The Built Up Ship Model Charles G Davis:

The Built-up Ship Model Charles Gerard Davis,1966 The Built-Up Ship Model Charles G. Davis,2012-08-09 A highly detailed superbly illustrated manual introducing serious model builders to hand crafting ship models from the bottom up Not for beginners 133 illustrations The Man Who Thought like a Ship Loren C. Steffy,2012-04-30 J Richard Dick Steffy stood inside the limestone hall of the Crusader castle in Cyprus and looked at the wood fragments arrayed before him They were old beyond belief For more than two millennia they had remained on the sea floor eaten by worms and soaking up seawater until they had the consistency of wet cardboard There were some 6 000 pieces in all and Steffy s job was to put them all back together in their original shape like some massive ancient jigsaw puzzle He had volunteered for the job even though he had no qualifications for it For twenty five years he d been an electrician in a small land locked town in Pennsylvania He held no advanced degrees his understanding of ships was entirely self taught Yet he would find himself half a world away from his home town planning to reassemble a ship that last sailed during the reign of Alexander the Great and he planned to do it using mathematical formulas and modeling techniques that he d developed in his basement as a hobby The first person ever to reconstruct an ancient ship from its sunken fragments Steffy said ships spoke to him Steffy joined a team including friend and fellow scholar George Bass that laid a foundation for the field of nautical archaeology Eventually moving to Texas A M University his lack of the usual academic credentials caused him to be initially viewed with skepticism by the university s administration However his impressive record of publications and his skilled teaching eventually led to his being named a full professor During the next thirty years of study reconstruction and modeling of submerged wrecks Steffy would win a prestigious MacArthur Foundation genius grant and would train most of the preeminent scholars in the emerging field of nautical archaeology Richard Steffy s son Loren an accomplished journalist has mined family memories archives at Texas A M and elsewhere his father s papers and interviews with former colleagues to craft not only a professional biography and adventure story of the highest caliber but also the first history of a field that continues to harvest important new discoveries from the depths of the world s oceans *The Building of a Wooden Ship* Charles Davis,2014-01-25 When the United States entered World War I the United States Shipping Board Emergency Fleet Corporation ramped up construction of cargo ships for the war effort Even though steel was the modern material from which to construct ships the EFC decided to use the many shipyards still building ships of wood to quickly meet the need for more ships To train new employees in how to build wooden ships naval architect Charles Davis wrote *The Building of a Wooden Ship* Instead of the poor quality copies of this book available from most publishers ours was carefully scanned from an original copy at a resolution intended for print reproduction The fold out plan pages not present in other available reprints have been moved to the back of the book and scanned as multiple separate single sided pages so they can be removed and reassembled if the reader should so choose
