Plan the Pacific Summit World Government and Germania Good Life *The Oxford English Dictionary*, 1989 *Problem solving activities in post-editing and translation from scratch* Jean Nitzke, 2019 Companies and organisations are increasingly using machine translation to improve efficiency and cost effectiveness and then edit the machine translated output to create a fluent text that adheres to given text conventions This procedure is known as post editing Translation and post editing can often be categorised as problem solving activities When the translation of a source text unit is not immediately obvious to the translator or in other words if there is a hurdle between the source item and the target item the translation process can be considered problematic Conversely if there is no hurdle between the source and target texts the translation process can be considered a task solving activity and not a problem solving activity This study investigates whether machine translated output influences problem solving effort in internet research syntax and other problem indicators and whether the effort can be linked to expertise A total of 24 translators twelve professionals and twelve semi professionals produced translations from scratch from English into German and monolingually post edited machine translation output for this study The study is part of the CRITT TPR DB database The translation and monolingual post editing sessions were recorded with an eye tracker and a keylogging program The participants were all given the same six texts two texts per task Different approaches were used to identify problematic translation units First internet research behaviour was considered as research is a distinct indicator of problematic translation units Then the focus was placed on syntactical structures in the MT output that do not adhere to the rules of the target language as I assumed that they would cause problems in the monolingual post editing tasks that would not occur in the translation from scratch task Finally problem indicators were identified via different parameters like Munit which indicates how often the participants created and modified one translation unit or the inefficiency InEff value of translation units i.e. the number of produced and deleted tokens divided by the final length of the translation Finally the study highlights how these parameters can be used to identify problems in the translation process data using mere keylogging data

Baseball in Europe Josh Chetwynd, 2019-10-18 With the success of The Netherlands in the World Baseball Classic baseball in Europe has begun to receive more attention But few realize just how far back the sport's history stretches on the continent Baseball has been played in Europe since the 1870s and in several countries the players and devoted followers have included royalty Hall of Famers from the U.S. major leagues and captains of industry Featuring approximately 80 new interviews and 70 new photos and images this second edition builds extensively on the previous edition's country by country histories of more than 40 European nations Also included are two new appendices on European players signed by MLB organizations and European countries performance in worldwide rankings Red Mitten Nationalism Estée Fresco, 2022-12-15 When Canada hosted the 1976 Montreal Olympics few Canadian spectators waved flags in the stands By 2010 in the run up to the Vancouver Olympics thousands of Canadians wore red mittens with white maple leaves on the palms In doing so they turned their hands into miniature flags that flew with even a casual wave Red Mitten Nationalism

investigates this shift in Canadian displays of patriotism by exploring how common understandings of Canadian history and identity are shaped at the intersection of sport commercialism and nationalism Through case studies of recent Canadian hosted Olympic and Commonwealth Games Est e Fresco argues that representations of Indigenous Peoples cultures are central to the way everyday Canadians corporations and sport organizations remember the past and understand the present Corporate sponsors and games organizers highlight selective ideas about the nation s identity and unacknowledged truths about the history and persistence of Settler colonialism in Canada haunt the commercial and cultural features of these sporting events Commodities that represent the nation from disposable trinkets to carefully curated objects of nostalgia are not uncomplicated symbols of national pride but rather reminders that Canada is built on Indigenous land and Settlers profit from its natural resources Red Mitten Nationalism challenges readers to re evaluate how Canadians use sport and commercial practices to express their patriotism and to understand the impact of this expression on the current state of Indigenous Settler relations

Urban Society and Monastic Lordship in Reading, 1350-1600 Joe Chick,2022 Interrogates the standard view of turbulent and violent town abbey relations through a combination of traditional and new research techniques The power of the medieval Church stretched far beyond the religious sphere Bishops and monasteries held lordship over vast areas of the realm often wielding political and judicial powers beyond those of secular lords Early twentieth century scholarship tended to view towns with monastic lords as highly distinctive characterised by robust lordship and violent town abbey relations and though subsequent studies have done much to modify this view of relationships between towns and their monastic lords the shadow of this dramatic interpretation still colours our understanding of these situations Conversely through a detailed examination of the governmental guild parish and testamentary records of Reading one of the more populous monastic towns of the period this book presents a view of town abbey relations as largely non violent thus problematising the more traditional characterisation and interrogating its universality Uncovering a remarkably swift transition from monastic lordship to self government it illuminates how urban society functioned under two very different regimes both before and after the dissolution of the monasteries By combining traditional research methods with Social Network Analysis the author moves beyond a focus on the political elites and institutionalised bodies such as the corporation to look at lower status members of society and how they interacted with the successive governing authorities In particular it investigates what continuities and changes to local governance they experienced during this turbulent period **Disciplined Natives** Satadru Sen,2012 This volume examines three interrelated aspects of the history of British India race the disciplining institution and attempts by the colonized to imagine states of freedom They deal with sites as diverse as the prison the family the classroom the playing field and children s literature The essays confront the ideological social and political ramifications of the fact that even as metropolitan prisons and schools shifted their attention from the body to the confined soul colonial disciplinary institutions ensured that race was firmly attached to the body and its habits They also engage the historiography that has sought to underline the challenges of reconciling Michel Foucault and Edward Said They ask whether the liberating possibilities of the racialized and embodied native self were confined to inversions and rearrangements of given normative hierarchies or if we can occasionally glimpse radical departures and alternative configurations of power
