The Bird Colin Tudge, 2010-09-07 How are birds so good at flying and navigating Why are birds so like mammals and yet so very different Did birds descend from dinosaurs and if so does that mean birds are dinosaurs How do they court each other and fend off rivals What s being communicated in birdsong Can we ever know how birds think In this fascinating exploration of the avian class Colin Tudge considers the creatures of the air From their evolutionary roots to their flying feeding fighting mating nesting and communicating Tudge provocatively ponders what birds actually do as well as why they do it and how With the same curiosity passion and insight he brought to redwoods pines and palm trees in his widely acclaimed book *The Tree* Tudge here studies sparrows parrots and even the Monkey eating Eagle to better understand their world and our own There is far more to a bird s existence than gliding gracefully on air currents or chirping sweetly from fence posts the stakes are life and death By observing and explaining the complex strategy that comes into play with everything from migration to social interaction to the timing of giving birth to young Tudge reveals how birds are uniquely equipped biologically to succeed and survive And he offers an impassioned plea for humans to learn to coexist with birds without continuing to endanger their survival Complete with an annotated cast list of all the known birds in the world plus gorgeous illustrations *The Bird* is a comprehensive and delightfully accessible guide for everyone from dedicated birders to casual birdwatchers that celebrates and illuminates the remarkable lives of birds

Opening Skinner's Box Lauren Slater, 2013-04-08 Through ten examples of ingenious experiments by some of psychology s most innovative thinkers Lauren Slater traces the evolution of the century s most pressing concerns free will authoritarianism conformity and morality Beginning with B F Skinner and the legend of a child raised in a box Slater takes us from a deep empathy with Stanley Milgram s obedience subjects to a funny and disturbing re creation of an experiment questioning the validity of psychiatric diagnosis Previously described only in academic journals and textbooks these often daring experiments have never before been narrated as stories chock full of plot wit personality and theme **Death at**

SeaWorld David Kirby, 2025-09-23 From the New York Times bestselling author of *Evidence of Harm* and *Animal Factory* a groundbreaking scientific thriller that exposes the dark side of SeaWorld America's most beloved marine mammal park *Death at SeaWorld* centers on the battle with the multimillion dollar marine park industry over the controversial and even lethal ramifications of keeping killer whales in captivity Following the story of marine biologist and animal advocate at the Humane Society of the US Naomi Rose Kirby tells the gripping story of the two decade fight against PR savvy SeaWorld which came to a head with the tragic death of trainer Dawn Brancheau in 2010 Kirby puts that horrific animal on human attack in context Brancheau's death was the most publicized among several brutal attacks that have occurred at Sea World and other marine mammal theme parks *Death at SeaWorld* introduces real people taking part in this debate from former trainers turned animal rights activists to the men and women that champion SeaWorld and the captivity of whales In section two the orcas act out And as the story progresses and orca attacks on trainers become increasingly violent the warnings of Naomi Rose and other scientists fall on deaf ears only to be realized with the death of Dawn Brancheau Finally he covers the media backlash the eyewitnesses who come forward to challenge SeaWorld's glossy image and the groundbreaking OSHA case that challenges the very idea of keeping killer whales in captivity and may spell the end of having trainers in the water with the ocean's top predators

The Windsor Magazine ,1922 *The Malay Archipelago, the Land of the Orang-utan and the Bird of Paradise* Alfred Russel Wallace,1877 *The New Country Life* ,1917 **Trees as Symbol and Metaphor in the Middle Ages** Michael D. J. Bintley,Pippa Salonijs,2024 WINNER AFCEMS Prize 2024 Highlights human encounters with the forest and its trees at the time of the European Middle Ages when their lofty boughs were weighted with meaning Forests with their interlacing networks of trees and secret patterns of communication are powerful entities for thinking with A majestic terrestrial community of arboreal others their presence echoes entangles and resonates deeply with the human world The chapters interrogate the pre Anthropocene environment reflecting on trees as metaphors for kinship and knowledge as they appear in literary historical art historical and philosophical sources They examine images of trees and trees in themselves across a range of environmental material and intellectual contexts and consider how humans used arboreal and rhizomatic forms to negotiate bodies of knowledge and processes of transition Looking beyond medieval Europe they include discussion of parallel developments in the Islamic world and that of the M ori the indigenous people of New Zealand The Malay Archipelago Alfred Russel Wallace,1898 *Learning and Memory* David A. Lieberman,2011-12-08 This innovative textbook is the first to integrate learning and memory behaviour and cognition It focuses on fascinating human research in both memory and learning while also bringing in important animal studies and brings the reader up to date with the latest developments in the subject Students are encouraged to think critically key theories and issues are looked at in detail descriptions of experiments include why they were done and how examining the method can help evaluate competing

viewpoints By looking at underlying cognitive processes students come away with a sense of learning and memory being interrelated actions taken by the same human being rather than two separate activities Lively and engaging writing is supported by lots of examples of practical applications that show the relevance of lab based research to everyday life Examples include treatments for phobias and autism ways to improve eyewitness testimony and methods of enhancing study techniques *The Wilson Bulletin* ,1926 Cognitive Science and the New Testament István Czachesz,2017 Over the last few decades our knowledge of how the human mind and brain works increased dramatically The field of cognitive science enables us to understand religious traditions rituals and visionary experiences in novel ways This has implications for the study of the New Testament and early Christianity How people in the ancient Mediterranean world remembered sayings and stories what they experienced when participating in rituals how they thought about magic and miracle and how they felt and reasoned about moral questions all of that can be now better understood with the help of insights from cognitive science Istvan Czachesz argues that the field of New Testament Studies witnesses the beginning of a cognitive turn He surveys relevant developments in the Cognitive Science of Religion and explores the field of cognitive and behavioral sciences in search of opportunities of gaining new insights about biblical materials Czachesz presents some methodological tools and initial steps together with a large number of examples of applying the cognitive approach to the New Testament and related ancient literature *Magic in the Ancient Eastern Mediterranean* Nina Nikki,Kirsi M.J. Valkama,2020-12-14 Magic in the Ancient Eastern Mediterranean Cognitive Historical and Material Perspectives brings together articles with the shared conviction that the category of magic remains useful in religious studies and provides new insights to biblical and related texts and artifacts Historically magic has been considered in both scholarly and popular discourse to be questionable obscure and potentially subversive 19th century scholars of religion viewed magical beliefs and practices as primitive and inferior compared to Judeo Christian forms of worship which were considered true religion More recently the category has been defended especially by scholars of the cognitive science of religion who find it useful for delineating a set of beliefs and practices fundamental to all forms of religion The volume joins current scholarship in refraining from using the concept as an othering device and in arguing that it can still serve as a helpful analytical tool In addition to analyzing the discourse on magic in both ancient literature and modern scholarship the articles provide individual examples of how literary and material culture attest to the existence of magical beliefs and practices in sources from the Ancient Near East to the Byzantine Period The book is divided into three parts The contributions in the first part approach magic from the theoretical perspective of cognitive studies ritual studies and cultural evolution while the rest of the book focuses on how magic and magicians are understood in ancient sources The second part discusses a specific set of textual material dealing with blessings and curses The third part of the volume discusses the world of various destructive celestial beings from which one and one's loved ones had to be defended as well as the multitude of protective beings such as angels The Pioneer Families of Cleveland

1796-1840 Gertrude Van Rensselaer Wickham, 1914 *The Oxford Handbook of Early Christian Ritual* Risto Uro, Juliette Day, Rikard Roitto, Richard E. DeMaris, 2019 The Handbook provides an indispensable account of the ritual world of early Christianity from the beginning of the movement up to the end of the sixth century

Behaviorism, Consciousness, and the Literary Mind Joshua Gang, 2021-11-16 What might behaviorism that debunked school of psychology tell us about literature If inanimate objects such as novels or poems have no mental properties of their own then why do we talk about them as if they do Why do we perceive the minds of characters narrators and speakers as if they were comparable to our own In Behaviorism Consciousness and the Literary Mind Joshua Gang offers a radical new approach to these questions which are among the most challenging philosophical problems faced by literary study today Recent cognitive criticism has tried to answer these questions by looking for similarities and analogies between literary form and the processes of the brain In contrast Gang turns to one of the twentieth century's most infamous psychological doctrines behaviorism Beginning in 1913 a range of psychologists and philosophers including John B Watson B F Skinner and Gilbert Ryle argued that many of the things we talk about as mental phenomena aren't at all interior but rather misunderstood behaviors and physiological processes Today behaviorism has relatively little scientific value but Gang argues for its enormous critical value for thinking about why language is so good at creating illusions of mental life Turning to behaviorism's own literary history Gang offers the first sustained examination of the outmoded science's place in twentieth century literature and criticism Through innovative readings of figures such as I A Richards the American New Critics Samuel Beckett Harold Pinter and J M Coetzee Behaviorism Consciousness and the Literary Mind reveals important convergences between modernist writers experimental psychology and analytic philosophy of mind while also giving readers a new framework for thinking about some of literature's most fundamental and exciting questions
