Swallow Angela Turner, 2015-11-15 Known as heralds of spring and beautiful elegant flyers swallows are among the most beloved of familiar birds Because they return with the spring swallows as Angela Turner explains have long been associated with the renewal of life love fidelity and fertility while their ability to travel incredible distances has given them associations with freedom and speed That freedom however hasn't kept them from becoming familiar figures in towns and cities They often seem to even seek out human company for example barn swallows are known for nesting in our buildings and purple martins in our back yards Destruction of their natural habitat however has proved dangerous to some species of swallow and recent years have seen some populations dwindling to the point of near extinction Turner outlines the reasons for these declines as part of her engaging account of the natural and cultural history of this beloved bird

A Handbook to the Swallows and Martins of the World Angela Turner, Chris Rose, 2010-06-30 This reference guide gives general details about the swallows and martins of the world These include appearance the basic coloration and differences

between the sexes and immatures and the function of other areas of colouring Several species within the same geographical area are often segregated by feeding in different habitats or at different heights or by eating different size classes of insects The two sub families one being the two river martins the other containing about 72 species mainly in the genus *hirundo* are dealt with including their distribution and migration patterns Feeding courtship and breeding habits are considered together with details of nesting sites clutch size incubation and life span Finally the population sizes of the various species are examined noting that whilst many have expanded their range by using man made structures forest species probably remain small and one species the Red Sea swallow is known from only one specimen The book follows the same approach style and presentation as *The Herons Handbook* published in 1985 It is illustrated by the winner of the prestigious British Birds Illustrator of the Year Award and the author has contributed to many scientific papers and journals including BBC's *Wildlife Magazine*

RSPB Spotlight Swifts and Swallows is packed with eye catching informative colour photos and features succinct detailed text written by a knowledgeable naturalist People all over Britain and Europe have long welcomed the arrival of swifts and swallows as a promise of summer being just around the corner And with their similar long wings and dashing flight it is perhaps understandable that we often confuse the two birds After all they have much in common both feed on flying insects both breed around buildings and both are long distance migrants that spend winter in Africa But appearances can be deceptive Swifts and swallows are completely unrelated birds that have adapted through evolution to survive in similar ways In *Spotlight Swifts and Swallows* Mike Unwin reveals their fascinating lifestyles explains how and why they have acquired their similarities and ways in which we can help protect them The *Spotlight* series introduces readers to the lives and behaviour of our favourite animals with eye catching colour photography and informative expert text

The Swallow Stephen Moss, 2020-10-29 From the bestselling author of *The Robin* *The Wren* and *The Twelve Birds of Christmas* With around 700 000 breeding pairs the swallow is one of the most familiar birds in Britain

Though we consider the swallow to be our bird we also share this beloved creature with millions of others across the globe. Whilst we see it on a daily basis for half the year the swallow then flies south to Africa living on only in our memory in the long dark winter. In *The Swallow* Stephen Moss documents a year of observing the swallow close to home and in the field to shed light on the secret life of this extraordinary bird. We trace the swallow's life cycle and journey including the epic 12 000 mile round trip it takes every year to enable it to enjoy a life of almost eternal sunshine and the key part the swallow plays in our traditional and popular culture. With beautiful illustrations throughout this captivating year in the life biography reveals the hidden secrets of this charismatic and beautiful bird.

Nestwork Jennifer Clary-Lemon, 2023-08-01 As more and more species fall under the threat of extinction humans are not only taking action to protect critical habitats but are also engaging more directly with species to help mitigate their decline Through innovative infrastructure design and by changing how we live humans are becoming more attuned to nonhuman animals and are making efforts to live alongside them Examining sites of loss temporal orientations and infrastructural mitigations Nestwork blends rhetorical and posthuman sensibilities in service of the ecological care In this innovative ethnographic study rhetorician Jennifer Clary Lemon examines human nonhuman animal interactions identifying forms of communication between species and within their material world Looking in particular at nonhuman species that depend on human development for their habitat Clary Lemon examines the cases of the barn swallow chimney swift and bobolink She studies their habitats along with the unique mitigation efforts taken by humans to maintain those habitats including building barn swallow gazebos and artificial chimneys and altering farming practices to allow for nesting and breeding What she reveals are fascinating forms of rhetoric not expressed through language but circulating between species and materials objects Nestwork explores what are in essence nonlinguistic and decidedly nonhuman arguments within these local environments Drawing on new materialist and Indigenous ontologies the book helps attune our senses to the tragedy of species decline and to a new understanding of home and homemaking
