working for the U.S. military and the CIA Williams explores in detail of the new technology of airborne assassinations From miniature Scorpion missiles designed to kill terrorists while avoiding civilian collateral damage to prairie's the cigarette lightersize homing beacons spies plant on their unsuspecting targets to direct drone missiles to them the author describes the drone arsenal in full Evaluating the ethics of targeted killings and drone technology Williams covers more than a hundred drone strikes analyzing the number of slain civilians versus the number of terrorists killed to address the claims of anti-drone activists In examining the future of drone warfare he reveals that the U.S. military is already building more unmanned than manned aerial vehicles *Predators* helps us weigh the pros and cons of the drone program so that we can decide whether it is a vital strategic asset a frenemy or a little of both

Professional Journal of the United States Army, 2013-03 **Flight Risk** Forrest L. Marion, 2018-10-15 From the 1920s Afghanistan maintained a small air arm that depended heavily upon outside assistance Starting in 2005 the United States led an air advisory campaign to rebuild the Afghan Air Force AAF In 2007 a formal joint combined entity led by a U.S. Air Force brigadier general began air advisor work with Afghan airmen Between 2007 and 2011 these efforts made modest

progress in terms of infrastructures personnel and aircraft accessions and various training courses But by 2010 advisors increasingly viewed AAF command and control C2 as a problem area that required significant improvement if a professional air force was to be built In the spring of 2011 major institutional changes to AAF C2 procedures were being introduced when nine U S air advisors were killed The attack was the worst single incident loss of U S Air Force personnel in a deployed location since 1996 and the worst insider attack since 2001 From the day of that tragic event the cultural chasm between Afghanistan and the West became more apparent This dilemma continues with no end in sight to an air advisory mission of uncertain long term value Off Script Josh King,2016-04-26 Donald Trump won election as the 45th President of the United States by studying American political stagecraft and learning what helped previous candidates succeed and doomed others to failure A figure on the periphery of campaigns for decades he glided down the Trump Tower escalator on June 16 2015 declared his candidacy and took his place permanently as an actor in the country s greatest spectacle Twenty eight years earlier at the dawn of what Josh King calls The Age of Optics in OFF SCRIPT An Advance Man s Guide to White House Stagecraft Campaign Spectacle and Political Suicide Trump began to position himself for his eventual run for the Oval Office Pictured at the foot of that same gilded escalator he posed at the foot of that same escalator for a cover story profile in TIME magazine This Man May Turn You Green With Envy Or Just Turn You Off read the first part of TIME s headline in January 1989 Flaunting It is the Game and TRUMP is the name the headline concluded The cover story came just after Massachusetts Governor Mike Dukakis lost in a landslide to Vice President George H W Bush in part because Dukakis made the disastrous decision to ride in an M1A1 Abrams tank in Sterling Heights Michigan less than two months before the election Why did Dukakis make that ride and why was it so deadly Indeed in each election that followed why did George Bush Bob Dole Al Gore John Kerry John McCain and Mitt Romney make similar mistakes that cost them dearly at the polls These are the questions that Josh King answers in OFF SCRIPT King who served as Director of Production in Bill Clinton s White House and later was host of SiriusXM Satellite Radio s long running Polioptics The Theater of Politics brings readers on a wild ride over the last thirty years of the Age of Optics from Ronald Reagan s mastery of image to Barack Obama s Vanilla Presidency to ultimately the faceoff between Hillary Clinton and Trump As one of the White House s most creative advance men skilled at employing the tools to tell help tell the president s daily story and creating the scenes that the media can t resist turning into news packages and front page photos King pulls back the curtain on the behind the scenes alchemy of political stagecraft King s personal account in depth interviews and detail rich stories and his unique angle on what drives headlines makes news and wins elections will serve as an indispensable companion to those keeping a close eye on the Trump presidency

war beyond the battlefield in studying the wars that were captured under the rubric of the War on Terror this special issue book seeks to explore the complex spatial relationships between war and the spaces that one is not used to thinking of as the battlefield It focuses on the conflicts that still animate the spaces and places where violence has been launched and that the war has not left untouched In focusing on war beyond the battlefield it is not that the battlefield as the place where war is waged has gone in smoke or has borne out of importance it is rather the case that the battlefield has been displaced redesigned re shaped and rethought through new spatializing practices of warfare These new spaces of war new in the sense that they are not traditionally thought of as spaces where war takes place or is brought to are television screens cellular phones and bandwidth George W Bush s ranch in Crawford Texas videogames popular culture sites news media blogs and so on These spaces of war beyond the battlefield are crucial to understanding what goes on the battlefield in Iraq Afghanistan or in other fronts of the War on Terror such as the homeland to understand how terror has globally been waged beyond the battlefield This book was originally published as a special issue of *Geopolitics* **Pathways to Reform** Alexandra W.

Logue,2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation s third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university s nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the attention of local and national media and resulted in lengthy legal action In *Pathways to Reform* Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation *Pathways to Reform* provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid *TIME'S NOW for Women Healthcare Leaders* Patricia A.
