The Amorium Mint And The Coin Finds:

The Amorium Mint and the Coin Finds Constantina Katsari, Christopher S. Lightfoot, Adil Özme, 2013-02-17 This fourth volume in the Amorium Monograph Series is devoted to the numismatic evidence from the ancient and mediaeval city of Amorium in central Anatolia Turkey It comprises two distinct parts In Section 1 the city mint of Amorium is discussed and illustrated by a chronological and typological catalogue of known specimens The city mint flourished from the Late Republican period until the reign of the emperor Caracalla In Sections 2 and 3 there is a catalogue of some 730 coins dating from Hellenistic to Ottoman times that have been found at the site between 1987 and 2006 The majority of these finds belong to the Byzantine period between the reigns of Anastasius I and Alexius I and provide confirmation of the city's enduring importance and economic vitality as the capital of the Anatolic Theme

Between Roman Culture and Local Tradition Barbara Zająć, 2023-06-08 Offering a detailed analysis of the Roman provincial coinage of Bithynia and Pontus during the reign of Trajan 98-117 this book characterises individual mints the rhythm of monetary production iconography and legends and considers the attribution and dating of individual issues

Life and Death in Asia Minor in Hellenistic, Roman and Byzantine Times J. Rasmus Brandt, Erika Hagelberg, Gro Bjørnstad, Sven Ahrens, 2016-12-31 Life and Death in Asia Minor combines contributions in both archaeology and bioarchaeology in Asia Minor in the period ca 200 BC AD 1300 for the first time The archaeology topics are wide ranging including death and territory death and landscape perception death and urban transformations from pagan to Christian topography changing tomb typologies funerary costs family organization funerary rights rituals and practices among pagans Jews and Christians inhumation and Early Byzantine cremations and use and reuse of tombs The bioarchaeology chapters use DNA isotope and osteological analyses to discuss both among children and adults questions such as demography and death rates pathology and nutrition body actions genetics osteobiography and mobility patterns and diet The areas covered in Asia Minor include the sites of Hierapolis Laodikeia Aphrodisias Tlos Ephesos Priene Kyme Pergamon Amorion Gordion Boazkale and Arslantepe The theoretical and methodological approaches used make it highly relevant for people working in other geographical areas and time periods Many of the articles could be used as case studies in teaching at schools and universities An important objective of the publication has been to see how the different types of results emerging from archaeological and natural science studies respectively could be integrated with each other and pose new questions on ancient societies which were far more complex than historical and social studies of the past often manage to transmit

The Eerdmans Encyclopedia of Early Christian Art and Archaeology Finney, 2017 One of the most widely respected theological dictionaries put into one volume abridged form Focusing on the theological meaning of each word the abridgment contains English keywords for each entry tables of English and Greek keywords and a listing of the relevant volume and page numbers from the unabridged work at the end of each article or section

The Routledge Handbook of the Byzantine City Nikolas Bakirtzis, Luca Zavagno, 2024-01-31 The Byzantine world contained many

important cities throughout its empire Although it was not urban in the sense of the word today its cities played a far more fundamental role than those of its European neighbors This book through a collection of twenty four chapters discusses aspects of and different approaches to Byzantine urbanism from the early to late Byzantine periods It provides both a chronological and thematic perspective to the study of Byzantine cities bringing together literary documentary and archival sources with archaeological results material culture art and architecture resulting in a rich synthesis of the variety of regional and sub regional transformations of Byzantine urban landscapes Organized into four sections this book covers Theory and Historiography Geography and Economy Architecture and the Built Environment and Daily Life and Material Culture It includes more specialized accounts that address the centripetal role of Constantinople and its broader influence across the empire Such new perspectives help to challenge the historiographical balance between margins and metropolis and also to include geographical areas often regarded as peripheral like the coastal urban centers of the Byzantine Mediterranean as well as cities on islands such as Crete Cyprus and Sicily which have more recently yielded well excavated and stratigraphically sound urban sites The Routledge Handbook of the Byzantine City provides both an overview and detailed study of the Byzantine city to specialist scholars students and enthusiasts alike and therefore will appeal to all those interested in Byzantine urbanism and society as well as those studying medieval society in general

Archaeology and Urban Settlement in Late Roman and Byzantine Anatolia John Haldon, Hugh Elton, James Newhard, 2018-11-22 The site of medieval Euchaita on the northern edge of the central Anatolian plateau was the centre of the cult of St Theodore Tiro the Recruit Unlike most excavated or surveyed urban centres of the Byzantine period Euchaita was never a major metropolis cultural centre or extensive urban site although it had a military function from the seventh to ninth centuries Its significance lies precisely in the fact that as a small provincial town something of a backwater it was probably more typical of the average provincial Anatolian urban settlement yet almost nothing is known about such sites This volume represents the results of a collaborative project that integrates archaeological survey work with other disciplines in a unified approach to the region both to enhance understanding of the history of Byzantine provincial society and to illustrate the application of innovative approaches to field survey

The Archaeology of Byzantine Anatolia Philipp Niewohner, 2017-03-17 The volume propounds a new understanding of the hitherto enigmatic medievalization of the Roman empire provides English presentations of foreign language research and promises to serve as an essential compendium that may help to establish Anatolian archaeology more widely in academic curricula worldwide

Economic Theory and the Roman Monetary Economy Colin P. Elliott, 2020-02-20 Reconceptualizes economic theory as a tool for understanding the Roman monetary system and its social and cultural contexts

Coins in Rhodes Anna-Maria Kasdagli, 2018-06-30 Presents the Byzantine and medieval coins collected by Greek archaeologists in Rhodes over a period of more than 60 years It includes lists of excavated land plots stray finds an illustrated catalogue of all the Byzantine and local coins up to 1309 and a representative

sample of the Hospitaller petty coins as well as all Western coins found *Fragments of Colossae* Alan Cadwallader, 2015-09-11 An engagingly visual guide book to a lost city from a scholar in the forefront of research on Colossae Alan Cadwallader distils information insights and interpretation into a rich collection of evidence from Colossae and its environs giving us access to a fascinating and under researched city Together with a significant chapter by Rosemary Canavan Cadwallader s often ground breaking work gives us unprecedented access into the life and context of this city A book for all who enjoy time travel with expert guides **The Byzantine City from Heraclius to the Fourth Crusade, 610-1204** Luca Zavagno, 2021-10-06 This book explores the Byzantine city and the changes it went through from 610 to 1204 Throughout this period cities were always the centers of political and social life for both secular and religious authorities and furthermore the focus of the economic interests of local landowning elites This book therefore examines the regional and subregional trajectories in the urban function landscape structure and fabric of Byzantium s cities synthesizing the most cutting edge archaeological excavations the results of analyses of material culture including ceramics coins and seals and a reassessment of the documentary and hagiographical sources The transformation the Byzantine urban landscape underwent from the seventh to thirteenth centuries can afford us a better grasp of changes to the Byzantine central and provincial administrative apparatus their fiscal machinery military institutions socio economic structures and religious organization This book will be of interest to students and researchers of the history archaeology and architecture of Byzantium **The Afterlife of the Roman City** Hendrik W. Dey, 2014-11-17 This book offers a new and surprising perspective on the evolution of cities across the Roman Empire in late antiquity and the early Middle Ages third to ninth centuries AD It suggests that the tenacious persistence of leading cities across most of the Roman world is due far more than previously thought to the persistent inclination of kings emperors caliphs bishops and their leading subordinates to manifest the glory of their offices on an urban stage before crowds of city dwellers Long after the dissolution of the Roman Empire in the fifth century these communal leaders continued to maintain and embellish monumental architectural corridors established in late antiquity the narrow but grandiose urban itineraries essentially processional ways in which their parades and solemn public appearances consistently unfolded Hendrik W Dey s approach selectively integrates urban topography with the actors who unceasingly strove to animate it for many centuries **The Paulicians** Carl Dixon, 2022-05-16 Disavowing their traditional portrayal as the progenitors of medieval Christian dualism this book recasts the Paulicians as broadly conventional Christians inspired by the apostle Paul Using previously neglected Paulician testimony and a critical reappraisal of the existing sources it explains their fleeting regional prominence via a pluralistic approach to Paulician identity within the complex socio religious milieus of Armenia and Asia Minor Exploring their history of schism persecution and resistance it reassesses their relationship with the iconoclast controversy and the changing fortunes of Byzantine Islamic warfare shedding new light on their obscure but fascinating transformation from itinerant preachers to militarized

insurrectionists **Medieval Europe From Another Angle** Florin Curta, 2025-05-29 The history of East Central Southeastern and Eastern Europe may be considered as alternating between a Marxist emphasis on rigid differences between Antiquity and the Middle Ages largely derived from distinctive modes of production and a preoccupation with borders ethnicity and personalities This volume examines a number of economic problems that highlight the limits of the current interpretative models such as the existence of markets or the relation between trade and gift giving largely on the basis of the archaeological evidence from the eastern parts of the European continent In addition four other chapters address critically such issues as the images of Charlemagne in East Central Europe and of the Vlachs in the French crusade chronicles linear frontiers as well as the significance of St Christopher in Teutonic Prussia *Medieval Europe from Another Angle* will appeal to scholars and students alike studying Late Antiquity and the early Middle Ages with an interest in material culture and its use in building ethnic boundaries It covers a wide geographical area from Iberia to the Baltic region
