Simulators Derailed Technology Compatibility And Social Systems:

Simulators Derailed: Technology Compatibility and Social Systems Gregory Tibbits, 2014-11-03 Simulator technology for training is well received and much used in many industries particularly the aviation industry However in the rail industry it is not well accepted by its primary users train drivers and is not used to its full potential A theoretical framework to analyse culture originally proposed by Pierre Bourdieu and in particular his concepts of capital field and habitus are used to explain the compatibility and the use of the simulator The main finding of this study is that the rail industry is incompatible with simulator technology for training In particular the value and attitudes associated with training can explain much of the observed use and acceptance of simulator technology A tool called the Capital x Capital y CxCy culture map was developed to assist in describing and predicting technological compatibility This has applications across industrial settings

Urban Transportation Abstracts ,1986 Engineering Psychology and Human Performance Christopher D. Wickens, William S. Helton, Justin G. Hollands, Simon Banbury, 2021-09-27 Forming connections between human performance and design this new edition of Engineering Psychology and Human Performance examines human machine interaction The book is organized directly from a psychological perspective of human information processing and chapters correspond to the flow of information as it is processed by a human being from the senses through the brain to action rather than from the perspective of system components or engineering design concepts Upon completing this book readers will be able to identify how human ability contributes to the design of technology understand the connections within human information processing and human performance challenge the way they think about technology s influence on human performance and show how theoretical advances have been or might be applied to improving human machine interactions This new edition includes the following key features A new chapter on research methods Sections on interruption management and distracted driving as cogent examples of applications of engineering psychology theory to societal problems A greatly increased number of references to pandemics technostress and misinformation New applications Amplified emphasis on readability and commonsense examples Updated and new references throughout the text This book is ideal for psychology and engineering students as well as practitioners in engineering psychology human performance and human factors The text is also supplemented by online resources for students and instructors
