**The Bible and Radiocarbon Dating** Thomas Levy, Thomas Higham, 2014-12-05 Over the past several years a number of Levantine archaeologists working on the Iron Age ca 1200 586 BCE have begun to employ high precision radiocarbon dating to solve a wide range of chronological historical and social issues The incorporation of high precision radiocarbon dating methods and statistical modelling into the archaeological tool box of the Biblical archaeologist is revolutionizing the field In fact Biblical archaeology is leading the field of world archaeology in how archaeologists must deal with history historical texts and material culture A great deal of debate has been generated by this new research direction in southern Levantine Israel Jordan Palestinian territories southern Lebanon Syria the Sinai archaeology This book takes the pulse of how archaeology science based research methods and the Bible interface at the beginning of the 21st century and brings together a leading team of archaeologists Egyptologists Biblical scholars radiocarbon dating specialists and other researchers who have embraced radiocarbon dating as a significant tool to test hypotheses concerning the historicity of aspects of the Old Testament or Hebrew Bible As this book raises the bar in how archaeologists tackle historical issues as manifest in the interplay between the archaeological record and text its interest will go well beyond the Holy Land

**The Formation of the Hebrew Bible** David M. Carr, 2011-10-12 In The Formation of the Hebrew Bible David Carr rethinks both the methods and historical orientation points for research into the growth of the Hebrew Bible into its present form Building on his prior work Writing on the Tablet of the Heart Oxford 2005 he explores both the possibilities and limits of reconstruction of pre stages of the Bible The method he advocates is a methodologically modest investigation of those pre stages utilizing criteria and models derived from his survey of documented examples of textual revision in the Ancient Near East The result is a new picture of the formation of the Hebrew Bible with insights on the initial emergence of Hebrew literary textuality the development of the first Hexateuch and the final formation of the Hebrew Bible Where some have advocated dating the bulk of the Hebrew Bible in a single period whether relatively early Neo Assyrian or late Persian or Hellenistic Carr uncovers specific evidence that the Hebrew Bible contains texts dating across Israelite history even the early pre exilic period 10th 9th centuries He traces the impact of Neo Assyrian imperialism on eighth and seventh century Israelite textuality He uses studies of collective trauma to identify marks of the reshaping and collection of traditions in response to the destruction of Jerusalem and Babylonian exile He develops a picture of varied Priestly reshaping of narrative and prophetic traditions in the Second Temple period including the move toward eschatological and apocalyptic themes and genres And he uses manuscript evidence from Qumran and the Septuagint to find clues to the final literary shaping of the proto Masoretic text likely under the Hasmonean monarchy

Grabbe, 2008 Vol 2 This title includes essays relating primarily to written sources inscriptions and biblical text forming a companion to volume 1 which was primarily on the archaeology of this period Israel in Transition 2 is the second in a two volume work addressing some of the historical

problems relating to the early history of Israel from its first mention around 1200 BCE to the beginnings of the kingdoms of Israel and Judah During this four century transition period Israel moved from a group of small settlements in the Judean and Samarian hill country to the two kingdoms of Israel and Judah occupying much of the land on the west side of the Jordan The present volume engages with the relevant texts These include various inscriptions such as the Tel Dan inscription and the Assyrian inscriptions but also an examination of the biblical text The articles discuss various individual problems relating to Israelite history but ultimately the aim is to comment on historical methodology The debate among Seminar members illustrates not only the problems but also suggests solutions and usable methods The editor provides a perspective on the debate in a Conclusion that summarizes the contributions of the two volumes together     *Radiocarbon Dating* R.E. Taylor,Ofer Bar-Yosef,2016-06-03 This volume is a major revision and expansion of Taylor s seminal book *Radiocarbon Dating An Archaeological Perspective* It covers the major advances and accomplishments of the 14C method in archaeology and analyzes factors that affect the accuracy and precision of 14C based age estimates In addition to reviewing the basic principles of the method it examines 14C dating anomalies and means to resolve them and considers the critical application of 14C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for 14C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record     “And in Length of Days Understanding” (Job 12:12) Erez Ben-Yosef,Ian W. N. Jones,2023-08-01 This two volume book presents cutting edge archaeological research primarily as practiced in the Eastern Mediterranean region These volumes key foci are inspired by the work of Thomas E Levy Volume 1 provides an in depth look at new archaeological research in the southern Levant primarily in modern Israel and Jordan inspired by Levy s commitment to understanding social political and economic processes in a long term or deep time perspective Volume 2 focuses on new research in several key areas of 21st century anthropological archaeology and archaeological science Volume 1 is organized around two major themes 1 the later prehistory of the southern Levant or the Neolithic Chalcolithic and Bronze Age and 2 new research in biblical archaeology or the historical archaeology of the Iron Age Each section contains a combination of new perspectives on key debates and studies introducing new research questions and directions Volume 2 is organized around five major themes 1 the archaeology of the Faynan copper ore district of southern Jordan a key region for archaeometallurgical research in West Asia where Levy conducted field research for over a decade 2 new research in archaeometallurgy beyond the Faynan region 3 marine and maritime archaeology focusing on issues of trade and environmental change 4 cyber archaeology an important 21st century field Levy conceived as the marriage of archaeology engineering computer science and the natural sciences and 5 key issues in anthropological archaeological theory In addition to presenting the reader with an up to date view of research in each of these areas the volume also has chapters exploring the connections between these themes e g the maritime trade

ARTICLES Poetry and Emotion in Psalm 22 Part One Joel Atwood Mis understanding Sailhamer Kevin Chen The Non Royal Portrayal of Moses in the Pentateuch Gregory Goswell Connecting Khirbet Qeiyafa to the Proper Israelite King Sauline Stronghold or Davidic Fortress Douglas Petrovich BOOK REVIEWS     [The Emergence of Israel in Ancient Palestine](#) Emanuel Pfoh, 2016-04-01 Taking advantage of critical methodology for history writing and the use of anthropological insights and ethnographic data from the modern Middle East this study aims at providing new understandings on the emergence of Israel in ancient Palestine and the socio political dynamics at work in the Levant during antiquity The book begins with a discussion of matters of historiography and history writing both in ancient and modern times and an evaluation on the incidence of the modern theological discourse in relation to history and history writing Chapter 2 evaluates the methodology used by biblical scholars for gaining knowledge on ancient Israelite society Pfoh argues that such attempts often apply socio scientific models on biblical narratives without external evidence of the reconstructed past producing a virtual past reality which cannot be confirmed concretely Chapter 3 deals with the archaeological remains usually held as clear evidence of Israelite statehood in the tenth century BCE The main criticism is directed towards archaeological interpretations of the data which are led by the biblical narratives of the books of Judges and Samuel resulting in a harmonic blend of ancient literature and modern anthropological models on state formation Chapter 4 continues with the discussion on how anthropological models should be employed for history writing Socio political concepts such as chiefdom society or state formation should not be imposed on the contents of ancient literary sources i e the Bible but used instead to analyse our primary sources the archaeological and epigraphic records in order to create a socio historical account The final chapter attempts to provide an historical explanation regarding the emergence of Israel in ancient Palestine without relying on the Bible but only on archaeology epigraphy and anthropological insights This Israel is not the biblical one This is the Israel from history the one that the modern historian aims at recovering from the study of ancient epigraphic and archaeological remains The arguments presented challenge the idea that the biblical writers were recording historical events as we understand this practice nowadays and that we can use the biblical records for creating critical histories of Israel in ancient Palestine It also questions the existence of undisputable traces of statehood in the archaeological record from the Iron Age as the biblical

images about a United Monarchy might lead us to believe Thus drawing on ethnographic insights we may gain a better knowledge on how ancient Levantine societies functioned providing us with a context for understanding the emergence of historical Israel as a major highland patronate with a socio political life of almost two centuries It is during the later periods of ancient Palestines history the Persian and the Graeco Roman that we find the proper context into which biblical Israel is created beginning a literary life of more than two millennia One God - One Cult - One Nation Reinhard G. Kratz,Hermann Spieckermann,2010-09-27 Recent archaeological and biblical research challenges the traditional view of the history of ancient Israel This book presents the latest findings of both academic disciplines regarding the United Monarchy of David and Solomon One Nation and the cult reform under Josiah One Cult raising the issue of fact versus fiction The political and cultural interrelations in the Near East are illustrated on the example of the ancient city of Beth She an Scythopolis and are discussed as to their significance for the transformation in the conception of God One God The volume contains 17 contributions by internationally eminent scholars from Israel Finland and Germany **The End of Biblical Studies** Hector Avalos,2010-08-05 In this radical critique of his own academic specialty biblical scholar Hector Avalos urges his colleagues to concentrate on educating the broader society to recognize the irrelevance and even violent effects of the Bible in modern life

Levant during the early Iron Age and the ways in which the period may be reflected in biblical accounts.
