The Autobiography Of Charles Darwin:

Autobiography of Charles Darwin Charles Darwin, Sir Francis Darwin, 1929 [The Autobiography of Charles Darwin](#) Charles Darwin, 2022-05-28 In *The Autobiography of Charles Darwin* readers are provided with a profound insight into the life and thoughts of one of science's most pivotal figures. Written with remarkable clarity and introspective depth, this work illuminates Darwin's formative experiences, his scientific inquiries, and the evolving context of the Victorian era which both informed and challenged his groundbreaking theories. The narrative interweaves personal anecdotes with broader reflections on science, religion, and society, establishing a unique literary style that combines autobiography with philosophical inquiry, making it a vital resource for understanding the intellectual landscape of the 19th century. Charles Darwin (1809-1882) was a naturalist and geologist renowned for his groundbreaking work on the theory of evolution through natural selection. Influenced by a diverse family background and extensive voyages, particularly the HMS Beagle expedition, his reflections reveal not only the scientific rigor behind his cogent theories but also the personal struggles he faced as he contended with the theological implications of his findings. This blend of rigorous scholarship and personal narrative enriches our understanding of Darwin as both a scientist and a man. I recommend *The Autobiography of Charles Darwin* to anyone interested in the complexities of scientific thought and the nature of personal conviction. This work offers a rare glimpse into the mind of a visionary thinker, making it essential reading for historians, scientists, and anyone curious about the origins of modern biology.

My father's autobiographical recollections were written for his children and written without any thought that they would ever be published. To many, this may seem an impossibility, but those who knew my father will understand how it was not only possible but natural. The autobiography bears the heading 'Recollections of the Development of my Mind and Character' and ends with the following note: Aug 3 1876 This sketch of my life was begun about May 28th at Hopedene, Mr Hensleigh Wedgwood's house in Surrey, and since then I have written for nearly an hour on most afternoons. It will easily be understood that in a narrative of a personal and intimate kind, written for his wife and children, passages should occur which must here be omitted, and I have not thought it necessary to indicate where such omissions are made. event during this year has fixed itself very firmly in my mind and I hope that it has done so from my conscience having been afterwards sorely troubled by it it is curious as showing that apparently I was interested at this early age in the variability of plants With respect to science I continued collecting minerals with much zeal I must have observed insects with some little care I almost made up my mind to begin collecting all the insects which I could find dead for on consulting my sister I concluded that it was not right to kill insects for the sake of making a collection Life there was perfectly free the country was very pleasant for walking or riding and in the evening there was much very agreeable conversation not so personal as it generally is in large family parties together with music Nothing has left a more vivid picture on my mind than these evenings at Maer from this book

The Charles Darwin Collection Charles Darwin,2020-09-15 These three major works by the father of evolutionary theory encompass his life journey through the Galapagos and landmark work on natural selection On the Origin of Species In one of the most important contributions to scientific knowledge Charles Darwin puts forth the theory that species evolve over time through the process of natural selection Drawn from extensive research performed on various creatures living in the Gal pagos Islands his research suggests that one species does change into another a revolutionary notion that has shaped much of modern biology The Autobiography of Charles Darwin Darwin wrote his autobiography as a family document in 1876 When it was originally published posthumously certain portions were considered too personal or controversial and were removed This edition

restores those passages shedding light on the women in Darwin's life and his evolving views on religion. It also includes previously unpublished notes and letters on family matters as well as Darwin's dispute with Samuel Butler. The Voyage of the Beagle: From volcanoes in the Galapagos to the coral reefs of Australia, this travelogue documents the young naturalist's historic years-long journey at sea. Darwin's observations of the people, places, and events he experienced make for compelling reading and offer a fascinating window into the intellectual development of his ideas about natural selection.

When I left the school I was for my age neither high nor low in it and I believe that I was considered by all my masters and by my father as a very ordinary boy rather below the common standard in intellect. To my deep mortification my father once said to me: "You care for nothing but shooting dogs and rat catching and you will be a disgrace to yourself and all your family." *The Autobiography of Charles Darwin* Charles Darwin, 2015-10-01. I may of course be egregiously wrong but I cannot persuade myself that a theory which explains several large classes of facts can be wholly wrong.

Charles Darwin November 13 1859. Originally published in 1892, this autobiography of the great naturalist and father of modern biology, compiled and edited by his son Francis, is an intriguing behind-the-scenes look into the personal life of a great scientist and the development of one of the most powerful ideas of the modern era. Although a short book, it is filled with absorbing and interesting glimpses into the mind and personal experiences of the man whose discoveries have had such a profound influence on science, philosophy, and the modern scientific perspective. In the first half of the book, Darwin reminisces about his early life, his family, and upbringing, and his five-year voyage on the HMS Beagle during which he made the many observations that were later to prove so critical to his formulation of evolutionary theory. The second half is devoted mainly to the Origin of Species, its foundations, development, the writing and publication process, its varied critical reception, and the gradual acceptance and growth of evolutionary theory. Also included are thoughts on his lesser-known work in geology and the fertilization of flowers, plus a selection of his letters.

The Autobiography of Charles Darwin Charles Darwin, 2021-01-17 At the requisition of German editor Charles Darwin 1809-1882 started his autobiography at 67 years old His granddaughter and editor Nora Barlow discloses to us that he modified it more than quite a while Darwin recalls minimal details about his mother who passed away when he was 8 yet speaks at length about his powerful physician father who stood an estimated 6 foot 2 inches and weighed more than 336 pounds His father's prosperity ensured that Charles could never need to work professionally Darwin was a naughty kid educated in sympathy and habits by his caring sisters At an opportune time he demonstrated an enthusiasm for gathering for the most part beetles yet additionally coins shells and minerals He abhorred boarding school he delighted in running in the outdoors and shooting snipes with his dogs He cites his father's portrayal of him as a young boy You care for nothing but shooting dogs and rat catching and you will be a disgrace to yourself and all of your family As a medical student at Edinburgh University he saw tasks without anesthesia which made him rebel against his father's desire that he become a doctor he could not take seeing blood At Cambridge he discovered the majority of his classes and professors dull with the exception of his botany teacher John Stevens Henslow his coach and hiking companion The fatherly plan for him to turn into a clergyman foundered at Cambridge as Darwin scrutinized the Thirty nine Articles of the Church of England From 1831 he cruised with Capt Fitz Roy on board *The Beagle* for 5 years and 3 days once more against his father's desires He squabbled with Fitz Roy whose

emotional episodes required Darwin's civility. They differ about slavery, FitzRoy protecting it and Darwin abhorring it. He conveyed Lyell's *Principles of Geology* with him, read Milton and gathered various examples which he sent back to Britain 28 months after his arrival. Darwin wedded his cousin Emma Wedgwood. The marriage was cheerful and delivered 10 children. In the section on his religious convictions, Darwin gives 4 reasons behind trusting the Old Testament to be bogus as he has considered the laws of nature; he has stopped to believe in supernatural occurrences. He dismisses Bishop Paley's contention for insightful structure. Everything in nature is the result of fixed laws. The Christian god is unfeeling as he makes innocent creatures endure and sentences non-devotees to hell. Darwin admits he does not comprehend the mystery of the beginning of all things, considering himself an agnostic. He plots the great Victorian men he has known; however, his ill health has since quite a while ago kept him from voyaging or seeing companions. He talks about his publications including *Origin of Species*, expressing he could not have cared less whether he or Wallace got the credit for the theory of evolution. He credits his prosperity to his moderate abilities. He has been deliberate, enterprising, and commonsensical.

Charles Darwin Charles Darwin, 2015-07-14 Charles Robert Darwin was the second son of Dr Robert Waring Darwin of Shrewsbury where he was born on February 12, 1809. Dr Darwin was a son of Erasmus Darwin, sometimes described as a poet but more deservedly known as physician and naturalist. Charles Darwin's mother was Susannah, daughter of Josiah Wedgwood, the well-known potter of Etruria in Staffordshire.
