Sacks, 2012-09-11 National Jewish Book Awards 2012 Finalist Dorot Foundation Award for Modern Jewish Thought and

Experience An impassioned erudite thoroughly researched and beautifully reasoned book from one of the most admired religious thinkers of our time that argues not only that science and religion are compatible but that they complement each other and that the world needs both Atheism deserves better than the new atheists states Rabbi Jonathan Sacks whose methodology consists of criticizing religion without understanding it quoting texts without contexts taking exceptions as the rule confusing folk belief with reflective theology abusing mocking ridiculing caricaturing and demonizing religious faith and holding it responsible for the great crimes against humanity Religion has done harm I acknowledge that But the cure for bad religion is good religion not no religion just as the cure for bad science is good science not the abandonment of science Rabbi Sacks s counterargument is that religion and science are the two essential perspectives that allow us to see the universe in its three dimensional depth Science teaches us where we come from Religion explains to us why we are here Science is the search for explanation Religion is the search for meaning We need scientific explanation to understand nature We need meaning to understand human behavior There have been times when religion tried to dominate science And there have been times including our own when it is believed that we can learn all we need to know about meaning and relationships through biochemistry neuroscience and evolutionary psychology In this fascinating look at the interdependence of religion and science Rabbi Sacks explains why both views are tragically wrong *Report of the ... universe since the beginning of space time Also the interpretation of the earth s history recorded in the rocks and rock structures the history of life recorded as fossils in time rock sequences and their relation to present day living forms and associated environments has become more clear as to man s place in the history of space time All these studies have led to a better understanding of how energy drives the forces at work that produce the ever changing present What are changes in the future that are believed by some to be even more remarkable than the amazing physical changes and processes that have been observed in the history of space time The Investigator, Or Monthly Magazine of Literature, Politics, Science & Religion ,1841 **Report of the Annual Meeting** British Association for the Advancement of Science,1910
