The Botany Of Desire:

The Botany of Desire Michael Pollan, 2001-06-12 The book that helped make Michael Pollan the New York Times bestselling author of *Cooked* and *The Omnivore's Dilemma* one of the most trusted food experts in America In 1637 one Dutchman paid as much for a single tulip bulb as the going price of a town house in Amsterdam Three and a half centuries later Amsterdam is once again the mecca for people who care passionately about one particular plant though this time the obsessions revolves around the intoxicating effects of marijuana rather than the visual beauty of the tulip How could flowers of all things become such objects of desire that they can drive men to financial ruin In *The Botany of Desire* Michael Pollan argues that the answer lies at the heart of the intimately reciprocal relationship between people and plants In telling the stories of four familiar plant species that are deeply woven into the fabric of our lives Pollan illustrates how they evolved to satisfy humankind's most basic yearnings and by doing so made themselves indispensable For just as we've benefited from these plants the plants in the grand co evolutionary scheme that Pollan evokes so brilliantly have done well by us The sweetness of apples for example induced the early Americans to spread the species giving the tree a whole new continent in which to blossom So who is really domesticating whom Weaving fascinating anecdotes and accessible science into gorgeous prose Pollan takes us on an absorbing journey that will change the way we think about our place in nature

The Botany of Desire Michael Pollan, 2003 Pollan tells the story of four domesticated species the apple the tulip marijuana and the potato and describes how each has thrived by satisfying humankind's most basic desires

The Botany of Desire Michael Pollan, 2008 Every schoolchild learns about the mutually beneficial dance of honeybees and flowers the bee collects the nectar and pollen to make honey and in the process spreads the flowers genes far and wide This book demonstrates how people and plants have formed a similarly reciprocal arrangement He links four fundamental desires sweetness beauty intoxication and control with the plants that satisfy them the apple the tulip marijuana and the potato In telling the stories of four familiar species Pollan illustrates how the plants have evolved to satisfy humankind's most basic yearnings And just as we've benefited from these plants these plants have also benefited at least as much from their association with us So who is really domesticating whom from Publisher

So who is really domesticating whom? **The Botany of Desire: Young Readers Edition** Michael Pollan, 2023-05-09

By the bestselling author of *The Omnivore's Dilemma*, this is Michael Pollan's ingenious companion book about the surprising and close relationship between people and plants. In this entertaining young readers edition of the environmental studies classic, Michael Pollan demonstrates how people and domesticated plants have formed a reciprocal relationship. He links four fundamental human desires—sweetness, beauty, energy, and control—with the plants that satisfy them: the apple, the tulip, coffee, and the potato. In telling the stories of four familiar species, Pollan illustrates how the plants have evolved to satisfy humankind's most basic yearnings. And just as we've benefited from these plants, we have also helped them to thrive. **Quicklet on Michael Pollan's The Botany of Desire (CliffNotes-like Summary, Analysis, and Review)** Britt Keller, 2012-03-04

Quicklets: Your Reading Sidekick ABOUT THE BOOK For look into a flower and what do you see? Into the very heart of nature's double nature—that is, the contending energies of creation and dissolution, the spiraling toward complex form and the tidal pull away from it. Apollo and Dionysus were names the Greeks gave to these two faces of nature, and nowhere in nature is their contest as plain or as poignant as it is in the beauty of a flower and its rapid passing. Published over ten years ago, Michael Pollan's *The Botany of Desire: A Plant's Eye View of The World* has had a profound impact on a generation increasingly sensitive to their interaction with nature and the environment. Teaching us to bridge gaps and take on perspectives other than our own, Pollan shows us revelatory information regarding our shared history with plants. Throughout the book, the dichotomy of the Apollonian and Dionysian are expounded upon the balance that is inherent in nature. Ideally, there is a give and take between controlled clarity and the seemingly chaotic. This extends to the reciprocal relationship between man and plant. MEET THE AUTHOR Britt Keller enjoys writing on any number of topics in order to share her understanding and perspective with others. She went to school for design but has lately become more interested in reading, writing, philosophy, etcetera. EXCERPT FROM THE BOOK *The Basic Desire* All beings are united by the most basic of desires: making copies of itself. For Pollan, the next logical step was to seriously consider the plants' point of view. More specifically, the apple, the tulip, cannabis, and the potato. While we consider them domesticated, that gives the impression that we're in charge. Unequivocally, they are in turn manipulating us, each party ensuring the survival of the other species. Further, by looking at the social history of each of these plants, we find highly accurate clues about the history of mankind. We shape them, and they shape us. In tracing our relation to the development of each plant, we unlock a multitude of implications about who we are. Whose? Domesticating Whom? Recognizing the complexity and sophistication of plants lies in appreciating the difference in direction they've taken to invent new strategies of survival. Transforming water, soil, and sunlight, they are true alchemists. Buy a copy to keep reading. Heinrich Kaan's "Psychopathia Sexualis" (1844) Heinrich Kaan, 2016-10-25 With Heinrich Kaan's book we have then what could be called the date of birth or in any case the date of the emergence of sexuality and sexual aberrations in the psychiatric field Michel Foucault *Abnormal Lectures at the Collège*

de France 1974 1975 Heinrich Kaan's fascinating work part medical treatise part sexual taxonomy part activist statement and part anti-onanist tract takes us back to the origins of sexology. He links the sexual instinct to the imagination for the first time, creating what Foucault called a unified field of sexual abnormality. Kaan's taxonomy consists of six sexual aberrations: masturbation, pederasty, lesbian love, necrophilia, bestiality, and the violation of statues. Kaan not only inaugurated the field of sexology but played a significant role in the regimes of knowledge production and discipline about psychiatric and sexual subjects. As Benjamin Kahan argues in his Introduction, Kaan's text crucially enables us to see how homosexuality replaced masturbation as the central concern of Euro-American sexual regulation. Kaan's work translated into English for the first time here opens a new window onto the history of sexuality and the history of sexology and reconfigures our understanding of Richard von Krafft-Ebing's book of the same name published some forty years later.
