The Book Of Barely Imagined Beings A 21st Century Bestiary:

The Book of Barely Imagined Beings Caspar Henderson, 2022-12-22 Caspar Henderson takes us on an eye opening tour of real animals that no sane human could ever have invented Frans de Waal New York Times bestselling author With *The Book of Barely Imagined Beings* Caspar Henderson offers readers a fascinating beautifully produced modern day menagerie But whereas medieval bestiaries were often based on folklore and myth the creatures that abound in Henderson's book from the axolotl to the zebrafish are with one exception very much with us albeit sometimes in depleted numbers *The Book of Barely Imagined Beings* transports readers to a world of real creatures that seem as if they should be made up that are somehow more astonishing than anything we might have imagined The yeti crab for example uses its furry claws to farm the bacteria on which it feeds The waterbear meanwhile is among nature's extreme survivors able to withstand a week unprotected in outer space These and other strange and surprising species invite readers to reflect on what we value or fail to value and what we might change A powerful combination of wit cutting edge natural history and philosophical meditation *The Book of Barely Imagined Beings* is an infectious and inspiring celebration of the sheer ingenuity and variety of life in a time of crisis and change *The Book of Barely Imagined Beings* is one that Pliny would have envied Darwin applauded and Borges relished In these days of doom and gloom I can think of nothing more rejoicing than Caspar Henderson's magical book Alberto Manguel author of *A History of Reading* Magnificent bravura beautiful and astoundingly interesting *The Sunday Times* Spell binding brilliantly executed extraordinary *The Guardian*

Imperfection Telmo Pievani, 2024-02-06 In praise of imperfection how life on our planet is a catalog of imperfections errors alternatives and anomalies In the beginning there was imperfection which became the source of all things Anomalies and asymmetries caused planets to take shape from the bubbling void and sent light into darkness Life on earth is a catalog of accidents alternatives and errors that turned out to work quite well In this book Telmo Pievani shows that life on our planet has flourished and survived not because of its perfection but despite and perhaps because of its imperfection He begins his story with the disruption filled birth of the

universe and proceeds through the random DNA copying errors that fuel evolution the transformations of advantages into handicaps by natural selection the anatomical and functional jumble that is the human brain and our many bodily mismatches Along the way Pievani tells readers about the Irish elk incidentally neither Irish nor elk whose enormous antlers serve to illustrate the first two laws of imperfection the widespread dissemination of costly or useless traits and the neuroimperfection of the human brain a frozen accident of evolution that was not designed from scratch as Pievani calls it He sizes up the alleged perfection of the human body asking for example if everything in our bodies serves a purpose why do we have appendixes Why bipedalism with the inevitable back pain that results In this fascinating account Pievani offers the first comprehensive explanatory theory for the ubiquity of imperfection

Queer Defamiliarisation Palmer Helen Palmer, 2020-07-06 Helen Palmer examines the Russian formalist concept of defamiliarisation from a contemporary critical perspective bringing together new materialist feminisms experimental linguistic formalism and queer theory She explores how we might radically restructure this gesture of making strange to create a dialogue with the affirmations of deviant errant alternative and multiple modes of being which have become synonymous with queer theory Queer theory harnesses the creative potential of indeterminacy in order to celebrate and affirm infinite dimensions of sexuality and gender creating space for all human beings to express themselves without the classification or judgement of prescriptive terminologies Linguistic at its source but going beyond this limit just like defamiliarisation the liberating force of queer theory is derived from the removal of terminological boundaries Palmer asks what a 21st century queer defamiliarisation might look like and examines the extent to which these affirmative or emancipatory discourses escape the paradoxes of normativity or historicisation

studies and the growing field of ecocriticism It is the first collection that establishes a productive encounter between philosophical perspectives on the human animal boundary and those that draw on fictional literature The objective is to establish a dialogue between those disciplines with the goal of expanding the imaginative scope of human animal relationships The contributions thus do not only trace and deconstruct the boundaries dividing humans and nonhuman animals they also present the reader with alternative perspectives on the porous continuum and surprising reversal of what appears as human and what as nonhuman
