Lesson Sequence: Day 1 - Warm-up/Introduction: Review population dynamics—factors that influence the numbers within a population. Students will write down on a piece of paper the things that they think will cause a population to change size. They will also answer the question what does a limiting factor mean. This will be the grouping strategy for how students will be paired up for the rest of the lesson. Students will work independently to answer the questions: What are some factors that would cause a population to grow? and What are some limiting factors which would cause a population to die? As a class we will discuss these answers and chart the answers. Mini-Lesson: - There will be two mini-lessons within this lab. - The first mini lesson will be about how to change a fraction to decimal to percent. - We will go over an example as a class together, 2/10 and they will work independently to change it to a decimal and a percent. As a class we will discuss the different ways you can go about doing this. Guided Practice:
