Systemic Creative Cognition Frédéric Vallée-Tourangeau, 2023-06-30 This unique book explores how the conceptual framework of science and technology studies can be applied to creativity and problem solving research drawing from and building on the work of Bruno Latour Using an interdisciplinary approach the book outlines new research practices to capture the origin of ideas Latour enjoins researchers to adopt a resolutely ethnographic methodology to trace the process by which a creative product be it a technological innovation or a work of art is constructed or instigated Creativity is explained in terms of the microprocesses that guide and constrain the development of a new idea These microprocesses operate on and are triggered by material objects be they maquettes models drafts or data representations The resulting perspective is systemic casting creativity as emerging from the interaction among heterogeneous elements and actants The book provides critical reflections on problem solving research and stresses the importance of William James's radical empiricism and the primary role of experience The book redefines the concept of insight as an outcome rather than the cause of a new idea The book uses the work of Latour to cast a new light on the field of creative cognition and will be an essential read for researchers and students of creativity and cognition It will also be relevant for anyone interested in understanding the origin of creativity ideas and thoughts

responds to the question What is the meaning of being for Edith Stein In Finite and Eternal Being Stein tentatively concludes that being is the unfolding of meaning Neither Stein nor her commentators have elaborated much on this suggestive phrase Thomas Gricoski argues that Stein s mature metaphysical project can be developed into an ontology of unfolding The differentiating factor of this ontology is its resistance to both existentialism and essentialism The ontology of unfolding is irreducibly relational Being Unfolded proceeds by testing a relational hypothesis against Stein s theory of the modes of being actual essential and mental being From the phenomenological perspective Gricoski examines Stein s theory of the relation of consciousness and being From the scholastic perspective he examines Stein s account of the relation of essence and existence in material being living being and human being And from both perspectives he considers the relation of divine being to actual being and their essences This book is limited to Stein s theory of the meaning of being without making an explicit confrontation with Heidegger It offers two primary contributions to Stein studies a systematic analysis of Stein s modes of being especially essential being and an exposition and expansion of her overlooked concept of unfolding Being Unfolded also contributes to the broader field of contemporary metaphysics by developing Stein s theory of being as an experiment in fundamental ontology While other relational ontologies focus on relations between beings this exploration of unfolding examines being s inner self relationality *The Stamp Artist's Project Book* Sharilyn Miller,2001 Once Lady Leonie cursed 2the Black Wolf 2 handsome Rolfe d 2Ambert the mercenary Lord of Kempston for his bloody deeds and cruelty to the local peasants Now she must marry the magnificent blackguard to bring peace to the land Young innocent and
