The Age Of Sustainable Development:

The Age of Sustainable Development Jeffrey D. Sachs, 2015-03-10 Jeffrey D Sachs has shown himself to be one of the world's most perceptive and original analysts of global development in his groundbreaking books including *The End of Poverty* and *Common Wealth Economics for a Crowded Planet*. Now in this major new work he presents a compelling and practical framework for how global citizens can address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation and political economic injustice. Sachs outlines the holistic way forward: sustainable development. This provocative work offers readers, students, activists, environmentalists and policy makers the tools, metrics and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary general on the Millennium Development Goals and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and a clarion call for all who care about our planet and global justice.

Sustainable Urban Development in the Age of Climate Change Ali Cheshmehzangi, Ayotunde Dawodu, 2018-09-28 This book considers the impact of climate change on cities, advocating that people are the panacea and antidote to mitigating climate change by enhancing their involvement in achieving sustainable development Goals (SDGs). This leads to the development of an SDG best practice participation template which is supported by an extensive checklist of the 'whats' and 'hows' in participatory processes. Using case studies, extensive literature reviews and meta-analysis to make a case for a people-centric and integrated approach to sustainable urban development, it examines the role of governance in climate change, focusing on decision-making processes, policies and regulations, as well as focusing on the significance of a people-oriented approach on climate change and cities. Through an extensive global outlook, this book highlights bottom-up methods of implementing and achieving sustainable urban development in the age of climate change. These highlights should help to develop new mindsets, new strategies, new directions and new policies through which we can

see a more sustainable approach to urbanisation and urban development globally which can start equipping future generations with the tools for them to help their future generations
