The Empire of Depression Jonathan Sadowsky, 2020-10-22 Depression has colonized the world Today more than 300 million of us have been diagnosed as depressed But 150 years ago depression referred to a mood not a sickness Does that mean people weren't sick before only sad Of course not Mental illness is a complex thing part biological part social its definition dependent on time and place But in the mid twentieth century even as European empires were crumbling new

Western clinical models and treatments for mental health spread across the world In so doing depression began to displace older ideas like melancholia the Japanese utsush or the Punjabi sinking heart syndrome Award winning historian Jonathan Sadowsky tells this global story chronicling the path breaking work of psychiatrists and pharmacists and the intimate sufferings of patients Revealing the continuity of human distress across time and place he shows us how different cultures have experienced intense mental anguish and how they have tried to alleviate it He reaches an unflinching conclusion the devastating effects of depression are real A number of treatments do reduce suffering but a permanent cure remains elusive Throughout the history of depression there have been overzealous promoters of particular approaches but history shows us that there is no single way to get better that works for everyone Like successful psychotherapy history can liberate us from the negative patterns of the past

**Black Dogs and Blue Words** Kimberly K. Emmons, 2010-02-16 His black dog that was how Winston Churchill referred to his own depression Today individuals with feelings of sadness and irritability are encouraged to talk to your doctor These have become buzz words in the aggressive promotion of wonder drug cures since 1997 when the Food and Drug Administration changed its guidelines for the marketing of prescription pharmaceuticals *Black Dogs and Blue Words* analyzes the rhetoric surrounding depression Kimberly K Emmons maintains that the techniques and language of depression marketing strategies vague words such as worry irritability and loss of interest target women and young girls and encourage self diagnosis and self medication Further depression narratives and other texts encode a series of gendered messages about health and illness As depression and other forms of mental illness move from the medical professional sphere into that of the consumer public the boundary at which distress becomes disease grows ever more encompassing the need for remediation and treatment increasingly warranted *Black Dogs and Blue Words* demonstrates the need for rhetorical reading strategies as one response to these expanding and

gendered illness definitions      **The Depths** Jonathan Rottenberg, 2014-02-11 Nearly every depressed person is assured by doctors well meaning friends and family the media and ubiquitous advertisements that the underlying problem is a chemical imbalance Such a simple defect should be fixable yet despite all of the resources that have been devoted to finding a pharmacological solution depression remains stubbornly widespread Why are we losing this fight In this humane and illuminating challenge to defect models of depression psychologist Jonathan Rottenberg argues that depression is a particularly severe outgrowth of our natural capacity for emotion In other words it is a low mood gone haywire Drawing on recent developments in the science of mood and his own harrowing depressive experience as a young adult Rottenberg explains depression in evolutionary terms showing how its dark pull arises from adaptations that evolved to help our ancestors ensure their survival Moods high and low evolved to compel us to more efficiently pursue rewards While this worked for our ancestors our modern environment in which daily survival is no longer a sole focus makes it all too easy for low mood to slide into severe long lasting depression Weaving together experimental and epidemiological research clinical observations and the voices of individuals who have struggled with depression *The Depths* offers a bold new account of why depression endures and makes a strong case for de stigmatizing this increasingly common condition In so doing Rottenberg offers hope in the form of his own and other patients recovery and points the way towards new paths for treatment

eating habits and or heavy drinking In fact eighty percent of women who report suffering from one of those also suffer from another This groundbreaking book written in a vivid narrative style that captures the complexities of women s lives today explains how the three core problems of the Toxic Triangle reinforce one another wreaking havoc on women s emotional well being physical health relationships and careers Escape is possible the author assures us for those who are already aware that they suffer from a serious problem as well as for the hundreds of thousands of others who have not yet examined the role that bingeing and purging on negative thoughts food or alcohol plays in their lives Nolen Hoeksema shows women how to harness their emotional and interpersonal strengths to overcome the stress caused by a destructive relationship with food alcohol and overthinking so that they can fashion effective strategies for living a happier healthier life
