

To Operate the Hand Machine

Tighten the balance wheel (see Fig. 1) and place a piece of material under the presser foot (8, Fig. 8). Then lower the latter by means of the lifter (4, Fig. 8). Now turn the handle over from you to work the machine, without its being threaded, until you are accustomed to guiding the material with the left hand.

The advantages of a treadle machine, or better still, one electrically fitted, are: Higher speed, and, both hands being free, a greater variety of work. A Singer Motor may be applied to your machine at any time (see page 2 of this book).

To Ensure Perfect Action of the Machine

The balance wheel must always turn over towards you.

Do not work the machine with the presser foot lowered or with the bobbin case and the needle threaded, except when sewing.

The slide over the bobbin case must be kept closed.

To Remove the Bobbin Case and Bobbin

Fig. 2 Latch

Turn the balance wheel towards you until the take-up lever (3, Fig. 8) is at its highest point. Draw open the slide in the bed of the machine and, with the thumb and forefinger of the left hand, open the latch (see Fig. 2) and withdraw the bobbin case.

While the latch is held open, the bobbin is retained in its case. On retracting the latch and turning the case downward, the bobbin will drop out.

To Wind the Bobbin (See Fig. 2)

Loosen the balance wheel (see Fig. 1) and place a reel of thread on the pin (1). Place an empty bobbin on the spindle (2) and turn the former until the slot in its right side engages the pin in the spindle shoulder. Draw the thread under and between the tension discs (7) and pass it, from the inside, through one of the holes in the left side of the bobbin and hold the end of thread. Now press down on the winder and the latch (4) will drop and retain the pulley (6) against the ledge of the balance wheel. Turn the latter over towards you until a few coils are wound and then break off the end of thread. Operate the machine until the bobbin is full, when the winder will stop automatically.
