Laws of the General Assembly of the Commonwealth of Pennsylvania Pennsylvania, 1873 Functional Heads,

Volume 7 Laura Brugé, Anna Cardinaletti, Giuliana Giusti, Nicola Munaro, Cecilia Poletto, 2012-06-20 Over the last two decades functional heads have been one of the privileged objects of research in generative linguistics. However within this line of inquiry two alternative approaches have developed while the cartographic project considers crosslinguistic evidence as crucial for a complete mapping of functional heads in universal grammar minimalist accounts tend to consider structural economy as literally involving a reduction in the number of available heads. In this volume some of the most influential linguists who have participated in this long lasting debate offer their recent work in short self contained case studies. The contributions cover all the main layers of recently studied syntactic structure including such major areas of empirical research as grammaticalization and language change standard and non standard varieties interface issues and morphosyntax Functional Heads attempts to map aspects of syntactic structure according to the cartographic approach and in doing so demonstrates that the differences between cartography and minimalism are perhaps more superficial than substantial

Department of Printed Books, 1968 Fenua and Fare, Marae and Mana Jennifer G. Kahn, 2025-05-31 In 1767 the shores of Tahiti first appeared in the sights of Captain Samuel Wallis and ever since this tropical locale has captured the imagination of explorers merchants missionaries historians anthropologists archaeologists and others Fenua and Fare Marae and Mana brings readers back to the time before European contact starting with the settlement of the archipelago by Polynesian voyagers or the M ohi some 1 000 years ago From the massive stone ruins of chiefly households agricultural terraces and religious temples marae to sacred foods clothing and war cults Jennifer G Kahn delves into every aspect of M ohi life Drawing on current anthropological and archaeological research and data from her own field research and that of others Kahn explores the development of M ohi politics economies religion and social relationships and their connections to the local environment Anthropologists and archaeologists have previously investigated how ecology and natural resources demographic growth and cultural factors such as status rivalry religion and ideology spurred sociopolitical changes in the Society Islands But how did M ohi settlements coalesce into the powerful chiefdoms encountered by Captain Cook in the late 1700s Synthesizing a vast amount of archaeological data oral histories and historical accounts Kahn traces changes in M ohi material culture land use diet subsistence agriculture settlement patterns environment and residential and ritual architecture to present the first authoritative cultural sequence for the pre contact Society Islands She also addresses a long standing debate in historical anthropology by arguing that M ohi society had multiple tiers of chiefs and settlement hierarchies prior to European contact thus forming a complex chiefdom Integrating anthropology archaeology indigenous history and theory Kahn lays out a new model for interpreting complex chiefdoms that blends bottom up and top down perspectives on social change With special attention to inequality and environmental change Fenua and Fare uses collective action theory to develop a more nuanced political history of social change offering fresh insight on the lives and interactions of commoners land managers high chiefs and secondary chiefs Readers will come away with a new appreciation for how social inequality blooms and grows not just in the Society Islands

Islands of Hope Paul D'Arcy, Daya Dakasi Da-Wei Kuan, 2023-05-25 In the Pacific as elsewhere indigenous communities live with the consequences of environmental mismanagement and over exploitation but rarely benefit from the short term economic profits such actions may generate within the global system National and international policy frameworks ultimately rely on local community assent Without effective local participation and partnership these extremely imposed frameworks miss out on millennia of local observation and understanding and seldom deliver viable and sustained environmental cultural and economic benefits at the local level This collection argues that environmental sustainability indigenous political empowerment and economic viability will succeed only by taking account of distinct local contexts and cultures In this regard these Pacific indigenous case studies offer islands of hope for all communities marginalised by increasingly intrusive and increasingly rapid technological changes and by global dietary economic political and military forces with whom they have no direct contact or influence
