Understanding the Military Design Movement Ben Zweibelson,2023-06-09 This book explains the history and development of the military design movement featuring case studies from key modern militaries Written by a practitioner the work shows how modern militaries think and arrange actions in time and space for security affairs and why designers are disrupting challenging and reconceptualizing everything previously upheld as sacred on the battlefield It is the first book to thoroughly explain what military design is where it came from and how it works at deep philosophically grounded levels and why it is potentially the most controversial development in generations of war fighters The work explains the tangled origins of commercial design and that of designing modern warfare the rise of various design movements and how today s military forces largely hold to a Newtonian stylization built upon mimicry of natural science infused with earlier medieval and religious inspirations Why does our species conceptualize war as such and how do military institutions erect barriers that become so powerful that efforts to design further innovation require entirely novel constructs outside the orthodoxy The book explains design stories from the Israel Defense Force the US Army the US Marine Corps the Canadian Armed Forces and the Australian Defence Force for the first time and includes the theory doctrine organizational culture and key actors involved Ultimately this book is about how small communities of practice are challenging the foundations of modern defence thinking This book will be of much interest to students of military and strategic studies defence studies and security studies as well as design educators and military professionals

Hagan, 2023-04-18 Unleashing the potential that can be found in the space between words and images Designers have long understood that image text and typeface can work together to produce new meanings creating semiotic registers impossible to achieve with image or text alone In *The Space Between Look and Read* a study of complementary meaning in design Susan Hagan presents a framework called Inter play which explains how these new

meanings emerge Inter play is not simply an analytical tool it is also a method for using complementary meaning to encourage critical thinking in design audiences Drawing from cognitive psychology art theory discourse analysis design and rhetoric Hagan breaks down the synthesis of looking and reading into a complex series of registers which are revealed through examples of excellent design Thus the book is both a theoretical exploration of how designers communicate and a casebook in communication well achieved From the physiology of vision to the limits of language from Allan Paivio to Uwe Loesch *The Space Between Look and Read* expands our understanding of complementary design and argues that by engaging audiences through multiple cognitive registers complementary design serves as a cognitive tool helping audiences reach new conclusions about complex problems

Meaningful Stuff Jonathan Chapman, 2021-08-03 An argument for a design philosophy of better not more Never have we wanted owned and wasted so much stuff Our consumptive path through modern life leaves a wake of social and ecological destruction sneakers worn only once bicycles barely even ridden and forgotten smartphones languishing in drawers By what perverse alchemy do our newest coolest things so readily transform into meaningless junk In *Meaningful Stuff* Jonathan Chapman investigates why we throw away things that still work and shows how we can design products services and systems that last Obsolescence is an economically driven design decision a plan to hasten a product's functional or psychological undesirability Many electronic devices for example are intentionally impossible to dismantle for repair or recycling their brief use career proceeding inexorably to a landfill A sustainable design specialist who serves as a consultant to global businesses and governmental organizations Chapman calls for the decoupling of economic activity from mindless material consumption and shows how to do it Chapman shares his vision for an experience heavy material light design sensibility This vital and timely new design philosophy reveals how meaning emerges from designed encounters between people and things explores ways to increase the quality and longevity of our relationships with objects and the systems behind them and ultimately demonstrates why design can and must lead the transition to a sustainable future

Leading Public Design Christian Bason, 2017-01-25 This powerful new book provides a clear framework for understanding and learning an emerging management practice leading public design Drawing on more than a decade of work on public sector innovation Christian Bason uses his extensive practical experience and research conducted among public managers in the UK the US Australia Finland and Denmark to explore how public organisations can be redesigned from the outside in shaping policies and services that are truly experienced as useful and meaningful to citizens and which leverage all of society's resources to co produce better outcomes

Through detailed case studies the book presents six management practices which leaders in government can use to involve citizens staff and other stakeholders in innovation processes It shows how managers can challenge their own assumptions leverage empathy with citizens handle divergence navigate unknown territory experiment and rehearse future solutions through prototyping and create more public value Ultimately Leading public design provides a pathway to a new and different way of governing public institutions human centred governance As a more relational networked interactive and reflective approach to running organisations this emerging governance model promises a more human yet effective public sector

Making Design Theory Johan Redstrom, 2017-09-01 A new approach to theory development for practice driven research proposing that theory is something made in and through design Tendencies toward academization of traditionally practice based fields have forced design to articulate itself as an academic discipline in theoretical terms In this book Johan Redstr m offers a new approach to theory development in design research one that is driven by practice experimentation and making Redstr m does not theorize from the outside but explores the idea that just as design research engages in the making of many different kinds of things theory might well be one of those things it is making Redstr m proposes that we consider theory not as stable and constant but as something unfolding something acted as much as articulated inherently fluid and transitional Redstr m describes three ways in which theory in particular formulating basic definitions is made through design the use of combinations of fluid terms to articulate issues the definition of more complex concepts through practice and combining sets of definitions made through design into programs These are the building blocks for creating conceptual structures to support design Design seems to thrive on the complexities arising from dichotomies form and function freedom and method art and science With his idea of transitional theory Redstr m departs from the traditional academic imperative to pick a side theory or practice art or science Doing so he opens up something like a design space for theory development within design research

Being and the Screen Stephane Vial, 2019-11-12 How digital technology is profoundly renewing our sense of what is real and how we perceive Digital technologies are not just tools they are structures of perception They determine the way in which the world appears to us For nearly half a century technology has provided us with perceptions coming from an unknown world The digital beings that emerge from our screens and our interfaces disrupt the notion of what we experience as real thereby leading us to relearn how to perceive In *Being and the Screen* St phane Vial provides a philosophical analysis of technology in general and of digital technologies in particular that relies on the observation of experience phenomenology and the history of technology epistemology He explains that technology is no longer separate from ourselves if it ever was Rather we are as much a part of the machine as the machine is part of us Vial argues that the so called difference between the real and the virtual does not exist and never has We are living in a hybrid environment which is both digital and nondigital online and offline With this book Vial endows philosophical meaning to what we experience daily in our digital age In *A Short Treatise on Design* Vial offers a concise introduction to the discipline of design not a history book

but a book built of philosophical problems developing a theory of the effect of design This book is published with the support of the University of Nantes France

Design, When Everybody Designs Ezio Manzini, 2015-03-06 The role of design both expert and nonexpert in the ongoing wave of social innovation toward sustainability In a changing world everyone designs each individual person and each collective subject from enterprises to institutions from communities to cities and regions must define and enhance a life project Sometimes these projects generate unprecedented solutions sometimes they converge on common goals and realize larger transformations As Ezio Manzini describes in this book we are witnessing a wave of social innovations as these changes unfold an expansive open co design process in which new solutions are suggested and new meanings are created Manzini distinguishes between diffuse design performed by everybody and expert design performed by those who have been trained as designers and describes how they interact He maps what design experts can do to trigger and support meaningful social changes focusing on emerging forms of collaboration These range from community supported agriculture in China to digital platforms for medical care in Canada from interactive storytelling in India to collaborative housing in Milan These cases illustrate how expert designers can support these collaborations making their existence more probable their practice easier their diffusion and their convergence in larger projects more effective Manzini draws the first comprehensive picture of design for social innovation the most dynamic field of action for both expert and nonexpert designers in the coming decades

Experience Design Peter Benz, 2014-12-18 How can we design better experiences Experience Design brings together leading international scholars to provide a cross section of critical thinking and professional practice within this emerging field Contributors writing from theoretical empirical and applied design perspectives address the meaning of experience draw on case studies to explore ways in which specific experiences can be designed examine which methodologies and practices are employed in this process and consider how experience design interrelates with other academic and professional disciplines Chapters are grouped into thematic sections addressing positions objectives and environments and interactions and performances with individual case studies addressing a wide range of experiences including urban spaces the hospital patient museum visitors mobile phone users and music festival and restaurant goers

How Artifacts Afford Jenny L. Davis, 2020-08-11 A conceptual update of affordance theory that introduces the mechanisms and conditions framework providing a vocabulary and critical perspective Technological affordances mediate between the features of a technology and the outcomes of engagement with that technology The concept of affordances which migrated from psychology to design with Donald Norman's influential 1988 book *The Design of Everyday Things* offers a useful analytical tool in technology studies but Jenny Davis argues in *How Artifacts Afford* it is in need of a conceptual update Davis provides just such an update introducing the mechanisms and conditions framework which offers both a vocabulary and necessary critical perspective for affordance analyses

Design and Political Dissent Jilly Traganou, 2020-10-27 This book examines through an interdisciplinary lens the relationship between political dissent and

processes of designing In the past twenty years theorists of social movements have noted a diversity of visual and performative manifestations taking place in protest while the fields of design broadly defined have been characterized by a growing interest in activism The book's premise stems from the recognition that material engagement and artifacts have the capacity to articulate political arguments or establish positions of disagreement Its contributors look at a wide array of material practices generated by both professional and nonprofessional design actors around the globe exploring case studies that vary from street protests and encampments to design pedagogy and community empowerment projects For students and scholars of design studies urbanism visual culture politics and social movements this book opens up new perspectives on design and its place in contemporary politics

Nordic Contributions in IS Research Susanne Stigberg, Joakim Karlsen, Harald Holone, Cathrine Linnes, 2017-07-28 This book constitutes the proceedings of the 8th Scandinavian Conference on Information Systems SCIS 2017 held in Halden Norway in August 2017 The 11 full papers presented in this volume were carefully reviewed and selected from 24 submissions They focus on so called smart systems that prevail in many areas and influence work processes communication leisure activities and lifelong learning and they deal with questions in design implementation and adaptation in organizations

Designing Publics Christopher A. Le Dantec, 2016-09-16 An exploration of design considerations in the design of technologies that support local collective action Contemporary computing technologies have thoroughly embedded themselves in every aspect of modern life conducting commerce maintaining and extending our networks of friends and mobilizing political movements all occur through a growing collection of devices and services designed to keep and hold our attention Yet what happens when our attention needs to be more local collective and focused on our immediate communities Perhaps more important how can we imagine and create new technologies with local communities In *Designing Publics* Christopher Le Dantec explores these questions by designing technologies with the urban homeless Drawing on a case study of the design of a computational infrastructure in a shelter for homeless women and their children Le Dantec theorizes an alternate vision of design in community contexts Focusing on collective action through design Le Dantec investigates the way design can draw people together on social issues and create and sustain a public By designing publics he refers both to the way publics arise out of design intervention and to the generative action publics take how they do design as they mobilize and act in the world This double lens offers a new view of how design and a diverse set of design practices circulate in sites of collective action
