Summary of The Black Swan by Nassim Nicholas Taleb QuickRead, Lea Schullery, The Impact of the Highly Improbable Just because you haven't seen something doesn't mean it doesn't exist right Well Nassim Nicholas Taleb uses this exact logic to explain the Black Swans that happen in our society A Black Swan is an improbable or highly unlikely event that has three principal characteristics The first two are that it is unpredictable and it carries a massive impact The third is the ability to construct an explanation after the fact to make it appear less random and more predictable Think of events like 9/11 or the invention of Google These Black Swans while unpredictable and impactful could easily be explained in the moments following the event Black Swans like these underlie almost everything about the world But why can't we acknowledge them until after they occur Well according to Taleb humans are simply hardwired to focus on the details rather than see the big picture We concentrate only on what we know and understand therefore we are unable to conceptualize the impossible As you read you'll learn that we can learn a thing or two from turkeys you'll see how a casino's greatest threat isn't high rolling gamblers and how focusing on what we don't know is critical for making informed decisions Do you want more free book summaries like this Download our app for free at <https://www.QuickRead.com> App and get access to hundreds of free book and audiobook summaries DISCLAIMER This book summary is meant as a preview and not a replacement for the original work If you like this summary please consider purchasing the original book to get the full experience as the original author intended it to be If you are the original author of any book on QuickRead and want us to remove it please contact us at [hello.quickread.com](mailto:hello.quickread.com)

Nicholas Taleb is a philosophical treatment of Taleb's research on highly improbable high impact events. These events which Taleb calls Black Swans are so improbable that they are unpredictable. However, pundits and scholars are often inclined to fit such extreme events into a causal narrative after the fact in order to make history appear more organized. **The Black Swan** Thomas Mann, 1990     [The Black Swan](#) William Penmare (pseud. [i.e. Mavis Elizabeth Nisot.]), 1928     *The Black Swan*, 2006     *Summary of The Black Swan*, 2022-12-01

Summary of *The Black Swan*: a black swan is an extremely unlikely incident with three main characteristics. It's unpredictable, it has a significant impact, and after the event, we construct an explanation that makes it appear less random and more predictable than it actually was. Google's meteoric rise and 9/11 were black swan events. Black swans underpin essentially everything in our world, from the formation of religions to personal events. This summary will show you the main ideas of the book. Why do we wait until black swans appear before acknowledging their existence? Part of the answer is that humans are built to learn specifics when they should be learning generalities. We tend to focus on what we already know and frequently overlook what we don't know. As a result, we are unable to accurately assess opportunities; we are too prone to the urge to simplify, narrate, and categorize, and are unable to reward people who can envision the impossible.

**An Analysis of Nassim Nicholas Taleb's The Black Swan** Eric Lybeck, 2017-07-05

One of the primary qualities of good creative thinking is an intellectual freedom to think outside of the box. Good creative thinkers resist orthodox ideas, take new lines of enquiry, and generally come at problems from the kinds of angles almost no one else could. And what is more, when the ideas of creative thinkers are convincing, they can reshape an entire topic and change the orthodoxy for good.

Nassim Nicholas Taleb's 2007 bestseller *The Black Swan: The Impact of the Highly Improbable* is precisely such a book: an entertaining, polemical creative attack on how people in general and economic experts in particular view the possibility of catastrophic events. Taleb writes with rare creative verve for someone who is also an expert in mathematics, finance, and epistemology; the philosophy of knowledge, and he marshals all his skills to turn standard reasoning inside out. His central point is that far from being unimportant, extremely rare events are frequently the most important ones of all: it is highly improbable but highly consequential occurrences, what he calls Black Swans, that have shaped history most

As a result Taleb concludes improbability is not a reason to act as if a possible event does not matter Rather it should inspire the opposite reaction
