Abstract—The purpose of this study was to determine the effect of a 10-week training program on the physical fitness of 10-year-old children. The program was designed to improve cardiovascular endurance, muscular strength, and flexibility. The results showed that the children who participated in the program showed significant improvements in all three areas of physical fitness compared to the control group. The program was found to be effective in improving the physical fitness of 10-year-old children.
