Clarification Calcium Carbonate We've had some questions from readers regarding the use of the term calcium carbonate which is listed as an ingredient in a number of the diets found in this book and therefore wanted to clarify what is meant by this ingredient Baking soda comes in two forms sodium bicarbonate and calcium carbonate The sodium bicarbonate version is widely available as baking soda and is commonly used in baking but none of the recipes in this book use it as an ingredient The calcium carbonate version of baking soda is sometimes sold as baking soda substitute and sometimes referred to as simply baking soda To avoid confusing sodium bicarbonate and calcium carbonate any time the calcium carbonate type of baking soda has been used in a diet in this book the ingredient includes the specific term calcium carbonate There are several manufacturers of calcium carbonate baking soda for example Amazon carries the Ener-G Foods product baking soda substitute Calcium carbonate can also be sold for garden use which is non food grade so to avoid the use of the garden product in foods the term baking soda was used in this book instead to indicate that readers should be sure to select a food appropriate ingredient

Taurine in Health and Disease Ryan J. Huxtable, Dietrich Michalk, 2013-11-21 Taurine or 2-aminoethane sulfonic acid has long been known to be the major organic product formed from the breakdown of the sulfur-containing amino acids methionine and cysteine It is excreted as such in the urine or as bile acid conjugates in the bile Research over the last 25 years however has uncovered an amazing variety of phenomena involving taurine Despite the fact that the mechanism of action of taurine in some of these phenomena remains to be elucidated it is clear that taurine is of far more physiological relevance than being the mere metabolic debris of sulfur amino acid catabolism It also has numerous pharmacological actions that are beginning to be developed as exemplified by some of the studies reported in this volume This volume reports the proceedings of the latest of a series of international symposia continuing on from the initial meeting held in Tucson Arizona in 1975 The latest symposium was the first to be held in Germany in Cologne from August 29 through September 1 1993 It continued the

multidisciplinary approach that has been the norm for taurine symposia We hope the publication of the proceedings will stimulate further investigations on this simple but fascinating compound
