The Cancer Of Corruption:

The Cancer of Corruption Ian Lumley, 2014-11 Jimmy Tasker was an officer who didn't suffer fools gladly. His time in the Metropolitan Police had brought him up against a few already. Now in 1975 he knew that his tour of duty in the anti-terror unit was coming to an end and he expected to be moving on. He didn't expect that move to mean leaving the south of England. Asked to investigate the possibility of a mole in the South Wales Police he soon wondered if he could uncover the truth before he made enemies of most of the senior officers he dealt with. Tragedy on a personal level had to be dealt with alongside trying to unravel a far-reaching web of deceit and lies which eventually led him back to the higher echelons in the Met.

Global Issues for Global Citizens Vinay Kumar Bhargava, 2006-01-01 Written by 27 World Bank experts this book draws on the Bank's unique global capabilities and experience to promote an understanding of key global issues that cannot be solved by any one nation alone in an increasingly interconnected world. It describes the forces that are shaping public and private action to address these issues and highlights the Bank's own work in these areas. Covering four broad themes: global economy, global human development, global environment and global governance this comprehensive volume provides an introduction to today's most pressing global issues from poverty to climate change.

The Cancer Within Cristina A. Pop, 2022-05-13 The Cancer Within examines cervical cancer in Romania as a point of entry into an anthropological reflection on contemporary health care. Cervical cancer prevention reveals the inner workings of emerging post-communist medicine which aligns the state and the market, public and private health care providers, policy makers and ordinary women. Fashioned by patriarchal relations, lived religion and the historical trauma of pronatalism, Romanian women's responses to reproductive medicine and cervical cancer prevention are complicated by neoliberal reforms to medical care. Cervical cancer prevention and especially the HPV vaccination provided Romanians a legitimate instance to express their conflicting views of post-communist medicine. What sets Romania apart is that pronatalism, patriarchy, lived religion, medical reforms and moral contestation of preventive medicine bring into line systemic contingencies that expose the historical social and cultural trajectories of cervical cancer.

Corruption in Latin America David Arellano-Gault, 2019-09-05 In *Corruption in Latin America* the reader is presented with an alternative starting point for understanding corruption in this key region. The author asserts that corruption is a stable and rational social and organizational mechanism. Seen through this lens we can begin to understand why it persists and how to implement strategies to control corruption effectively. Beginning with an in-depth nuanced examination of the concept of corruption the author establishes the theoretical basis for viewing corruption as a social construct. An analysis of the experiences of four countries in the region: Argentina, Brazil, Guatemala and Mexico provides the reader with concrete data from which they can understand how and why these behaviors are reproduced, validated and tolerated in everyday settings between governments and citizens, governments and firms, and firms and clients. Once we see corruption as the socially sanctioned norm for getting business done we can begin to produce and propose effective solutions to reduce

corruption in Latin America by designing and implementing instruments that transform this dynamic This rigorous and original approach will challenge the reader's assumptions about corruption and will appeal to students of corporate governance international business public management and business ethics

The Corruption Cure Robert I. Rotberg, 2017-04-24 Why leadership is key to ending political and corporate corruption globally Corruption corrodes all facets of the world's political and corporate life yet until now there was no one book that explained how best to battle it The Corruption Cure provides many of the required solutions and ranges widely across continents and diverse cultures putting some thirty five countries under an anticorruption microscope to show exactly how to beat back the forces of sleaze and graft Robert Rotberg defines corruption theoretically and practically in its many forms describes the available legal remedies and examines how we know and measure corruption's presence He looks at successful and unsuccessful attempts to employ anticorruption investigative commissions to combat political theft and venal behavior He explores how the globe's least corrupt nations reached that exceptional goal Another chapter discusses the role of civil society in limiting corruption Expressed political will through determined leadership is a key factor in winning all of these battles Rotberg analyzes the best performing noncorrupt states to show how consummate leadership made a telling difference He demonstrates precisely how determined leaders changed their wildly corrupt countries into paragons of virtue and how leadership is making a significant difference in stimulating political anticorruption movements in places like India Croatia Honduras and Lebanon Rotberg looks at corporate corruption and how it can be checked and also offers an innovative fourteen step plan for nations that are ready to end corruption Curing rampant corruption globally requires strengthened political leadership and the willingness to remake national political cultures Tougher laws and better prosecutions are not enough This book enables us to rethink the problem completely and solve it once and for all

Fighting Fraud and Corruption at the World Bank Stefano Manacorda, Costantino Grasso, 2018-05-04 This book focuses on the World Bank's sanctions system which is an innovative instrument of global governance implemented by the leading multilateral development bank in order to impose penalties on legal entities and individuals that are involved in Bank financed projects Although similar regimes have also been implemented by other regional multilateral development banks the World Bank's legal framework is currently the most comprehensive one The book offers a rich and detailed analysis of the sanctions system presenting an in depth examination of all the phases of its procedure with a special focus on key aspects such as the criteria for assigning liability to legal entities and corporate groups as well as the World Bank's jurisdictional reach over non contractors The book also explores the compatibility between the legal framework implemented by the Bank and the rule of law the role of precedents and the level of due process It highlights the fact that the sanctions system is currently characterized by a lack of legal guarantees and that there are compelling reasons for supporting the argument that due process safeguards should be applied to it in their entirety To that end the book conducts a thorough analysis of specific procedural aspects such as the right to a hearing the

right to evidence disclosure the time limit regime the standard of proof and shift of the burden of proof the evidential value of a party's silence and the consistency and predictability of the World Bank's sentencing practice The study is conducted on the basis of a detailed and painstaking examination of the most relevant decisions taken by the Sanctions Board providing the first ever commentary on the World Bank's case law

Corruption in Africa Peter Anassi, 2004

Corruption as a social science has been mystified and even ignored for many generations Not many people would like to talk about this subject openly and transparently Now it is becoming a subject of great concern not only in the developing nations but also in the developed world The subject has impacted so negatively in our social economic and political life that we can no longer keep quiet about it Corruption is eroding the moral values of many nations and consigning many people to perpetual poverty and deprivation To me this is a subject that is becoming more important and critical than even civics and geography in schools It is a subject that touches and affects the morality of nations I have a passionate concern that if we in Africa want to make Africa a better place to live in then we must address this subject with the seriousness it deserves Like any other social science this subject should be introduced in our schools and colleges so that our young people could be made acutely aware of the evils of this vice and how it could be eradicated from our society If this is done our future generations will live in a much better society than we are today There should also be programmes in place organized by the civil society and other agencies to educate the masses about the consequences of corruption in society I do however appreciate that without available materials my propositions could not be feasible This book therefore is intended to form a good source of Civic Education Material into Corruption in Africa and more specifically in Kenya The book has been written with those educational objectives specifically in mind It is the intention of this book to show that corruption poses a serious challenge in terms of the economic political and social development in the African Continent Corruption undermines democratic institutions and good governance in the political landscape It reduces accountability and negates representation and policymaking in the electoral process It abrogates the rule of law in the judiciary Corruption also encourages nepotism resulting into unequal provision of resources to the population in the public sector The book further endeavours to show that corruption undermines the legitimacy of government and such democratic values as human rights respect for the rule of law trust and tolerance Corruption also does undermine economic development by advancing narrow and selfish economic policies and incompetence in the delivery of services to the people This book seeks to analyze how corruption in public institutions has squandered the national wealth and impoverished the people There is also a critical analysis on bureaucratic corruption and how the public officers achieve their objectives by diverting public investment away from social and people friendly projects such as poverty reduction education health and housing into capital projects simply to attract bribes for individual benefits The book examines institutional corruption in various departments of government including the Police Judiciary Public Works Immigration Revenue Authority Lands Local Government and many other public institutions The book

also examines corruption in the public and private sectors including public corporations political banks educational institutions and how the general public have also contributed to the vice The book further examines corruption in other African countries and makes useful comparisons It goes on to deal with measures that are being put in place both in Kenya and other African countries to fight corruption nationally and internationally The Anti Corruption and Economic Crimes Act and the Public Servants Ethics Act that the Kenya Government has put in place are discussed in some detail The role of civil society and other organizations like Transparency International and the media in the fight against corr

Fighting Corruption in Eastern Europe Diana Schmidt-Pfister,Holger Moroff,2013-09-13 Anti corruption programmes projects and campaigns have come to constitute an essential aspect of good governance promotion over the last two decades The post communist countries in Eastern Europe have presented one of the first key targets of transnational anti corruption efforts and indeed most of these countries have shown an impressive record of respective measures Yet path breaking institutional and policy developments have not set in before the mid 2000s both at the international level and in most Eastern European countries Are these the beginnings of a mutually synergetic success story In order to answer this question we need to better understand the complex interplay between the international and domestic domains in this policy field and geographic region This book provides in depth and comparative insights about this interplay with a particular focus on the involvement of domestic social movements governmental political machines and international legal mechanisms We find that on all three levels of analysis political and material interests of relevant actors are complemented and at times contradicted by normative claims Moreover at the interfaces of the three levels coincidental and spontaneous developments have largely outweighed systematic implementation and coordination of appropriate anti corruption strategies This book is based on a special issue of Global Crime

A Concise History of Afghanistan-Central Asia and India in 25 Volumes HAMID ALIKUZAI,2015-01-19 Thirteen years after the U S invasion of Afghanistan Thirteen years after the U S invasion of Afghanistan the gains that the international coalition has made with its local partners are real but reversible Afghanistan is no longer a global hub of terrorist activity but Taliban resurgence would threaten to make it one again Reconstruction assistance has produced demonstrable progress in health education and economic well being but corruption and governance problems have undermined popular support for the government in Kabul and constrained the overall level of progress Internationally a coalition still backs the International Security Assistance Force ISAF military mission However NATO s will is waning China Russia and India are largely free riders and Punjab and Iran publicly say the right things while destabilizing Afghanistan by privately meddling to their own ends Political and economic realities in the United States make the current level of American engagement in Afghanistan unsustainable But as the commitment of coalition partners fades what Washington decides will shape the future of South Asia Looking ahead there are three different scenarios for American engagement in Afghanistan It remains to be seen exactly which route Washington will take But it is clear that U S interests require a long term

commitment not only in Afghanistan but across the region. Let it be forgotten the consequences of ignoring the region in the 1990s were visited upon the United States on 9/11. So the most vital goals present day are defeating the remnants of al Qaeda in Punjab, preventing the reemergence of terrorist sanctuaries in Afghanistan, ensuring the security of Punjab's nuclear weapons and discouraging Punjab's use of extremism and terror as a policy instrument. There are three ways forward. Each entails a different degree of involvement and carries varying risks and rewards. The first option is the riskiest. Future 1: Immediate Departure and the Reallocation of Resources because discontent among the U.S. public over the war is already at an all time high.

The Impact of Corruption on International Commercial Contracts Michael Joachim Bonell, Olaf Meyer, 2015-08-29. This volume presents national reports describing the legal instruments that are available to prevent the payment of bribes for acquiring contracts. Anti corruption is one of the preeminent issues in the modern global commercial order and is tackled with the help of criminal law and contract law in different ways in different countries. The reports included in this volume from very diverse parts of the world represent a unique and rich compilation of court decisions, doctrinal discussions and a pool of suggested solutions. The central theme is the enforceability of three problematic types of contracts: the bribe agreement whereby a bribe payer promises the agent of his business partner a personal benefit in exchange for favourable contract terms; the agreement between a bribe payer and an intermediary, a bribe merchant where the latter offers his expertise to help funnel bribes to agents of the business partner; and finally the contract between the bribe payer and his business partner which was obtained by means of bribery. The analysis is tailored toward commercial contracts which can also include contracts with state owned enterprises. The examination and comparison of international and national initiatives included in this volume advance the discussion on the most appropriate remedies in corruption cases and show how to get past the boundaries of criminal, private and contract law.

Corruption and Development in Africa K. Hope, B. Chikulo, 1999-08-18. Bringing together a distinguished cast of contributors, the book provides an authoritative and definitive analysis of the theory, practice and development impact of corruption in Africa. Combating corruption is demonstrated to require greater priority in the quest for African development.

Philosophy and Business Ethics Guglielmo Faldetta, Edoardo Mollona, Massimiliano Matteo Pellegrini, 2022-06-06. This book explores the relationship between philosophy and business ethics. Academics and practitioners often muse about the ethical and moral aspect of management and business actions but these studies can lack a deeper philosophical grounding. Contributors to this volume challenge this gap by applying different philosophical paradigms and theories to business management issues. The territory covered by the contributions collected in this book spans from the foundations of business management literature itself to the role of philosophy in new business models and technology, from the way philosophical theory can explain and encourage ethical firm behaviour to the political stance that an organization takes. Contributors take a holistic approach to business and management, bringing together real world examples and rich academic theory, creating an interdisciplinary volume with

international authors Covering important topics such as corporate social responsibility sustainability leadership and stakeholder relations this book will be of interest to academics working in the field of business ethics philosophy and management studies The Cancer Question Profiteered or Cured?
